PROFILE

Highly accomplished and results-oriented **Senior Business Analyst** with over 8 years of progressive experience at the forefront of business-technology alignment. I specialize in optimizing enterprise platforms, including **Salesforce, ServiceNow, and PeopleSoft**, alongside diverse in-house SaaS applications across a breadth of industries: **Oil & Gas, Telecommunications, Hospitality, and Healthcare**. I possess a proven track record of leading end-to-end requirement analysis, complex business process reengineering, seamless system integration, and rigorous user acceptance validation, consistently delivering substantial business value. My expertise lies in translating intricate business needs into clear, actionable functional and technical specifications, enabling the successful implementation of scalable and user-centric enterprise solutions.

I am adept at navigating and driving value within **Agile, Scrum**, and hybrid **SDLC** methodologies, partnering closely with product owners, solution architects, QA teams, and executive stakeholders to ensure timely, value-driven delivery and to champion digital transformation initiatives across global programs. Well-versed in **CRM, ITSM, HCM, and ERP business processes**, I bring hands-on experience in streamlining workflows, enhancing operational efficiency, and solving complex business challenges through strategic technological solutions. I am recognized for my analytical depth, clear communication, and proactive approach to delivering measurable business value.

TOOLS & TECHNIQUES

Platforms & Systems: Salesforce (Lightning, CPQ, Service Cloud, Vlocity/OmniStudio), ServiceNow (ITSM, FSM, Incident/Problem/Change Management), PeopleSoft (HCM, Financials, Campus Solutions), In-house SaaS applications (CRM, Billing, Workflow Automation)

Business Analysis & Documentation: BRD, FRD, User Stories, Use Cases, Acceptance Criteria, Process Flow Diagrams, Wireframes, Data Mapping, RTM, Gap/Impact Analysis

Modeling & Visualization Tools: MS Visio, Lucidchart, Mural, Figma, Balsamiq, Draw.io, Jira Advanced Roadmaps

Project & Agile Tools: JIRA, Confluence, Azure DevOps, Rally, Trello, Smartsheet, MS Project, VersionOne, Miro

Testing & Validation Tools: HP ALM/QC, Salesforce Data Loader, Postman, Selenium (collaboration), TestRail, TestLink, UAT (Planning, Execution, Defect Triage)

Data & Reporting Tools: Power BI, Tableau, Excel (Advanced), Google Sheets, SQL (basic), Pivot Tables, VLOOKUP/XLOOKUP

Collaboration & Documentation: MS Office Suite, SharePoint, Google Workspace, Slack, Teams, Zoom, Webex

Methodologies & Frameworks: Agile (Scrum, Kanban), Hybrid Agile-Waterfall, ITIL, SDLC, UAT Coordination, Change Management, BPR, Design Thinking, Value Stream Mapping, Lean Six Sigma (basic understanding)

WORK EXPERIENCE

Lead Business Systems Analyst / Senior Business Analyst

Nov 2022 - Present

TransMountain Corporation - Calgary, AB

Currently serving as a **Senior Business Analyst** at **Trans Mountain Corporation**, a federally owned **Oil & Gas enterprise** specializing in crude oil and petroleum product transportation across Canada's west coast and Pacific Rim. I lead comprehensive **business analysis efforts** across complex, high-impact **software modernization programs**, driving the **definition, validation, and implementation** of integrated systems spanning **oil scheduling, measurement and quality, logistics, accounting, and financial reconciliation**.

The project focuses on developing a comprehensive, integrated software platform encompassing critical operations, including **oil scheduling, measurement and quality, accounting, customer logistics, and financial processes**. My contributions are instrumental in maintaining rigorous quality and reliability standards while addressing the complexities and challenges of the oil and gas sector.

Projects: Trans Mountain – Vista Change Request, OceanSmart, ServiceNow ITSM Modules

- **Strategic Requirements Elicitation & Analysis:**

Orchestrated comprehensive requirement gathering sessions—including **workshops, structured interviews, and targeted surveys**—with diverse stakeholders across **operations, crude measurement, scheduling, finance, and logistics**.

Conducted in-depth **current-state analysis** of existing workflows and legacy systems to **identify inefficiencies, compliance risks, and critical business pain points**.

Architected and documented detailed **functional and non-functional requirements** utilizing industry-standard artifacts such as **user stories, use cases, Business Process Model and Notation (BPMN) process flows, wireframes/mockups, and logical data models**. This directly informed solution **design** and **test plan development** within a hybrid SDLC framework.

