

SUMMARY

Software Engineer with 4+ years of experience designing and developing Python-based solutions, including AI/ML models, microservices, and cloud-deployed applications. Skilled in data analysis, NLP, deep learning, and system integration, with expertise in Python frameworks, RESTful APIs, CI/CD pipelines, and cloud platforms such as AWS and Google Cloud.

SKILLS

Programming: Python, Java, JavaScript, C/C++, Object-Oriented Programming (OOP), RESTful APIs, Microservices
Machine Learning & AI: Supervised & Unsupervised Learning, Deep Learning (CNNs, RNNs, LSTMs, Transformers), NLP (Text Classification, Sentiment Analysis), Recommendation Systems, Time-Series Forecasting, Generative AI (LLMs, Prompt Engineering, RAG)
Data Science & Analytics: Tableau, Power BI, Vector Search, Deep Learning, Llama, Gen AI, Large Language Models, OAC
Frameworks & Libraries: TensorFlow, PyTorch, Scikit-learn, Keras, Hugging Face Transformers, Pandas, NumPy, Matplotlib, Seaborn, OpenCV, Statsmodels, NodeJS, React
Cloud Platforms & Services: Amazon Web Services (AWS), Google Cloud (BigQuery, Vertex AI), Docker, Kubernetes, Terraform
Databases & Storage: MySQL, PostgreSQL, MongoDB, DynamoDB, Snowflake, Cassandra
DevOps & CI/CD: Git, GitHub/GitLab, Jenkins, CircleCI, CI/CD Pipelines, Agile & Scrum Methodologies, Jira
APIs & Integrations: FastAPI, Flask, Django, GraphQL, gRPC, WebSockets, Third-Party API Integration
Other Skills: Software Design Patterns, System Design, Distributed Systems, Unit Testing (PyTest, unittest), Debugging & Profiling, Security Best Practices

WORK EXPERIENCE

Wells Fargo

California, USA

Software Engineer

Jan 2024 – Present

- Collaborated with credit risk teams to **design Python microservices** that automated underwriting rules, reducing manual credit reviews by **30%** and standardizing decision workflows
- Developed **machine learning models** with **Scikit-learn and TensorFlow** to assess borrower risk, improving credit scoring accuracy by **12%** over the legacy system.
- Optimized data storage and model execution on **Google Cloud (BigQuery & Cloud Storage)**, improving data accessibility and reducing query runtime by **40%** for credit risk analysis.
- Delivered model insights via **FastAPI-based REST APIs**, integrating with 4 enterprise lending systems for consistent risk evaluation.
- Automated deployments through **Jenkins and Kubernetes**, embedding **PyTest** and monitoring tools to reduce failures by **40%** and enable bi-weekly releases.

Accenture

India

Software Engineer

Jan 2020 – Dec 2022

- Designed chatbot** workflows and **NLU models** for order tracking, returns, and product inquiries by analyzing functional requirements, improving customer self-service and reducing agent dependency by **40%**
- Developed and trained **intent classification** and **entity recognition models** using **Python, spaCy, Hugging Face Transformers**, increasing response accuracy from **72% to 91%**.
- Built backend services with **FastAPI** to integrate the **chatbot with CRM** and order management systems, enabling real-time personalized responses and reducing ticket creation by 30%.
- Deployed microservices with **Docker and Kubernetes**, ensuring **99.9% uptime** and supporting **50,000+ daily users**.
- Automated builds, testing, and deployments via **Jenkins**, shortening release cycles by 35% while maintaining production stability.
- Monitored and optimized performance using **Prometheus and Kibana**, improving response times by **25%**.

PROJECTS

Truck Fuel Consumption Analysis and Simulation | Python, Scikit-learn, Matplotlib, Seaborn, Simulation Modeling

- Conducted a detailed analysis and simulation of truck fuel consumption using hydrogen cell technology, improving efficiency by 15%. Developed predictive ML models with $\pm 2.8\%$ accuracy and visualized results to reduce analysis time by 30%.

Pollution and Emissions Analysis from Trucks | Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

- Analyzed emissions data from 500+ trucks to identify factors impacting pollution, developed a simulation model reducing emissions by 12%, and visualized trends using Matplotlib and Seaborn, improving stakeholder understanding by 20%.

EDUCATION

Master of Science Computer Science

California State University, Long Beach

GPA: 3.7/4

California, USA

Bachelor of Technology in Computer Science and Engineering

SRM Institute of Science and Technology

GPA: 8.25/10

Chennai, India

CERTIFICATIONS

Google Cloud Fundamentals: Core Infrastructure | **Building Web Applications using PHP** | **Python Data Structures**
