

DINESH CHILUKURI || FRONTEND DEVELOPER

+1 (551)-799-5330 |dineshsaikalyanch@gmail.com | <http://linkedin.com/in/dinesh-chilukuri-7944a9302> | Jersey City, NJ

SUMMARY

UI/Front-End Web Developer with 5 years of experience in designing and developing responsive, user-focused web applications.Proficientin**HTML5,CSS3,JavaScript,TypeScript,AngularJS(v2–17),ReactJS/Redux**, and **Vue.js**,with expertise in **MEAN stack** development (MongoDB, Express, Angular, Node.js). Skilled in**Cypress test automation** integrated with **CI/CD pipelines**, **Angular Material Design**, and **Responsive Web Design**. Strong background in **API integration** with **Django Rest Framework** and **RESTful services**. Experienced in **agile methodologies** (Agile, TDD) and **testing frameworks** (Jasmine, Karma, Mocha), enhancing project quality and collaboration. Holds a Master’s in Information Systems from Trine University, bringing a user-centric approach to modern web development.

TECHNICAL SKILLS

Programming Languages: HTML, CSS, JavaScript, TypeScript, SQL

Frontend Frameworks & Libraries: Angular.js, React.js, Vue.js, jQuery, Chart.js, Bootstrap, SASS,
Less

Testing & Automation: Cypress, Mocha

Backend Development: Node.js, Django, MongoDB, Express.js, RESTful APIs,JAVA

Version Control: Git, GitHub, Bitbucket, SVN

Cloud : Microsoft Azure (Azure App Service), AWS (S3, Lambda), CI/CD with Jenkins, Bamboo

Data Handling & Storage: MongoDB, SQL (MySQL, PostgreSQL), Local Storage, Session Storage

UI/UX & Responsive Design: Responsive Web Design, Angular Material Design, Flexbox, Grid Layout, Adobe XD, Figma

Collaboration Tools: JIRA, Confluence, Microsoft Teams, Slack

Project Management & Methodologies: Agile (Scrum, Kanban), TDD (Test-Driven Development), CI/CD Integration

PROFESSIONAL EXPERIENCE

Adventa Soft Inc, USA – UI/Frontend Developer| May 2022 – july 2025

- Designed and developed responsive, user-friendly interfaces using React.js (18), Redux, Angular Js,TypeScript, HTML5, CSS3, SCSS, Bootstrap, and JavaScript.
- Collaborated with business analysts and stakeholders to gather requirements and translate them into intuitive UI components.
- Led the migration of core features from AngularJS to React.js, improving performance, scalability, and code maintainability.
- Developed modular JavaScript libraries for performance optimization, reducing page load times
- Designed scalable, reusable Angular modules and React components for use across multiple projects.
- Secured API integrations by configuring authentication and access controls using APIGEE API Gateway.
- Improved CI/CD pipelines by integrating AWS EKS with Jenkins, Terraform, and AWS CodePipeline, reducing deployment times.
- Wrote unit tests using Jest, React Testing Library, Karma, and Jasmine, ensuring UI stability and reducing production bugs.
- Managed version control and feature branching using GitHub, enabling seamless code collaboration and reviews.
- Utilized Postman for API testing and validation, ensuring reliable RESTful API communication.
- Followed API design best practices to build scalable and maintainable services.
- Actively participated in Agile ceremonies including daily stand-ups, sprint planning, and retrospectives; used JIRA for task tracking.
- Documented workflows, key implementations, and best practices in Confluence, supporting team knowledge sharing and onboarding.

Environment: React.js, Redux, Angular Js,TypeScript, HTML5, CSS3, SCSS, Bootstrap, JavaScript, Swagger UI, Axios, WebSockets, GraphQL, Monaco Editor, Prism.js, Markdown, Lunr.js, Jest, React Testing Library, GitHub, Jenkins, Docker, Agile (Scrum), JIRA, RESTful APIs, JSON, Webpack.

V9 carnage - Hyderabad, India UI/Web Developer | Jan 2020 – Nov 2021

- Developed responsive Single Page Applications (SPAs) using modern Angular (2+), TypeScript, and RxJS, creating dynamic and real-time interfaces for customer-facing applications.
- Participated in the full software development lifecycle (SDLC) – including design, development, testing, debugging, and production support.Built pixel-perfect UIs with HTML5, SCSS, and component-driven frameworks like Angular and React, ensuring consistency with UX designs.
- Rapidly developed UI components using the Bootstrap library and associated them with data models via AngularJS.
- Collaborated with business analysts and product teams to gather requirements and translate them into functional and intuitive user interfaces.
- Converted UX-provided PDFs into clean, reusable HTML5 templates, and integrated them with data using AngularJS and RESTful services.
- Utilized AJAX calls to dynamically populate data tables and enhance the interactivity of the application.
- Partnered with QA teams for cross-browser testing, bug fixes, and performance improvements.
- Ensured cross-browser compatibility and adherence to web standards using compliant HTML/CSS layouts.
- Implemented various JavaScript and jQuery functionalities, including dynamic data grids, sliders, lightboxes, and modal components.
- Built AJAX-based UI frameworks using jQuery, enabling smooth and responsive user interactions.
- Contributed to key features like Customer Registration and View Customer Information using asynchronous JavaScript and REST APIs.
- Maintained and deployed web applications, handled debugging and testing, and ensured high availability and stability across platforms.

Environment: HTML5, CSS3, JavaScript, AngularJS,TypeScript, SCSS, Bootstrap, jQuery, AJAX, JSON, XML, PHP5, MySQL, HandlebarsJS, JIRA

PROJECTS

Customizable Dashboard with Widgets

- Developed an **interactive, customizable** dashboard where users could **drag** and **drop** widgets (e.g., weather, news, calendar) to personalize their experience.
- Leveraged **AngularJS** and **ReactJS** for real-time updates and user-friendly drag-and-drop functionality.
- Integrated third-party APIs for widgets and utilized **Node.js** for backend integration to retrieve and display data.
- Implemented **Chart.js** for data visualization, allowing users to track various metrics interactively.

Fitness Tracker

- Created a comprehensive **fitness tracking application** where users could log workouts, set goals, and view progress.
- Employed **ReactJS** with **Chart.js** to create progress charts, enabling users to track their fitness journey dynamically.
- Developed responsive **UI components** using **HTML5**, **CSS3**, and **Bootstrap** to provide an accessible and engaging experience across devices.
- Connected to a **MongoDB** database to store and retrieve user data, ensuring efficient backend operations
