

DHEERAJ RAGALA

+1 (682) 344-6882 | dheerajragala7@gmail.com | [LinkedIn](#) | [LeetCode](#)

Data Scientist and Analyst with over 3.5 years of experience across Banking, Health, and Retail sectors. Proficient in developing APIs and managing MySQL and PostgreSQL databases with a strong understanding of Python programming, AWS, SQL, Flask, Visualization tools, and data science libraries.

EXPERIENCE

Data Scientist (Kohl's | USA)

June 2024 – Present

- Improved customer churn prediction and sales forecasting models by 15% through regular drift analysis and retraining.
- Boosted customer satisfaction by 20% using a BERT-based sentiment analysis model to address negative feedback trends.
- Developed efficient ML workflows utilizing Docker containers, deployed on AWS ECS; reduced the average model update cycle by 25%, resulting in quicker deployment of predictive analytics tools across departments.
- Enhanced AI application functionality by fine-tuning advanced LLMs, including GPT, Mistral, Claude, Llama, and Gemini, within a CI framework.

Senior Data Analyst (Cerner Corporation | India)

August 2021 - January 2023

- Implemented a comprehensive predictive health analytics solution utilizing Azure technologies to process over 5 million patient records, increasing data efficiency by 30%, while expediting data processes through PySpark.
- Boosted customer retention by 20% through detailed Exploratory Data Analysis (EDA) using Python, R, and Excel. Created interactive Tableau dashboards that optimized patient outcomes by 10%.
- Led data analytics projects using Python, BigQuery, and visualization tools, increasing modeling accuracy by 25%, and streamlined delivery with CI/CD pipelines in Azure DevOps and Apache Airflow.

Data Analyst (ABN AMRO BANK | India)

January 2020 - July 2021

- Conducted in-depth Exploratory Data Analysis on customer datasets using Python, and R, which led to strategic decisions improving customer retention metrics by 30% within three months.
- Developed efficient ETL workflows for seamless CRM integration, cutting data flow errors from 20% to under 5%, improving marketing metrics.
- Managed SQL databases by developing precise SQL queries and stored procedures, ensuring data accuracy by 99%.
- Automated data processing with Python scripts for monthly files, ensuring data loading with less than 0.1% downtime and exceeding SLA expectations.

EDUCATION

Master in Computer Science (University of Central Missouri | Lees Summit, MO)

January 2023 - May 2024

Advanced Data Structures, Operating System, Automated Learning & Data Analysis, Algorithms for Data Guided Business Intelligence, Internet Protocols, Linux Networking, Machine Learning, Advanced Database System

TECHNICAL SKILLS

Programming Languages: Python, R, Scala, Java, Linux, SQL, HTML, CSS, JavaScript, C/C++

Cloud/ Visualizations: Azure, Docker, AWS, Kubernetes, Tableau, Power BI, MS Excel, Looker, Terraform

Database/ Tools: Git, GitHub, JIRA, MySQL, PostgreSQL, MongoDB, SQL Server, SAS

Libraries/ Frameworks: NumPy, Pandas, Flask, PySpark, NLTK, Rest API, FastAPI, spacy, langchain

Others: Data Structures and Algorithms, Statistics, Probability, System Design, CI/CD, Machine Learning, NLP, Deep Learning

PROJECTS

T20 World Cup Data Analysis (University of Central Missouri | January 2024 - April 2024)

JavaScript | Python | Power BI

- Designed JavaScript scripts for web scraping player stats from ESPN Cricinfo and used Python Pandas for data cleaning.
- Established an interactive cricket performance dashboard using Power BI to help coaches analyze strengths and weaknesses of 100+ athletes, replacing anecdotal feedback with data-driven insights.

Car Rental Website (University of Central Missouri | June 2023 - August 2023)

Python | Flask | MongoDB | API

- Built a car rental website using Flask and MongoDB, utilizing a microservices architecture.
- Implemented user authentication, RESTful APIs for vehicle and booking management, and a responsive front-end for seamless customer interaction.

Loan Document Automation System (University of Central Missouri | February 2023 - April 2023)

Python | NLP | ML

- Enhanced loan agreement workflows by integrating deep learning techniques (Transformers) to summarize and extract critical details from documents, achieving a 90% reduction in manual review time.
- Created an intuitive UI, cutting document search times for end-users by 40%.

Crypto Market Sentiment Analysis (GVPCOE | March 2020 - July 2020)

Python | NLP

- Engineered a web application to classify Twitter tweets by performing sentiment analysis using a supervised learning classification algorithm (Naive Bayes) and web framework Flask with an accuracy of 90%.
- Extracted 10k sentimental tweet data containing words like kill, die, and suicide from Twitter using TWINT API.

ACHEIVEMENTS/ CERTIFICATIONS

- Secured 1223rd place out of over 200,000 competitors in the competition hosted by TCS (All India).
- Microsoft Certified Azure Data Fundamentals (DP-900).
- Google Data Analytics Certification.
