

DILEEP MALOTHU
Financial Data Analyst
malothudileep024@gmail.com
Phone: +1 (989) 378-4627

SUMMARY:

- Strategic financial and data analyst professional with more than 5 years of success in financial reporting, analysis, budgeting, forecasting, and project management with an MBA degree. Financial and data analyst who has experience working with the most current technologies (Tableau, POWER BI, Cognos, TM1, Sharepoint, Salesforce, Excel).
- Expert in generating on-demand and scheduled reports for business analysis or management decision using Tableau and POWER BI. Periodic reporting is done on a daily, weekly, monthly and quarterly basis.
- Strong analytical skills; support operations through analysis of key performance indicators and trends.
- Created various types of charts such as Heat Maps, Geocoding, Symbol Maps, Pie Charts, Bar Charts, Tree Maps, Ganttts, Circle Views, Line Charts, Area Charts, Scatter Plots, Bullet Graphs and Histograms in Table Desktop, Power BI and Excel to provide better data visualization.
- Solid knowledge of Power BI and Tableau Desktop report performance optimization.
- Created Excel reports, Dashboards & Performing Data validation activity using VLOOKUP, HLOOKUP, Macros, formulas, index match, Slicer with (Pivot table, Get Pivot Data, Dashboards), Power View, Power Map and Heat Map.
- Expert on maintaining and managing Microsoft Power BI and Tableau reports, dashboards and publishing to the end users for Executive level Business Decision.
- Experienced in managing users, groups, sites, permissions and roles on Tableau server.
- Thrives in high-pressure environments, budget forecasting, management and strong team player skills.

TECHNICAL SKILLS:

- **Programming Languages:** Python, R, SQL, SAS
- **Data Visualization Tools:** Power BI, Tableau, Looker, Qlik Sense, Power Automate, Excel (PivotTables, VLOOKUP), SSRS
- **Databases:** SQL Server, PostgreSQL, MySQL, MongoDB, Snowflake, Oracle
- **Cloud Platforms:** AWS (S3, Lambda, EC2, Redshift, Glue), Azure (Data Factory, Databricks, Synapse Analytics), GCP (BigQuery, Cloud Functions)
- **Libraries & Frameworks:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, Keras, PySpark, StatsModels
- **Concepts & Techniques:** Machine Learning, Time-Series Forecasting, Natural Language Processing (NLP), Predictive Modeling, A/B Testing, Data Mining, Feature Engineering, Statistical Analysis
- **ETL & Data Engineering:** Talend, Alteryx, Informatica, Apache Spark, Hadoop, Kafka
- **Other Tools & Platforms:** Git, GitHub, Jupyter Notebook, VS Code, SDLC, Agile, Jira, Confluence, MS Access
- **Additional Skills:** Data Warehousing, Data Governance, Business Intelligence, KPI Dashboarding, API Integration, Report Automation

EDUCATION:

- Master of Science in Business Analytics | Northwood University, Midland, MI- 2024

CERTIFICATIONS:

- Tableau Desktop Specialist | SAS Visual Analytics (Viya)
- SAP Analytics Cloud & Datasphere | SAS Curiosity Cup 2024 | LinkedIn ML & Python Series
- Time Series Forecasting with GPT-4 | A/B Testing and Logistic Regression with Python

Research Publications / Technical Papers:

Bias-Free AI Model for Hiring using Explainable Machine Learning

Published in: IEEE AIRC 2025 (Artificial Intelligence Research Conference)

Description: Designed an end-to-end ML pipeline to predict hiring outcomes with a focus on ethical AI. Used SHAP and LIME to explain model predictions and bias detection metrics to ensure fairness in recruitment systems. Achieved 95% accuracy and reduced algorithmic bias in decision-making.

Tools/Tech: Python, Scikit-learn, SHAP, LIME, Git, Jupyter, A/B Testing, Agile

Visual Analytics Dashboard for Transparent Recruitment Decisions

Presented at: IBAC 2025 (International Business Analytics Conference)

Description: Developed an interactive Power BI dashboard linked with an ML model for real-time decision support in recruitment. Enabled HR teams to visualize predictions, fairness indicators, and model explanations using data storytelling principles.

