

Dinesh Reddy Mamidi

GCP DevOps Engineer

+1 331-701-8775 | dineshreddym07@gmail.com | linkedin.com/in/dinesh-reddy-m07 | Naperville, IL

Professional Summary

DevOps Engineer with 4 years of hands-on experience specializing in Google Cloud Platform (GCP) and automation of cloud infrastructure. Skilled in designing CI/CD pipelines, managing GKE workloads, and optimizing system reliability and scalability through infrastructure-as-code and observability best practices.

Professional Experience

DevOps Engineer | [Caterpillar | Peoria, IL] | Nov 2023 – Present

- Developed and optimized end-to-end CI/CD pipelines with Jenkins and Google Cloud Build, automating testing and deployment processes to cut release time by 50%.
- Automated GCP infrastructure provisioning using Terraform with remote state management and reusable modules, improving environment consistency and reducing manual configuration errors.
- Improved uptime by 30% using Google Cloud Monitoring for real-time system health tracking and automated incident alerts.
- Collaborated on configuring IAM roles, service accounts, and VM instances to ensure secure and scalable cloud deployments.
- Partnered with development teams to optimize release workflows, implement automated deployments, configure monitoring and alerting, and enforce rollback procedures, improving production stability and reducing incident response time.
- Tracked, prioritized, and resolved incidents using Jira, collaborated with cross-functional teams, implemented root cause analysis, and ensured adherence to SLAs, improving operational efficiency and reducing recurring issues.

DevOps Support Associate | [Publix | India] | July 2021 – June 2023

- Assisted in deploying and maintaining containerized applications using Kubernetes and Docker, ensuring smooth development, testing, and production workflows.
- Implemented automated backup and monitoring scripts using shell and cloud tools, reducing manual workload by 40% and improving system reliability.
- Supported CI/CD pipeline improvements by configuring Jenkins/Cloud Build jobs, contributing to faster, repeatable, and more reliable software releases.
- Collaborated with cross-functional teams to troubleshoot and resolve infrastructure and deployment issues, enhancing uptime and operational efficiency.
- Documented processes, runbooks, and deployment checklists, helping streamline team operations and onboarding of new members.
- Worked in Agile teams, participating in daily stand-ups, sprint planning, and retrospectives to ensure timely delivery of features and continuous improvement.

Technical Skills

Cloud Platform & Services

Google Cloud Platform (GCP) – Compute Engine, Cloud Run, Cloud SQL, Cloud Storage, VPC, Load Balancing, IAM

Infrastructure Automation

Terraform, Jenkins, Cloud Build, Shell Scripting, Python

Containerization & Orchestration

Docker, Kubernetes (GKE), Helm, Kustomize, Google Container Registry (GCR)

CI/CD & Release Management

Jenkins Pipelines, Cloud Build Triggers, Artifact Registry, Blue-Green & Canary Deployments

Monitoring & Security

Cloud Monitoring, Cloud Logging, Secret Manager, IAM Policies, Audit Logs

Version Control & Collaboration

Git, GitHub, Bitbucket, Jira, Confluence

Education

Master's in Business Analytics, Lewis University, Chicago, IL.

Bachelor's in Commerce, Aurora Degree College, Hyderabad, India.

Certifications

Google Professional Cloud DevOps Engineer

AWS Certified DevOps Engineer – Professional

Terraform Associate (HashiCorp Certified)