- **Change Management & Impact Assessment:**

Proactively analyzed stakeholder-driven change requests to assess alignment with business strategy, technical feasibility, and downstream operational impact.

Prioritized requests based on strategic value, urgency, and inter-departmental dependencies.

Authored structured business cases and collaborated with Project Managers and Solution Architects for seamless integration into sprint cycles and release planning.

- **Cross-functional Stakeholder Engagement & Alignment:**

Served as the primary liaison bridging critical business units with development and QA teams.

Facilitated daily standups, cross-functional workshops, sprint reviews, and release planning sessions to ensure cohesive alignment on requirements, risk mitigation strategies, project timelines, and stakeholder expectations.

Developed and executed stakeholder communication plans, ensuring clear articulation of business priorities within defined project constraints.

- **Solution Design & Functional Validation:**

Collaborated intensely with Solution Architects and Developers during solution design sessions to ensure proposed functionalities adhered to operational realities—from field data ingestion to complex financial reconciliation engines.

Clarified intricate edge cases and provided traceable business rules for custom logic development.

Supported QA initiatives by advising on test data creation and ensuring end-to-end traceability from documented requirements through to system validation.

- **Process Improvement & Operational Optimization:**

Mapped current-state operational processes and **designed future-state models** using **Microsoft Visio, Lucidchart, and Mural** to strategically streamline **oil measurement, financial reconciliation, and logistics coordination workflows**.

Developed various diagrams and flowcharts including **swimlane diagrams, data flow diagrams (DFDs), context diagrams, and use case diagrams** to visualize complex system interactions and business processes.

Identified key automation opportunities and partnered with solution teams to implement systemic process enhancements, contributing to overall operational efficiency.

- **Deep Domain Expertise – Oil & Gas:**

Applied in-depth knowledge of **oil scheduling lifecycles, crude oil measurement standards (e.g., API standards), pipeline operations, and industry regulatory benchmarks** to directly influence platform design and ensure **compliance (e.g., PHMSA, CER)**.

Ensured all deliverables supported **audit-readiness** and aligned with the unique requirements of **crude transport, financial accruals, and reconciliation processes**.

- **ServiceNow Integration & Enterprise Workflow Streamlining:**

Defined detailed functional requirements and supported the successful rollout for critical **ServiceNow modules**, including **Incident Management, Pipeline Integrity & Leak Detection, and Field Operations & Workforce Management**.

Developed precise configuration specifications to support **Service Level Agreement (SLA) enforcement**, optimize incident response workflows, and enhance field staff coordination.

Led integration testing and facilitated extensive field user validation for ServiceNow deployments.

- **User Acceptance Testing (UAT) & Defect Prioritization:**

Designed comprehensive UAT test cases and success criteria, mirroring real-world operational scenarios in **JIRA & HP ALM**. Facilitated business user training and UAT execution sessions, ensuring robust validation.

Assessed the severity and business impact of identified defects, collaborating directly with QA Leads and Developers for strategic prioritization and expedited resolution.

- **Agile Product Ownership & Backlog Management:**

Served as a **proxy Product Owner**, meticulously maintaining and prioritizing the product backlog in **JIRA & Azure DevOps**.

Actively participated in all **sprint ceremonies** (planning, review, retrospectives), refined **user stories** with precise **acceptance criteria**, and ensured alignment with overarching project goals, regulatory standards, and evolving stakeholder expectations.

- **Project Lifecycle Involvement & Strategic Road mapping:**

Contributed significantly to project scope development, comprehensive risk planning, and phased delivery roadmaps.

Provided critical business insight during solution planning to strategically align technology initiatives with overarching operational goals and strict regulatory timelines.

- **Business Intelligence & Data-Driven Reporting:**

Collaborated with Business Intelligence (BI) teams to define essential metrics, **Key Performance Indicators (KPIs)**, and **interactive dashboards** using Power BI.

Generated comprehensive analytical reports including **gap analysis reports, feasibility studies, requirements traceability matrices (RTMs), and project status reports** to provide clear insights to stakeholders.

He has also utilized basic **SQL** to support data strategy initiatives. He has experience using **Tableau** and Power BI to build dashboards and analytical views, providing real-time insights for data-driven decision-making.

SaskTel – Regina, SK

SaskTel, a telecommunications company under provincial government ownership, is a prominent provider of wireline and wireless communication services encompassing landline telephone, mobile networks, broadband internet, IPTV, and security solutions.

