Education

Saint Peter's University Dec2023
MS in Business Analytics

- **Coursework:** Machine Learning, Deep Learning, Image Processing, Data Mining, Computer Vision, Natural Language processing, Data Mining, Applied Statistics, Data analytics with R, Bigdata, Database Management System, Data Structure and Algorithms

Experience

Business Analyst Pennsylvania, U.S.A
USG1 - The United Solutions Group Inc. Sep2024 - Present

- Collaborated with cross-functional teams to gather and analyze business requirements, leading to the development of data-driven solutions for clients, improving decision-making processes by 30%.
- Using Python, SQL, and R for data manipulation and analysis, resulting in a 25% reduction in processing time for large data sets.
- Developed dynamic reports and dashboards using Tableau, increasing the accessibility of KPIs, resulting in a 40% improvement in the efficiency of client reporting.
- Spearheaded the design and optimization of automated data pipelines, reducing data processing time by 40% and improving overall system performance.
- Delivered regular presentations to senior stakeholders, translating complex data insights into actionable strategies, resulting in a 20% increase in decision making speed between departments.

Research Assistant Intern New Jersey, U.S.A
Saint Peter's University Aug 2022 - Nov 2022

- Developed dynamic Tableau dashboards for New Jersey traffic, leading to actionable insights that reduced traffic congestion by 15%.
- Automated data extraction and processing from legacy systems using SQL and Perl, reducing manual processing time by 50%.
- Actively participated in Agile sprints, contributing to project delivery on time and under budget. Improved team productivity by 15% through efficient task allocation and priority of tasks.

Projects

HANDWRITTEN TEXT RECOGNITION USING DEEP LEARNING Aug 2023-Nov 2023

- Developed a deep learning-based handwritten text recognition system using TensorFlow, achieving a 98% recognition accuracy.
- Tools Used: C++, Algorithm, Code Implementation, CNN architecture

INFLATION ANALYSIS PROJECT Aug 2022- Nov 2022

- Cleaned and aggregated data from 10+ sources, visualizing inflation trends over the last decade in Tableau, contributing to a 20% improvement in economic forecast accuracy.
- Analyzed 100M+ rows of customer data, generating insights that increased retention by 15%.
- Technologies used: sci-kit learn, Python and Tableau.

Skills

Languages: Java, Python, C/C++, SQL (Postgres), JavaScript, HTML/CSS, R, C#, Swift, XML, Perl
Frameworks: Angular, Vue.js, React, Node.js, Flask, JUnit, Django, Angular, Spring Boot, Express.js, Bootstrap, .NET
Developer Tools: Git, Docker, Jira, Web Sockets, Eclipse, Excel, Postman, Maven, Gradle, PowerBI, MongoDB
Technologies: Linux, SaaS, NLP, Agile, Azure, Spark, CI/CD, CMS, IoT, Kafka, DynamoDB, NoSQL, WebSphere
Libraries: Pandas, DICOM, Matplotlib, Tensorflow, PyTorch, Keras, MoviePy, OpenAI Whisper, Scikit-learn, Seaborn
