

DILEEP REDDY SURAM

Data Engineer

Saint Peters, MO • suramdileepreddy@gmail.com • [LinkedIn](#) • [GitHub](#) • 469 (938)-4754

SUMMARY

Data Engineer with 3 years of experience in optimizing data pipelines and enhancing delivery systems, leveraging skills in Python, Kubernetes, and AWS services. Demonstrated expertise in designing scalable solutions and automating processes, resulting in significant efficiency gains and cost savings. Passionate about fostering a data-driven culture and eager to drive innovation in large-scale data processing environments.

TECHNICAL SKILLS

Python, R, SQL, Pandas, NumPy, TensorFlow, Docker, Fast API, OLTP/OLAP, CI/CD, Tableau, Power BI, Matplotlib, Git, PL/PGSQL, T-SQL, PL/SQL, Scala, Perl, Microsoft Word, Microsoft Teams, Zoom, SharePoint, Microsoft Excel, Microsoft PowerPoint, JIRA, Airflow, Spark, Kubernetes/EKS, Microsoft Office Suite, Oracle, Snowflake, Microsoft SQL server, Talend, SSIS (SQL Server Integration Services), PostgreSQL, UNIX, Shell Scripts, AWS – Glue, S3, Lambda, RDS, RedShift, IAM, Athena, Azure – Azure Data Factory, Azure Data Lake.

EXPERIENCE

Data Engineer, Solutran, MN

June 2024 – Present

- Designed end-to-end **data pipelines** for large-scale processing. Created complex **stored procedures**, automating tasks and implementing reusable logic for reporting.
- Optimized data pipelines, slashing latency and bolstering delivery systems. **Automated processes**, drastically reducing manual intervention and boosting efficiency by **40%**.
- Partnered with **cross-functional teams** to align data pipelines with organizational needs. Gathered requirements and streamlined **ETL workflows** for improved performance to reduce latency by **25%**.
- Developed compliance **reporting system**, monitoring benefits spending. Achieved substantial **cost savings** by **30%** and minimized **compliance-related** penalties.
- Analyzed and optimized critical business applications. Ensured **data integrity** and **accuracy** throughout pipeline development and implementation processes.

Data Engineer, Cigna, MO

June 2023 – May 2024

- Engineered robust **data pipelines** using **AWS** services, enhancing **ETL** processes for large datasets. Optimized performance through serverless architecture, yielding substantial efficiency gains of **30%**.
- Developed and maintained complex **stored procedures**, **automating data ingestion** and **transformation** in Amazon **RDS** and **Redshift**. Significantly reduced manual intervention, boosting operational efficiency.
- Partnered with stakeholders to implement reusable **SQL** logic, improving **data accuracy** and **consistency**. Efforts led to measurable reductions in manual **data handling** and enhanced decision-making processes by **40%**.
- Meticulously designed and implemented scalable **data solutions**, ensuring robust **data integrity** and accessibility. Efforts contributed to enhanced data-driven decision-making across the **organization**.

Business Data Analyst, The Times of India – India

August 2019 – September 2021

- Partnered with stakeholders to document **business requirements**, crafting comprehensive **Business Requirement Documents (BRDs)** and **Functional Requirement Documents (FRS)** that aligned technical teams for successful project delivery. Analyzed business processes using **Excel** and **SQL**, identifying inefficiencies and implementing solutions that boosted operational **efficiency** significantly by **15%**.
- Pioneered **data visualization** initiatives, creating impactful dashboards with **Power BI** and **Tableau** that revolutionized leadership's ability to track **KPIs**. Transformed **raw data** into strategic **assets**, empowering leadership with real-time operational metrics that drove measurable improvements in organizational performance.

PROJECTS

Hospital Data Management([Link](#)):

- Developed a hospital database management website using HTML, CSS, Node.js, and MongoDB, enabling patients to book, reschedule, or cancel appointments while allowing management to authorize and manage patient data efficiently.

Database Management ([Link](#)):

- Designed a database management system to collect student requirements via Google Forms, store data in phpMyAdmin, and analyze it to efficiently schedule and plan subjects for the academic year.

EDUCATION

Master of Science in Computer Information Systems Bradley University, Peoria, IL (GPA: 3.6/4.0) **Jan 2022 – May 2023**

Relevant Courses: Database Management Systems, Knowledge Discovery and Data Mining, Hospital Data Management, Advanced Programming.

B. Tech in Electrical and Electronic Engineering JNTUH, Hyderabad, India

Aug 2017 – May 2021

Relevant Courses: Computer Programming In C, Fundamentals of Management, Statistics.

CERTIFICATION

- [AWS Certified Solutions Architect](#)
- [Google Analytics Certified](#)
