FL | (661)-232-9043 | dishakursange6@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Data Analyst experience specializing in transforming complex datasets into actionable insights using Python, SQL, and advanced analytics tools. Proficient in developing and optimizing SQL queries for MySQL and Snowflake, building ETL pipelines with AWS (Glue, Lambda, Redshift), and applying machine learning techniques like Linear Regression, Random Forest, and K-Means clustering to drive business outcomes. Adept at creating interactive Tableau and Power BI dashboards, improving decision-making by 25% through clear KPI visualization. Enhanced marketing strategies and user engagement by 15-20% through predictive modeling and A/B testing. Skilled in Agile Scrum methodologies.

SKILLS

Programming & Data Analysis: Python, SQL, R, SAS
Libraries & Tools: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
Cloud & Big Data: AWS (Glue, Lambda, Redshift, CloudWatch, QuickSight), GCP, Azure, Apache Spark, Databricks, Hadoop
Databases: MySQL, MongoDB, SQL Server, Snowflake, Azure Databricks
Visualization: Tableau, Power BI, Microsoft Excel
Methodologies: Agile (Scrum), SDLC, Waterfall
Machine Learning: Linear & Logistic Regression, Decision Trees, SVM, Random Forest, KNN, Clustering (K-Means), CNN
Other Skills: Data Cleaning, Data Wrangling, Critical Thinking, Problem-Solving, Communication, Presentation

EXPERIENCE

SID Computer Group, Jersey City, NJ | Data Analyst | Sep 2023 – Present

- Developed and optimized complex SQL queries to extract and analyze data from MySQL and Snowflake databases, enabling actionable insights for business stakeholders and improving report generation efficiency by 30%.
- Utilized Python with Pandas, NumPy, and Scikit-learn to perform data cleaning, wrangling, and predictive modeling, implementing K-Means clustering and Random Forest algorithms to segment customers and enhance marketing strategies.
- Designed interactive dashboards using Tableau and Power BI to visualize key performance indicators (KPIs) for sales and operational data, reducing decision-making time by 25% through clear, data-driven presentations.
- Leveraged AWS services (Glue, Lambda, Redshift) to build and maintain ETL pipelines, ensuring seamless data integration and processing for large-scale datasets and improving data availability for cross-functional teams.
- Applied machine learning techniques, including Linear Regression and Decision Trees, to forecast business trends, achieving a 15% increase in predictive accuracy for inventory management and resource allocation.
- Collaborated in an Agile Scrum environment to deliver data-driven solutions, participating in sprint planning and reviews to align analytics projects with business objectives, ensuring timely delivery of insights under tight deadlines.

Buffalo Toronto Public Media, Buffalo, NY | Data Analyst | Feb 2024 - May 2024

- Boosted targeted advertising ROI by 20% by applying predictive models to user engagement data and optimizing content scheduling.
- Augmented user engagement by 15% by developing an interactive Tableau dashboard to visualize real-time business KPIs for over 7 million users.
- Executed A/B testing on distribution tactics, leading to a 10% uplift in viewer retention and informed creative strategy.

HDFC Bank, Mumbai, India | IT System Analyst | Aug 2022 - May 2023

- Streamlined CTS data workflows via Oracle tuning, cutting processing time by 8% and ensuring secure financial operations.
- Led a cross-functional vendor team maintaining UPI app infrastructure, supporting over 830M secure transactions monthly.
- Devised and implemented Power BI dashboards to track transaction trends, enabling leadership to make informed operational decisions.
- Performed root cause analysis to identify and resolve recurring issues, enhancing overall system stability and performance.

Neon IT Systems, Vadodara, India | Business Analyst | Jan 2021 - July 2022

- Defined and gathered business requirements through stakeholder collaboration, writing BRDs and functional specifications using Agile documentation practices.
- Led GAP, SWOT, risk, and impact analyses across digital transformation initiatives, providing detailed insights that shaped technology roadmaps and scope.
- Created and deployed interactive dashboards using Tableau and Power BI based on SQL analytics for operational and marketing teams.
- Facilitated Joint Application Development (JAD) workshops and managed user acceptance testing (UAT) processes for new feature rollouts and system updates.
- Maintained RTMs, sprint logs, and Confluence documentation for project lifecycle traceability, ensuring audit compliance and regulatory alignment.

PROJECT

Amazon Sales Analysis (Python, Power BI) | DATA ANALYST

- Conducted a detailed analysis of Amazon sales data to uncover key revenue drivers and customer behavior patterns.
- Analyzed 500K+ rows of sales data using Python (Pandas) and created a Power BI dashboard, providing insights to improve sales strategies.

Hotel Booking Analysis (Python, MS Excel) | DATA ANALYST

- Explored hotel booking trends to identify peak seasons, reduce cancellations, and improve customer retention.
- Performed Exploratory Data Analysis (EDA) on booking data, uncovering trends that led to a 10% improvement in booking optimization.

EDUCATION

Master of Science in Business Analytics University at Buffalo, SUNY, Buffalo, NY	May 2024
Bachelor of Engineering in Computer Science Pune Institute of Computer Technology, India	July 2022
