

Dhrumil Buch

Data Analyst

San Jose, CA | buch.dhrumil99@gmail.com | +1 (669) 317-6833 | [LinkedIn](#)

SUMMARY

Data Analyst with 4+ years of experience leveraging data to drive business insights, improve operational efficiency, and support strategic decision-making. Proven expertise in SQL, Python, data visualization, and statistical analysis across healthcare and SaaS industries. Adept at working with large datasets, automating reporting pipelines, and collaborating with cross-functional teams in Agile environments. Demonstrated ability to deliver actionable insights that support cost reduction, process improvement, and customer satisfaction.

SKILLS

Data Analysis & Tools: Advanced SQL (Joins, CTEs, Window Functions, Stored Procedures, Query Optimization), Excel (Pivot Tables, VLOOKUP, VBA, Power Query), Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), R, Jupyter

BI & Visualization: Tableau (LOD Expressions, Parameters, Data Blending, Calculated Fields), Power BI (DAX, Power Query, Row-Level Security, Drillthrough, KPIs), Looker, Tableau Server

Data Management & Databases: PostgreSQL, MySQL, Snowflake, Google BigQuery, MongoDB, Data Warehousing, Data Quality Audits

Machine Learning & Advanced Analytics: Regression (Linear, Logistic), Gradient Boosting (XGBoost, LightGBM), Clustering (K-Means, DBSCAN), Anomaly Detection (Isolation Forest), Forecasting (ARIMA, Prophet), Retrieval-Augmented Generation (RAG), Classification Models, Cross-Validation, Feature Engineering

Data Engineering & ETL: ETL Automation (Python, Airflow, dbt), Data Cleaning & Transformation, Batch & Real-time Pipelines

Cloud Platforms: AWS (S3, RDS, Redshift, Glue, Athena), GCP (BigQuery, Cloud Storage), Azure Data Factory

Statistical Methods & Reporting: A/B Testing, Hypothesis Testing, Trend Analysis, KPI Dashboards, Risk Scoring

Project Methodologies & Tools: Agile/Scrum, JIRA, Confluence, Git/GitHub, CI/CD for Analytics Pipelines

EXPERIENCE

Molina Healthcare, USA | Data Analyst

Oct 2024 - Current

- Automated ETL pipelines with **Python, SQL** and **Airflow**, processing **5M+** healthcare claims and **EHR** records daily while ensuring **HIPAA** compliance and audit readiness.
- Developed advanced SQL queries (**CTEs, window functions, stored procedures**) to optimize cost analysis and utilization reporting, reducing query runtimes by **45%**.
- Applied machine learning models to analyze provider performance, detect anomalies in claims, and improve risk scoring accuracy.
- Conducted predictive modeling and forecasting for patient utilization trends using Python (**Prophet** and **ARIMA**), supporting care management and cost optimization strategies.
- Designed **Power BI** reports (**DAX, Power Query, drillthrough, KPI cards**) to evaluate provider performance and risk segmentation for clinical and finance teams.
- Automated the refresh and governance of enterprise Power BI dashboards, integrating row-level security, scheduled **dataflows** and usage monitoring to ensure HIPAA compliance and consistent insights across stakeholders.
- Collaborated with compliance, clinical and actuarial teams in an **Agile** environment to deliver HIPAA-compliant, data-driven solutions that improved care outcomes and reduced claims fraud.

Druva Software, India | Data Analyst

May 2020 - July 2023

- Developed and optimized advanced SQL queries (joins, CTEs, aggregations, window functions) to support business-critical dashboards, cutting report runtime by **50%**.
- Built automated **Excel** and **Power BI** reports with **VBA macros, Pivot Tables, DAX measures** and **Power Query**, enabling **15%** improvement in churn prevention and retention strategies.
- Partnered with product and marketing teams to design KPIs and conduct **A/B tests**, applying **statistical analysis** to measure feature adoption and optimize pricing strategies.
- Created Python-based **ETL pipelines** for customer usage and support ticket data, cleaning and transforming millions of records for analytics and model development.
- Applied clustering models (**K-Means, DBSCAN**) and classification algorithms to segment customers, improving targeting strategies and informing product roadmap decisions.
- Conducted anomaly detection with Isolation Forest on customer behavior datasets, reducing resolution delays by identifying root causes of **20%** of support escalations.
- Designed **Tableau** dashboards (data blending, calculated fields, parameterized views) to track customer satisfaction, product adoption, and retention KPIs, reducing manual reporting by **40%**.
- Supported ad hoc executive analyses on market expansion, churn prediction, and revenue optimization using statistical modeling and SQL.

EDUCATION

Masters in Big Data Analytics, San Diego State University, San Diego, CA

(GPA: 3.8/4.0)
