EXPERIENCE

ADELPHI UNIVERSITY Garden City, NY

ASSISTIVE TECHNOLOGY ASSISTANT | | September 2023 – December 2024

- Automated accessibility workflows using technology, streamlining processes and improving efficiency for assistive technology services.
- Contributed to enhancing technology accessibility for students with diverse needs by independently executing tasks and maintaining confidentiality.
- Proactively identified and resolved web accessibility issues, applying critical problem-solving approaches to enhance the user experience for diverse audiences.

NUUMITE TECHNOLOGIES India

SOFTWARE ENGINEER | | July 2021 - August 2022

- Designed and implemented scalable, distributed backend systems using object-oriented principles in Python and PHP.
- Utilized Test-Driven Development (TDD) to build robust systems, ensuring maintainability and performance.
- Developed RESTful APIs to facilitate communication between services.
- Worked with SQL databases to manage backend data for various projects.
- Led Agile sprints, conducting code reviews and improving development workflows.

PROJECTS

YouTube Top Trending Video Alexa Skill

- Developed an Alexa Skill to retrieve real-time data on the top trending YouTube videos in the US.
- Integrated a dataset containing video attributes like title, video ID, view count, and tags for diverse query support.
- Technologies: Alexa Skills Kit, Python, AWS Lambda

AR interaction building model project

- Built an AR web app for interactive 3D building models with gesture controls (rotate, zoom, reset).
- Technologies: *AR.js, JavaScript, HTML, CSS*

Doctor's Appointment Management System

- Created an online platform for managing doctor appointments with dynamic file-handling features.
- PHP, SQL, JavaScript, AJAX, HTML, CSS

CERTIFICATIONS

Meta Programming in Python

Google Data Analytics Professional Certificate (In Progress)
