Summary

Software engineer with 2+ years of experience building web applications, APIs, and database systems. At this stage of my career, I'm eager to take on new challenges, learn quickly, and work with any technology needed to get the job done. Skilled in multiple programming languages/frameworks, with a strong problem-solving mindset and the ability to adapt fast in changing environments.

Experience

Systems Performance Analyst

Jan 2024 – Present

CPI-NS Lab, University at Buffalo

- Built Python scripts to benchmark multi-node databases and analyze latency/throughput trends.
- Developed graph generators script to visualize performance data and support experiments.
- Helped optimize query performance with indexing, caching, and error-handling improvements.
- Contributed to distributed systems research, working with Go and C++ in a Linux environment.

Software Developer (IT & Web Systems)

Jan 2023 – Jun 2025

Office of International Education, University at Buffalo

- Maintained University's International Education CMS website using HTML, CSS, JavaScript, PHP, and SQL.
- Created a SQL database solution for tracking student applications, improving processing efficiency by 20%.
- Developed automated Python reporting scripts that simplified data extraction for administrative needs.
- Provided technical support to staff members for content management systems and database applications.

Teaching Assistant - Distributed Systems

Sep 2022 – Jan 2023

Department of Computer Science, University at Buffalo

- Led lab sessions covering fundamental concepts in distributed computing and system design.
- Designed Scala/Java assignments to help 50+ students grasp distributed algorithms.
- Reviewed student code and guided debugging using Linux VM and bash scripting.

Software Development Intern

May 2022 – Aug 2022

Kyros Infotech, India

- Developed REST APIs with Java Spring Boot and integrated with MySQL databases.
- Built responsive React.js front-end features with dynamic API integration.
- Supported CI/CD setup using Docker and GitHub Actions, enabling faster deployments.
- Participated in Agile sprints, code reviews, SDLC and testing with senior engineers.

Projects

Lost and Found Portal

🐙 GitHub • 🎨 Figma • 🌐 Deployed Website

- Build a SaaS-style web app from scratch for posting, searching, and managing lost items.
- Built a responsive React.js, XML frontend and PHP backend with MySQL integration..
- Implemented user authentication, image uploads, advanced search filters, and docker containerization.
- **Technologies:** React.js, PHP, MySQL, phpMyAdmin, Docker, GitHub, HTML5, CSS3

Machine Learning for River Forecasting

📄 Files

- Developed predictive ML models to forecast river levels using TensorFlow + Scikit-learn.
- Built a Flask dashboard to visualize predictions and historical trends.
- Automated weather API ingestion, storing and serving results from AWS S3.
- **Technologies:** Python, TensorFlow, Flask, REST APIs, Power BI, AWS S3

Distributed File Storage System

- Designed and implemented a distributed file storage system with data replication capabilities.
- Developed client-side application for interacting with the storage service.
- Implemented fault tolerance features to handle node failures without data loss.
- **Technologies:** Java, Spring Boot, REST API, Docker

E-Commerce Platform

- Developed a full-stack React + Redux frontend and Node.js + MongoDB backend.
- Implemented authentication, product search, cart, and order workflows.
- Integrated payment processing API and order confirmation system.
- **Technologies:** React, Redux, Node.js, Express, MongoDB, REST APIs

Education

University at Buffalo, SUNY

Aug 2021 – June 2025

Bachelor of Science in Computer Science, Minor in Data-Intensive Computing

Achievements: 3.5 GPA, Dean's List, International Merit Scholarship Awardee.

Courses: DSA, Operating Systems, Data-Intensive Computing, Systems Administration, AI/ML, Algo & Complexity.

Technical Skills

Languages: Python, Scala, Java, , C++, JavaScript, TypeScript, Go, SQL, HTML, CSS

Frontend: React.js, Angular, Bootstrap

Backend: Node.js, Express.js, Spring Boot, Django, Flask

Databases: MySQL, PostgreSQL, MongoDB, SQLite

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, GitHub Actions, Azure (Basic), Kubernetes

Tools: Git, JIRA, Postman, VS Code, Linux, Agile, Scrum, Kanban

Certifications & Leadership Experience

JP Morgan Chase & Co. Software Engineering Virtual Experience  [View](#)

AWS Certified Cloud Practitioner – In Progress  [View](#)

Google Data Analytics Professional Certificate  [View](#)

Google Business Intelligence Certificate  [View](#)

AWS Introduction to Generative AI  [View](#)

Publicity Lead, UB Hacking Club

SEAS Peer Mentor, UB CSE Department

Lead Web Developer, Volunteer, WHF(World Hindi Foundation)
