

DINESH MAMIDI

Software Engineer

Email: dinesh.26java@gmail.com LinkedIn: [dinesh-mamidi](#) Mobile: +1 832 278 2489 Place: Dallas, TX

SUMMARY

Skilled Software Engineer with 3+ years of experience in Java backend development, specializing in building scalable, cloud-native systems with Spring Boot and microservices. Hands-on experience with Red Hat OpenShift and Helm for efficient application deployment and orchestration. Proficient in designing and implementing RESTful APIs for seamless communication between distributed systems. Experienced in integrating and optimizing front-end technologies like Angular and TypeScript to enhance application functionality. Focused on delivering robust, data-driven solutions and ensuring high-performance application architecture.

TECHINICAL SKILLS

- **Programming Languages:** Java, Python, SQL.
- **Databases:** MySQL, PostgreSQL, Redis, MongoDB.
- **Frameworks:** Spring Boot, Spring Data JPA, Spring Cloud, Spring AI, Hibernate, OpenAI APIs, RESTful APIs.
- **Cloud:** AWS (EKS, EC2, RDS, DynamoDB, ElastiCache, S3, Lambda), Azure (AKS, Blob Storage), Dynatrace.
- **Build Tools:** Jenkins, Docker, Kubernetes, CI/CD Pipelines, Maven, Gradle, YAML, JSON.
- **Messaging Systems:** Kafka, RabbitMQ.
- **Web Development:** React, Angular, Node.js, JavaScript, TypeScript, HTML, CSS, Bootstrap.
- **Testing and Automation:** Swagger, Postman, JUnit, Apache JMeter, Selenium, Mockito, Karate.
- **Security:** OAuth 2.0, JWT, Spring Security, LDAP, Contrast Security.
- **Version Control:** Git, GitHub, GitLab, BitBucket.
- **Project Management:** JIRA, Agile, SDLC, Confluence, Kanban Board.
- **IDEs:** IntelliJ IDEA, Eclipse, Visual Studio Code.
- **Operating Systems:** Windows.
- **Professional Skills:** Requirements documentation, Status reporting, Presentations, Client Collaboration.

PROFESSIONAL EXPERIENCE

PNC Bank, Dallas, TX

Software Engineer

Aug 2023 – Present

Technologies: Java, Spring Boot, Spring Data JPA, Spring Cloud, ReactJS, React Native, Kafka, SLF4J, JSON, Model Mapper, Lombok, Gradle, Jenkins, IntelliJ, Bitbucket, Swagger, Hibernate, PostgreSQL, RedHat OpenShift, Postman.

- Developed RESTful APIs using Spring Boot and Spring Data JPA, integrating with PostgreSQL for data persistence, improving data retrieval speed by 30%.
- Architected scalable microservices using Spring Boot, containerized with Docker, deployed on Kubernetes, ensuring high performance in traffic.
- Implemented distributed systems with Spring Cloud and Kafka, enabling seamless event-driven communication between microservices and enhancing system scalability.
- Optimized database interactions using Hibernate and Spring Data JPA, resulting in a 20% reduction in database query times.
- Configured Kubernetes clusters for dynamic auto-scaling, enhancing resource utilization and ensuring system reliability during peak load spikes.
- Established CI/CD pipelines with Jenkins and GitLab, automating build and deployment processes for faster and more reliable software releases.
- Deployed applications on Red Hat OpenShift, ensuring containerized applications scaled effectively and met performance requirements.
- Adopted Agile methodologies and JIRA to plan sprints, track tasks, and optimize cross-functional team collaboration and workflow efficiency.
- Streamlined API testing with Postman and Swagger, adding automation to reduce manual efforts while ensuring compliance with API contracts.
- Integrated and optimized application monitoring using Dynatrace to track performance, identify bottlenecks, and enhance end-user experience, resulting in a 30% reduction in incident resolution time and improved system reliability.
- Utilized Logscale for centralized log aggregation and analysis, streamlining troubleshooting processes and enabling faster root cause analysis of production issues in Java-based applications.

IFlex INC, Fairlawn, OH

Full Stack Software Engineer

July 2022 – Jan 2023

Technologies: Java, J2EE, Spring, Restful Web Services, SOAP Web Services, Hibernate, Eclipse IDE, AngularJS, JSP, HTML5, CSS, JavaScript, Tomcat, XML, Oracle, PL/SQL, Maven, Design patterns, JUNIT, Mockito, log4J, JSON.

- Worked with microservices architecture, ensuring each service was loosely coupled and independently deployable, enhancing system flexibility.
- Utilized SLF4J for centralized logging and Swagger for API documentation, ensuring easy debugging and effective API management.
- Resolved CORS/session issues in Angular apps, integrating secure REST endpoints for scalable and efficient front-end/back-end communication.
- Deployed Kubernetes clusters across DEV, UAT, QA and PROD with Jenkins CI/CD pipelines, achieving zero-downtime production deployments.
- Directed microservices migration to Azure AKS, addressing scalability and reliability challenges through containerization and cloud orchestration.
- Executed seamless database migrations to Azure SQL and Azure Cosmos DB, modernizing legacy systems to achieve improved data accessibility.
- Created Docker container workflows, building reusable images and using multi-stage builds to streamline development and improve efficiency.

Vertocity, Hyderabad, India

Full Stack Engineer - Intern

June 2020 – May 2021

Technologies: React, Material-UI, Java, Spring Boot, RESTful APIs, MySQL, Model Mapper, Lombok, Docker, AWS EC2, AWS RDS, JUnit, Mockito, Gradle, IntelliJ, Bitbucket, Swagger.

- Designed high performance front-end components with React and Material-UI, ensuring responsive, accessible, and visually cohesive interfaces.
- Created and secured RESTful APIs in Spring Boot, implementing scalable communication layers and robust data handling for platform features.
- Engineered normalized MySQL schemas to boost data integrity, enabling efficient querying and streamlined operations in high-traffic conditions.
- Leveraged Model Mapper and Lombok to simplify object mapping and reduce boilerplate code, improving code maintainability and readability.
- Containerized and orchestrated microservices in Docker, streamlining deployment workflows and maintaining consistency across environments.
- Deployed applications on AWS EC2 and RDS, configuring fault-tolerant infrastructure to support high availability and performance requirements.
- Built automated testing frameworks with JUnit and Mockito, ensuring reliable deployments and reducing post-deployment issues.

PROJECTS

PharmaConnect Web Application

- Developed a full-stack healthcare platform using React, Spring Boot, and MySQL, enabling secure medicine ordering, doctor appointments, and health content management.
- Implemented JWT-based authentication and role-based access control in Spring Security, ensuring secure user sessions and data access restrictions.
- Automated CI/CD deployment on AWS EC2 using Jenkins, improving deployment efficiency and maintaining 99.9% uptime.
- Achieved 92% test coverage using JUnit, Swagger, and Postman, ensuring robust API reliability and performance.

AI Chat and Image Generator

- Designed and implemented a full-stack application with React and Spring Boot, integrating AI features within a modular and scalable architecture.
- Developed RESTful APIs with Spring AI, securely integrating OpenAI models to enable intelligent functionalities such as chat, image generation, and recipe creation.
- Configured and resolved CORS issues, ensuring secure cross-origin requests and uninterrupted communication between the React front-end and Spring Boot back-end.
- Built reusable React components and optimized back-end services for handling AI requests, ensuring scalability, customization, and an interactive user experience.

EDUCATION

Master of Science in Information Technology

Marist University, NY

Aug 2021 – May 2023
