👤 PROFESSIONAL SUMMARY

Analytically-minded problem-solver with skills in Python, SQL, and data visualization. Experienced in cleaning, analyzing, and transforming data to generate insights and support business decisions. Combines technical ability with strong communication skills.

🧠 TECHNICAL SKILLS

Programming & Analysis — Python (Pandas, NumPy, Matplotlib), SQL, Data Visualization

Data Management — Data Cleaning, Data Transformation, Trend Analysis, KPI Monitoring, Reporting

Databases & Tools — MariaDB, SQLite, Git, REST API

Domain Knowledge — Operational Analytics, Business Operations, Financial Technology (FinTech)

📁 PROFESSIONAL EXPERIENCE

Client Relations Analyst, *Debjani Management & Development Inc.* 05/2025 – Present | Queens, NY

- Analyzed support ticket data to identify recurring trends and patterns, enabling proactive problem resolution.
- Streamlined equipment inventory into a structured dataset, improving asset allocation accuracy.
- Monitored and reported on technical support KPIs, including maintaining a 95% same-day resolution rate.
- Collaborated with cross-functional teams to improve operational workflows.

Financial Representative (Intern), *Credit Suisse (Investment Banking)* 01/2019 – 09/2019 | New York, NY

- Gained exposure to financial services data and proprietary systems in a high-stakes environment.
- Maintained accurate records and documentation, demonstrating strong attention to detail.

📁 TECHNICAL PROJECTS

Natural Language Query System, *Technologies used: Python, MariaDB, NLP*

- Engineered a full-stack application to transform natural language questions into structured SQL queries.
- Refined, structured, and enhanced database systems effectively decreased the query response time by 40%.
- Built a user-friendly interface to deliver clear insights from complex data.

Expense Tracker Application, *Technologies used: Python, Matplotlib, SQLite*

- Developed a software application with an integrated SQLite database for financial data management.
- Implemented data visualization features using Matplotlib to illustrate spending patterns and trends.
- Created detailed user documentation and provided technical support.

🎓 EDUCATION

SUNY Stony Brook University, 05/2025 | Stony Brook, NY

Relevant Coursework in Mathematics and Data Analysis

★ LEADERSHIP & COMMUNITY INVOLVEMENT

President, *Sigma Beta Rho @Stony Brook University* 08/2022 – 05/2023

- Managed technology resources and implemented digital collaboration tools for a 20-member organization.
- Spearheaded the implementation of digital communication platforms that improved team efficiency.
