

Dharma Suriseti | Data Analyst

dharmasuriseti@gmail.com | +1 (713) 476-8776 | Houston, TX | LinkedIn

SUMMARY

Data Analyst with 4+ years of experience in statistical analysis, data modeling, and data visualization. Proficient in SQL, Python, Tableau, and Power BI, with demonstrated success in building data pipelines, automating reporting workflows, and delivering actionable insights to support strategic decision-making and drive business value.

SKILLS

Data Analysis: Exploratory Data Analysis (EDA), A/B Testing, Descriptive Analysis, Hypothesis Testing, Regression Modeling
Programming & Scripting: SQL, Python (pandas, numpy, matplotlib, seaborn), R
Data Visualization & BI Tools: Tableau, Power BI, Google Data Studio, Excel (PivotTables, VLOOKUP, dashboards)
Data Handling & ETL: Data Cleaning, APIs, Jupyter Notebooks, Alteryx
Database & Cloud Platforms: MySQL, PostgreSQL, MS SQL Server, Snowflake, AWS Redshift, Microsoft Azure
Statistical & ML Techniques: Linear/Logistic Regression, Time Series Forecasting, Clustering, Classification
Business & Communication: KPI, Dashboard Reporting, Communication to Stakeholders, Cross-functional Collaboration
Tools & Environments: Git/GitHub, Jira, Confluence, Agile/Scrum Methodologies

CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst Associate (PL-300)
Microsoft Certified: Azure Data Fundamentals (DP-900)

EXPERIENCE

- Metlife, Data Analyst | TX

Aug 2024 – Present

 - Examined 3M+ policyholder records using SQL and Python to detect lapse patterns, enabling retention improvements that reduced policy drop-offs by 12% in under 6 months.
 - Implemented 10+ automated Tableau dashboards to monitor underwriting efficiency, cutting manual report generation by 30 hours monthly across cross-functional actuarial and claims teams.
 - Led A/B testing for customer outreach campaigns, uncovering a 7.8% higher engagement rate with SMS compared to email, directly influencing renewal communications strategy.
 - Developed time-series models using Python to forecast quarterly claims volume, achieving 91% accuracy and supporting a \$5M operations budget planning initiative.
 - Directed the development of a demographic-based policy valuation model by integrating data from Snowflake and proprietary systems, driving a new pricing strategy that's forecasted to increase revenue.
 - Built and presented executive-level dashboards in Power BI that identified anomalies in claim costs, prompting policy adjustments that eliminated \$2.1M in annual excess payouts.
- Infosys, Data Analyst | India

Feb 2022 – May 2023

 - Developed and maintained Power BI dashboards tracking departmental KPIs, enabling three hospital units to improve operational compliance scores by 12% over a nine-month review cycle.
 - Automated audit trail reports for insurance claims using Alteryx, reducing audit time from 3 days to 6 hours and uncovering irregularities worth \$200K quarterly.
 - Processed 2.5 million monthly patient records using Python and SQL to identify trends in delayed billing, helping a healthcare client reduce processing time.
 - Built logistic regression models in R to predict hospital readmission risks, achieving 78% model accuracy and contributing to a 9% drop-in re-admission rates.
 - Extracted and transformed EHR data from PostgreSQL to Snowflake for real-time analytics use, improving query efficiency by 55% across three analytics teams.
 - Conducted A/B tests on email formats for discharge surveys, resulting in a 21% response rate increase that improved post-care insights collection.
- Wipro Limited, Data Analyst Associate | India

Dec 2019 – Jan 2022

 - Cleaned and processed EHR records across 5 clinical systems using SQL and Python, preparing standardized datasets for downstream analytics projects.
 - Created Excel dashboards with slicers and pivot tables to track medication adherence rates, enabling interventions for 22% of patients missing critical prescriptions.
 - Performed KPI analysis for post-discharge monitoring programs, leading to a 15% improvement in timely follow-up appointments and care plan compliance.
 - Automated HL7 feed validations with 20+ Python scripts, reducing manual data QA time by 60% while ensuring data integrity for clinical dashboards.
 - Retrieved and joined clinical and claims data from MongoDB and SQL Server to generate quarterly reports that guided \$500K in preventive care budget allocations.
 - Conducted exploratory analysis of readmission trends using seaborn and matplotlib visualizations, enabling clinical leads to address three high-risk patient segments.

EDUCATION

Masters in Management Information System

Jan 2023 – May 2024

Lamar University | Beaumont, TX

Bachelors in Civil Engineering

Jun 2014 – May 2019

JNTU | Hyderabad
