SUMMARY

Analytical and results-driven Data Science graduate student with a strong background in data analysis, statistical modeling, forecasting and machine learning. Skilled in extracting insights from complex datasets, building predictive models, and creating interactive dashboards. Experienced in academic and industry projects across healthcare, economics and finance.

EDUCATION

- **Stevens Institute of Technology** Hoboken, NJ
Master of Science in Data Science (Concentration in Applied Statistics); GPA: 3.93 Sep 2023 – May 2025
 - **Coursework:** Probability Theory, Statistical Methods, Deep Learning, Time Series Analysis
- **Gujarat Technological University** Gujarat, India
Bachelor of Engineering in Computer Engineering; GPA: 3.86 (9.44/10.0) Jul 2019 – July 2023
 - **Coursework:** Algebra & Calculus, Machine Learning, Cloud Computing, Database Management Systems

EXPERIENCE

- **Stevens Institute of Technology** Hoboken, NJ
Undergraduate & Graduate Teaching and Course Assistant Jan 2024 – Mar 2025
 - Assisted and supported 150+ students in classes, labs, and tutoring on algebra, probability, and statistics.
 - Graded 200+ assignments via Canvas and analyzed student performance data with Excel in collaboration with faculty.
- **Script All DNA Technologies** Gujarat, India
Python Developer Trainee – Healthcare R&D Feb 2023 – May 2023
 - Developed a Mental Health Support System using Django Rest Framework with ~20 personalized treatment options.
 - Improved user accessibility and boosted engagement by 40% through interactive UI/UX and tailored content delivery.
- **QMetry Inc.** Gujarat, India
AI/ML Trainee Engineer Jun 2022 – Aug 2022
 - Developed a Self-Healing System using AI/ML models (Logistic Regression & Random Forest) to detect and correct UI changes in web/mobile apps.
 - Led testing using QMetry Automation Studio, achieving 93% accuracy and reducing manual intervention by 42% through seamless system integration.

PROJECTS

- **Jump Statistic-based Clustering:** Performed clustering on univariate time series using Jump Statistic, Silhouette, and Gap Statistics with 300–500 Monte Carlo samples. Achieved 92% accuracy in identifying optimal clusters on real-world economic and environmental datasets with 70+ features.
- **Stock Prices Forecasting:** Forecasted Microsoft’s closing stock prices over 4, 8, and 12-month horizons using time series analysis in R. Used historical stock price data and applied forecasting libraries to identify future trends.
- **Covid-19 Risk Prediction:** Predicted COVID-19 risk using statistical Python libraries, incorporating various health factors, and improved model efficiency by addressing class imbalance with SMOTE, increasing accuracy from 77% to 85%.

SKILLS

- **Languages and Databases:** Python, R, MySQL, PostgreSQL, MongoDB, Oracle
- **Frameworks and Libraries:** NumPy, Pandas, SciPy, Matplotlib, Seaborn, Plotly, Scikit-Learn, TensorFlow, Keras, Flask, Beautiful Soup, Scrapy, Selenium, Django, PySpark, NLTK, PyTorch
- **Tools:** Microsoft Office & Excel, Microsoft Visio, Tableau, Power BI, Minitab, Git, AWS, MATLAB, Microsoft Azure, Azure Databricks, Apache Spark
- **Technical Skills:** Data Analysis, Data Visualization, Statistical Modeling & Inferencing, Data Modeling