Tools/Tech: Power BI, Python, SQL, SHAP, HR datasets, GitHub, Power Automate, Figma

PROFESSIONAL EXPERIENCE:

USAA, San Antonio, TX
Financial Data Analyst

Mar 2024 – Present

Responsibilities:

- Created various business and ad hoc reports using **Tableau** and **Power BI Desktop** based on business requirements.
- Prepared financial deliverables including **quarterly, accrual, and budgetary reports** for funding agencies.
- Designed **dashboards and visualizations** for business performance monitoring, management, and analysis.
- Built **scorecards, pivot tables, views, and charts** to support detailed data analysis.
- Defined and communicated **project scope, milestones, deliverables, and requirements** with clients.
- Generated and distributed **sales performance reports** from Salesforce CRM for weekly and monthly business meetings.
- Developed **interactive dashboards** using multiple chart types (cross-tabs, heat maps, geo maps, tree maps, pie/bar/line/area charts, scatter plots, bullet graphs, histograms).
- Connected Tableau and Power BI to multiple data sources including **MS SQL Server, Oracle, Excel, and CSV files**.
- Implemented advanced features such as **data blending, relationships, filters, parameters, hierarchies, calculated fields, groupings, live connections, and in-memory analysis**.
- Interacted with **business stakeholders** to gather requirements and manage report/dashboard delivery.
- Prepared and submitted **Federal Financial Report SF 425** for federal grants.
- Built vendor relationships and measured **supplier performance** based on cost, quality, and service-level metrics.
- Conducted **cost and pricing analysis** to support competitive sourcing, procurement, and performance reporting.
- Utilized **IBM TM1** to update Excel spreadsheets for monthly costs and revenues using **Cognos and Costpoint**.
- Led **pricing meetings** with project managers to determine budgets, incentives, revenue sharing, and profit margins.
- Reported **quarterly forecasts and revenue** to divisional directors for all managed projects.

Environment: Python, SQL, Power BI, Tableau, Azure Data Factory, Databricks, Scikit-learn, CatBoost, XGBoost, SHAP, LIME, Git, Jupyter Notebook, A/B Testing, Agile.

Astrolite Tech Solutions (HDFC), Hyderabad, India
Data Analyst

Jun 2020 – Dec 2023

Responsibilities:

- Gathered and analyzed **large financial datasets** using **SQL, Excel, and BI tools (Tableau, Power BI)** to identify market trends, customer behavior, and competitive insights for strategic decision-making.
- Conducted **quantitative financial analysis** to forecast revenue, predict future trends, and perform **risk assessments** on capital expenditures, acquisitions, and joint ventures.

- Compiled, cleaned, and validated complex financial data, ensuring accuracy and building **dashboards/visualizations** to monitor multimillion-dollar accounts and business unit performance.
- Designed and developed **interactive financial dashboards** (KPI tracking, variance analysis, cash flow insights) to guide investment strategies and management reporting.
- Applied **data-driven sales analytics** to identify upselling opportunities and improve client acquisition for additional banking services.
- Built and automated **financial models and reports** (Cash Flow Analysis, Variance Analysis, Debt-to-Equity Ratios) integrating Excel, SQL queries, and BI dashboards.
- Partnered with stakeholders to provide **actionable insights through data visualization, trend analysis, and predictive analytics**, improving operational efficiency and client satisfaction..

Environment: Python, SQL, Power BI, AWS (S3, Lambda), Azure Databricks, Spark, XGBoost, SARIMA, Matplotlib, Power Automate, CI/CD, Agile, Jupyter Notebook.

Project Highlights:

- Predictive Hiring Model using ML: Designed end-to-end ML pipeline using CatBoost/XGBoost; achieved 95% accuracy and reduced bias using SHAP & LIME.
- Inventory Forecasting System: Developed hybrid SARIMA-ML forecasting engine to improve stock efficiency by 20%.