In my role as a **Sr. Business Analyst**, I am actively engaged with SaskTel's transformative initiative. The company is strategically optimizing its operations within both Business and Consumer Sales and Provisioning sectors. This includes the strategic implementation of Salesforce in conjunction with **Vlocity** for Salesforce automation, CPQ, customer relationship management, and the augmentation of consumer experiences. Notably, this strategic alignment fosters seamless integration across Salesforce, Vlocity, Order Management, Provisioning, Fulfillment, and Billing processes, thereby enhancing overall operational efficiency and customer satisfaction.

Projects: BTE (Business tool evaluation), BSS (Business system and support), CSG (Consumer support group), CPC (Consumer Product Catalogue), CCE (Consumer CRM evolution), eCommerce website for partners

- **Strategic Salesforce-Vlocity Implementation Leadership:**

Led end-to-end business analysis for critical **Salesforce-Vlocity implementations**, spanning **Sales Cloud, Service Cloud, CPQ, Order Management, Provisioning, and Billing** modules. This directly drove **automation** and **operational excellence** across the telecom service delivery lifecycle.

Championed the adoption of **Salesforce Lightning** features and **Vlocity Communications Industry Cloud** capabilities to maximize platform ROI and enhance user productivity.

- **Advanced Requirements Elicitation & Documentation:**

Masterfully facilitated immersive workshops and targeted stakeholder interviews with cross-functional teams to elicit granular business requirements.

Authored comprehensive Business Requirements Documents (BRDs), Functional Requirements Documents (FRDs), detailed user stories, and precise acceptance criteria using collaborative platforms such as **Confluence** and **JIRA**, ensuring a single source of truth for all project stakeholders.

- **Complex Process & Solution Modeling:**

Expertly designed and modeled intricate business processes, decision trees, and complex data flows utilizing advanced diagramming tools like **MS Visio, Mural, and Lucidchart**. This ensured robust alignment between proposed business logic and technical system behavior.

Developed detailed swimlane diagrams, context diagrams, and entity-relationship diagrams (ERDs) to visualize end-to-end process orchestration and data relationships.

- **Seamless Integration & Workflow Architecture:**

Strategically mapped critical integration points and sophisticated system workflows between Salesforce Lightning, Vlocity Communications, **Siebel CRM, Oracle OSM** (Order and Service Management), and **Oracle BRM** (Billing and Revenue Management). This enabled the seamless automation of lead-to-cash and order-to-activate processes.

Defined API specifications and data exchange protocols for inter-system communication, optimizing data integrity and operational flow.

- **User Experience (UX) & Design Specification:**

Created intuitive wireframes, high-fidelity screen mockups, and detailed UI behavior diagrams using leading design tools such as Figma and Balsamiq. This actively supported a user-centric design approach during Salesforce CPQ and CRM customization, enhancing usability and adoption.

- **Salesforce Configuration & Data Governance:**

Defined and rigorously maintained organizational hierarchies, complex product catalog structures, dynamic pricing models, and intricate business rules directly within various **Salesforce sandbox environments**.

Supported data strategy initiatives by defining precise mapping rules, cleansing criteria, and field transformation logic for large-scale Salesforce data migration efforts, leveraging tools like Salesforce Data Loader and Excel macros.

- **Agile Project Delivery & Cross-functional Collaboration:**

Actively participated in all **Agile sprint ceremonies**, including planning, stand-ups, reviews, and retrospectives.

Maintained and meticulously prioritized product backlogs in **JIRA** and **Azure DevOps**, ensuring alignment with strategic objectives and iterative delivery.

Collaborated seamlessly with development teams, QA engineers, and solution architects using communication platforms like **Slack** to drive efficient problem-solving and accelerate delivery.

- **Quality Assurance & Compliance Oversight:**

Performed rigorous reviews of functional designs, intricate user flows, and complex integration logic produced by third-party teams (e.g., IBM).

Conducted thorough gap analysis to ensure full business rule coverage, adherence to regulatory requirements, and overall solution compliance.

Developed comprehensive UAT test plans, coordinated and facilitated end-user validation sessions, and meticulously tracked results in HP ALM and JIRA, ensuring production readiness and securing stakeholder signoff.

- **Business Intelligence & Performance Monitoring:**

Built robust dashboards and analytical views in **Power BI and Tableau** to provide real-time insights into key performance indicators (KPIs) such as quote velocity, order fulfillment cycle times, and lead conversion rates, empowering data-driven decision-making.

Utilized **SQL** for advanced data reporting and analysis.

