Academic Details

Nov 2015 – May 2017	Master of Science in CS, Bellevue University	GPA: 3.6/4.0
July 2010 - June 2014	Bachelor of Technology in CS, JNTU	GPA: 3.0/4.0

Technical Skills

- Java, SOAPUI, Cucumber, Rest Assured, Junit, Fitnesse, Selenium Grid, Selenium IDE, Selenium RC, Hibernate, Microsoft SQL Server, SQL, MySQL, Git, TestNG, JIRA, REST, Hybrid, Appium.
- HTML, CSS, XML, Agile, waterfall, Bamboo, Jenkins, Maven, Eclipse, Net Beans, IntelliJ

Work Experience

August 2017 – Till date Automation Engineer at Enquero

Responsibilities

- Drafted Test Plan which included testing objectives, testing phases, scenarios and test environment after a thorough analysis of the business rules.
- Setup and configured the testing environment and automated test cases with **Eclipse, TestNG, Selenium WebDriver** and **Java**.
- Configured **Jenkins** as a Continuous Integration server with **GitHub** and **Maven**.
- Extensively used **TestNG** Listener to generate automatic response on Test failure, Skip, and Success.
- Performed GUI, Functional and Regression testing and smoke Testing by automated using **Selenium** and **Jenkins**.
- Created automation scripts in **SOAP UI** using Groovy Script for web services testing and validate the **SOAP** request response against the database.
- Involved in Mobile testing by developing and executing test scripts for both **Android** and **iOS** platforms using **Appium** and **Java**.
- Successfully tested web services both **REST** and **SOAP** services using **Rest Assured** Framework and **SOAP UI**.
- Involved in developing automation framework for Acceptance Testing using **Cucumber BDD, JUnit** and **Fitnesse** Automation.
- Strongly experienced in writing unique **XPath** using **firebug** and **firepath** to identify web elements.
- Performed Backend Testing of the application by writing **SQL** queries.
- Participated in Agile software testing process with regular QA meetings to discuss various functionalities of applications, test cases to write and execute.

August 2014 to November 2015 Automation Tester at IT Convergence, India

Responsibilities:

- Followed **Agile** testing methodology, participated in daily **SCRUM** meetings and tested each **SPRINT** deliverables.
- Used **Page Object Model** to Automate Functional and Regression Testing by creating **Hybrid** Framework using **Maven, Java, TestNG** and **Selenium WebDriver**.
- Involved in various testing activities like **GUI testing, functional testing, Performance testing**.
- Used **SeleniumGrid** for cross platform and **cross browser testing** by running the Test Scripts on various virtual
- Wrote and executed Test Cases for User Stories and Logged Defects for test failures using **Jira**.
- Performed compatibility testing of applications for dynamic and static content of browsers using **element locators** in **Selenium**.
- Executed manual and automated application testing for key product functionalities and developing new test plans using **Selenium**.
- Performed Back-End/Database testing by writing complex **SQL** queries.
- Prepared user documentation with screenshots for **UAT** (User Acceptance Testing).
- Interaction with business analysts and developers to resolve the technical issues to meet the client's requirement for a better-quality software product.

January 2014 to May 2014 Automation Tester at Redberry Technologies, India

Responsibilities:

- Performed **Unit Testing, Integration and System Testing**.
- Identified the Test Cases and documented them in **Quality Center**.
- Experienced in **OATS Testing** on web applications.
- Reporting and tracking of bugs using **Quality center** tool.
- Experience in **Load Testing, Functional Testing** and **manual Testing**.
- Responsible to conduct **Smoke Test** and **Regression Test** in different Environments.
- Experience on **Oracle Data Base**

Course Work

- Cloud Computing
- Software Development
- Software Testing
- Networking
- Computer Forensics
- Information Technology Project Mgmt
- Storage Systems
- IT Strategy and Policy.
- Mobile Application Development

Academic and other Projects

Web Project based on Python Flask Created a simple web application project to demonstrate the working of an online mart, using python flask and postgres database. Flask processes the input item details and stores them in Postgres along with data related to customers and employees.

Sentiment analysis in python Created sentiment analysis program in python using textblob to determine if the sentence in question has a negative connotation or a positive connotation based on the analysis score of the said sentences. Also included option to open a stream to twitter and search based on a keyword, use the tweets based on the said keyword to determine if the keyword has a positive or a negative view in twitter.

Web Project Developed a web application where users can opt for new SIM cards for their mobiles. Whenever user loses their SIM or if they want a new SIM card, they can get it by registering on the website

Android Application Developed Android applications, i.e, Food Express, this application will help to order the Food through Online while you are travelling through the Train only.
