

Dhruvangi Shah

8566884039 | dhruvangi1319@gmail.com | Bordentown, NJ

Summary

Motivated professional with 4+ years experience as a software engineer specializing in Object-Oriented Programming, Python, and Embedded device verification testing. Extensive expertise in EV charging domain, proficient in all phases of Software Development Life Cycle. Skilled in project audits, quality maintenance, and electric car charger design, implementation, testing, delivery, deployment, and maintenance across generations.

Experience

Capgemini - Toyota | Bordentown, NJ

Senior Test Analyst | 03/2024 - 08/2024

- Create new test cases for trucks and automate them using python.
- Develop test automation UI automation test environment for a web based truck systems.
- Log an resolve bugs using various Azure Devops.
- Handling pipeline automation getting executed on Azure Devops.
- Operating System: Windows
- Technical Environment: Python 3, Git, Azure Devops

Capgemini | Bordentown, NJ

Senior Test Analyst | 10/2022 - 02/2024

- Create new test cases for farming automobile system like Tractor and automate them using python.
- Develop test automation UI automation test environment for a CAN based automobile farming systems like Tractors and Sprayers.
- Log an resolve bugs using various platforms like Polarion, Jenkins, JIRA and Git.
- Handling Smoke and Sanity automation tests for Tractor Builds.
- Operating System: Windows
- Technical Environment: Python 3, Gerrit, JIRA, Polarion, Canalyzer, Jenkins, Pycharm, Miniconda & Anaconda, Beyond Compare, UI Automater

Infochips - An Arrow Company | Ahmedabad, Gujarat

Embedded Software Developer | 01/2018 - 10/2021

- Company Overview: Electric Vehicle Supply Equipment (Electric Car Chargers) development
- Worked on the test automation framework using Pytest for DVT (Device Verification Testing) using shell scripts and python.
- Worked on open source OCPP (Open Charge Point Protocol) server fixes and enhancements for functional testing of EV charger.
- Used selenium and Appium for test automation of the web applications and phone application.
- Worked with the controller BSP firmware development of electric car charger for various features like Modbus, UART communication, metering, data transfer to/from cloud, fast charging, voltage drop out, RTC, etc.
- Involved in the production deployment process with other lead engineers.
- Worked with product managers to create design plans and provide estimations to add continuous integration support to every release.
- Knowledge of J1772 state transitions for AC EVSE (Electric Vehicle Supply equipment).
- Electric Vehicle Supply Equipment (Electric Car Chargers) development
- Operating Systems: Windows and Unix
- Technical Environment: Python, Java, MySQL, STM32 Controller BSP, C and C++, Pycharm, Atollic True Studio, STM32CubeIDE, IntelliJ, Eclipse, Oracle SQL Developer, VMWare, Vim, Jenkins, TortoiseSVN, GIT, Super Putty, and MongoDB, Pytest, Pandas, Django, Selenium, Appium, and Maven

Skills

Project Management, Strategic/Tactical Planning, Business Analysis and Development, Excellent Communication and Interpretation skills, Scrum framework, Automated testing, Continuous integration, Defect tracking, Python, Java, MySQL, STM32 Controller BSP, C, C++, Azure Devops, Pycharm, Atollic True Studio, STM32CubeIDE, IntelliJ, Eclipse, Oracle SQL

Developer, VMWare, Vim, TortoiseSVN, Jenkins, GIT, Super Putty, MongoDB, Pytest, Pandas, Django, Selenium, Appium, Maven

Education

Charusat University | Gujarat, India

Bachelors in Computer Engineering | 06/2018

VPMP, Gujarati Technological University | Gujarat, India

Associate in Computer Engineering | 06/2015