- **Training & User Adoption:**

Developed comprehensive training materials, user-friendly job aids, and strategic adoption playbooks using SharePoint and Google Suite.

Conducted impactful live training sessions for Sales, Customer Service, and other non-technical teams, facilitating seamless transition and high user adoption rates for new Salesforce-Vlocity functionalities.

- **Documentation & Governance:**

Ensured strict traceability of all requirements using Requirements Traceability Matrices (**RTM**). Maintained a full documentation lifecycle aligned with **ITIL/ITSM standards**, promoting operational efficiency and knowledge transfer.

Business Analyst I

May 2018 – Dec 2019

Bell MTS Canada - Toronto, ON

- Led business-side validation and requirement traceability for Salesforce CRM migration and enhancement projects, focusing on **Policy and Charging Control (PCC)** and enterprise data migration use cases.
- Defined business scenarios, acceptance criteria, and validation checkpoints to support test planning and execution phases; ensured full alignment between business objectives and QA strategies.
- Collaborated with QA teams and developers to **analyze reported defects**, assess business impact, and drive resolution prioritization through tools like **HP-ALM** and **JIRA**.
- Reviewed and approved solution outlines and test plans, ensuring validation efforts reflected real-world business workflows and customer expectations.
- Supported UAT by working with business SMEs to **design test cases**, coordinate execution, and validate outcomes; led defect triage meetings to ensure critical issues were addressed ahead of go-live.
- Interfaced between technical teams and business stakeholders to translate **functional requirements into system behaviors**, ensuring complete coverage of edge cases and high-risk business flows.
- Facilitated risk-based testing decisions, advising QA teams on regression scope and exploratory testing priorities based on process changes and user impacts.
- Provided **data validation oversight** for migration efforts, ensuring source-target integrity, mapping accuracy, and end-to-end traceability during CRM system cutover.
- Identified recurring pain points in test coverage and business logic during validation cycles, driving process improvements that led to measurable reductions in defect leakage and post-production incidents.
- Authored requirement traceability matrices (RTMs), business flow diagrams, and feedback documentation to support audit trails and compliance standards.
- Delivered business impact analysis for defects and test results, informing release go/no-go decisions with data-driven insights that improved user adoption and satisfaction post-implementation.

Software Test Analyst

April 2014 – July 2017

Lericon Informatics – Gujarat, India

Lericon, is a non-government organization, it provides CRM and ERP solutions, It provides custom hospitality and healthcare systems and services, consulting work for more than 25 companies in last 7 years around the world

Projects: Hotel management CRM, Healthcare SaaS

- Conducted comprehensive testing phases, including **System Integration Testing (SIT)**, **User Acceptance Testing (UAT)**, and **Automated Regression Testing**, ensuring high-quality deliverables for **hospitality** and **healthcare SaaS platforms**.
- Performed extensive tests across **functional**, **integration**, **compatibility**, **cross-platform**, and **mobile responsiveness** on **Android** and **iOS platforms**.
- Designed and executed **performance testing** and **database validation**, ensuring optimal system stability and responsiveness.
- Applied Agile methodologies, particularly **Scrum**, to improve testing efficiency and team collaboration.

- Actively participated in **backlog grooming**, **story pointing** using planning poker, and translating complex client requirements into actionable **User Stories**, **BRDs (Business Requirement Documents)**, and **SRS (System Requirement Specifications)**.
- Created detailed **test plans**, scripts, and defect reports using tools like **HP QC**, ensuring effective test execution and real-time status updates.
- Facilitated requirement exploration sessions using various techniques such as **interviews**, **questionnaires**, **document analysis**, **focus groups**, and engaging demo presentations.
- Contributed to the development of best practices for testing CRM and ERP solutions, enhancing the quality and reliability of delivered systems.
- Identified bottlenecks and recommended process improvements, resulting in improved operational efficiency for clients in hospitality and healthcare sectors.

EDUCATION

Northern college - Toronto, ON

2017- 2018

PGDM, Information System Business Analysis

Ganpat University - Gujarat, India

2011 - 2014

Bachelor of Technology, Information Technology

Gujarat Technological University – Gujarat, India

2008 - 2011

Diploma of Technology, Information technology

SPECIAL CERTIFICATIONS AND MEMBERSHIP

ISTQB: Certified, CTFL-144061

PMP: In progress, PMI ID: 8157601, Complete course requisite

ITIL Foundation Certification & CompTIA A+ (In Progress)

IEEE Member: Frequently attended and participated in workshops, webinars, and competitions.
