

CHENCHU MAHA LAKSHMI PADIDAM

Spring City, PA | 7037746533 | padidammahalakshmi@gmail.com

Summary

Master's graduate in Computer Science with experience as a Software Engineer Intern at Vivify Solutions Inc. and Information Technology Intern at Auxilior Capital Partners. Developed scalable React-based interfaces and automated workflows using Python and Power Automate, improving efficiency by 18%. Proficient in Java, JavaScript, and Power BI, committed to delivering innovative software solutions that optimize project outcomes and align with organizational objectives.

Education

Drexel University

Master of Science, Computer Science

Sep 2022 - Dec 2024

Philadelphia, Pa

• **GPA:** 3.47

• **Achievements:** Honors: CCI Partnership (\$3,200), Doris Zimmerman End Schl (\$1,000), Belver C Griffith Endow Fund (\$750)

• **Coursework:** Java Programming, Python Programming, Data Acquisition and Pre-Processing, Data Structures and Algorithms, Web Designing, Storytelling, Requirements Engineering & Management, Artificial Intelligence, Computer Graphics, Computer Networks, Software Designing

Work Experience

Auxilior Capital Partners

Information Technology Intern

May 2025 - Present

Plymouth Meeting, PA

- Developed and maintained Power BI reports, delivering actionable insights to stakeholders and enabling data-driven decision-making for financial logistics programs.
- Engineered Python tools and Power Automate workflows to automate repetitive tasks, boosting team efficiency by 18% and reducing manual workload.
- Evaluated AI applications within business processes, identifying optimization opportunities to enhance functionality and align with Auxilior's innovation goals.
- Collaborated with the IT team on CRM enhancement projects, streamlining data management and user workflows to improve operational efficiency.
- Contributed to portal development by performing testing and debugging, ensuring seamless and reliable user experiences for client-facing platforms.

Vivify Solutions Inc

Software Engineer Intern

Jan 2025 - Jun 2025

Remote

- Engineered responsive and dynamic user interfaces using React, significantly improving user experience metrics.
- Developed and maintained RESTful APIs and server-side logic with Node.js, Python, and Django, enhancing both application scalability and performance.
- Utilized JIRA for effective task management and sprint planning, facilitating timely delivery of project milestones
- Collaborated with multidisciplinary teams to integrate front-end and back-end components, contributing to a unified, high-quality product.
- Participated in code reviews, debugging, and testing processes, maintaining high standards of code quality and reliability.

Logic Tree IT Solutions

SOFTWARE ENGINEER

Mar 2020 - Jan 2022

Hyderabad, India

- Engineered a secure web portal for document exchange, reducing email-based transfer delays by 40% and enhancing security compliance for over 500 users across the organization.
- Designed and implemented RESTful endpoints, integrating AWS S3 and DynamoDB to manage 10,000+ documents monthly with 99.9% uptime and a 30% improvement in retrieval speed.
- Adopted agile methodologies, contributing to 50+ sprints with a 95% on-time delivery rate through daily stand-ups, backlog refinement, and retrospectives.
- Participated in all SDLC phases, delivering 15+ feature releases by gathering requirements, designing solutions, developing code, and conducting testing, achieving a 25% reduction in post-launch defects.

Academic Projects

Chat Protocol

Mar 2024

Remote

- Developed a direct messaging application protocol over QUIC, focusing on performance and Scalability
- Implemented client-server communication to facilitate reliable and efficient message exchange
- Tested the protocol in a Linux environment to ensure compatibility and robustness
- Achieved a stable and efficient communication system for real-time messaging applications

Unbreakable: A Journey of Resilience

Mar 2023

Remote

- Created a digital story titled "Unbreakable: A Journey of Resilience" for a Storytelling course
- Designed a storyboard and script to effectively communicate personal growth and overcoming challenges
- Produced an MP4 video with edited audio and background music to enhance engagement and emotional impact
- Analyzed the impact of digital narratives on audience perception and cultural understanding

Personal Finance Education System

Mar 2023
Philadelphia, PA

- Developed a personal finance education system to teach basics of banking, investing, and taxes
- Designed interactive modules to provide critical information and resource for users
- Implemented user-friendly registration and support features to handle high traffic
- Created personalized learning paths to enhance user experience and engagement

Community Site

Mar 2023
Philadelphia, PA

- Constructed a community information site to enable active participation using HTML5, CSS3 and JavaScript
- Designed user-friendly interfaces to enhance community engagement and interaction
- Implemented features to provide relevant information and resources for community members
- Focused on accessibility and responsiveness to ensure inclusivity for all users

Real Estate Gold Team

Sep 2022
Philadelphia, PA

- Analyzed and constructed a dataset by acquiring data from Zillow.com for zip code 19104
- Defined constraints based on property types, home values, rental values, inventory and sale prices
- Utilized Python for data extraction, cleaning, and analysis to identify real estate trends
- Provided insights to guide real estate investment decisions in the specified area

Skills

-
- Java, Python, JavaScript, Django, React, Linux, RESTful API Design, Node, SQL, NoSQL, HTML5, CSS3, Jira, Git
