

DIVYA BURUGU | BUSINESS ANALYST

Atlanta, GA | burugudivya@gmail.com | +1 (678) 532-1795 | LinkedIn

SUMMARY

Business Analyst with **over 4 years of experience** delivering data-driven insights, requirement analysis, and process improvements across insurance and enterprise systems. Specializes in translating complex business needs into actionable solutions, supporting end-to-end project lifecycles from discovery through deployment. Experienced in stakeholder collaboration, process optimization, compliance support, and analytical reporting to improve operational efficiency, turnaround times, and decision-making. Adept at working in Agile environments, driving clarity, traceability, and measurable business outcomes across cross-functional teams.

TECHNICAL SKILLS

Business Analysis & Requirements: Requirements gathering and documentation, stakeholder communication, BRD/FRD, user stories and acceptance criteria, use cases, gap analysis, impact analysis, business process mapping, AS-IS/TO-BE analysis, process optimization, RTM, change management, MoM documentation.

Data Analysis & Reporting: SQL data validation and reporting, advanced Excel (dashboarding, pivot tables, Power Query, lookups), Power BI, data modeling, KPI development, trend analysis, root cause analysis, data reconciliation, ad-hoc analysis.

Agile, Scrum & Delivery: Agile methodology, Scrum, sprint planning and backlog management, project coordination and delivery support, sprint reviews, UAT coordination, release management, regression testing support.

Tools & Platforms: JIRA management (epics, stories, sprints), Confluence usage, Power BI, Microsoft Excel, SQL Server, MySQL, Salesforce, ServiceNow, Azure DevOps, Visio, Lucidchart, SharePoint, Tableau (basic), PowerPoint.

Domain & Functional Expertise: Insurance claims and policy administration, underwriting workflows, claims leakage analysis, NAIC compliance, ERP (Order-to-Cash, Procure-to-Pay), finance and inventory modules, SLA and KPI monitoring.

Collaboration & Productivity Tools: Trello, Slack, Microsoft Teams, Zoom, Outlook, Google Workspace, SharePoint Online, Miro, Notion.

Compliance, Testing & Governance: UAT planning and execution, test case design, defect tracking, audit support, control validation, regulatory impact assessment, risk analysis, data quality management, governance documentation.

PROFESSIONAL EXPERIENCE

Farmers Insurance -California, USA	Aug 2024 – Current
Business Analyst	
- Functioned as a Business Analyst supporting Farmers Insurance policy and claims platforms, gathering and refining 110+ business requirements, ensuring alignment with underwriting guidelines, regulatory standards, and multi-state insurance operations. - Analyzed large-scale policy, premium, and claims datasets using SQL and Excel, reviewing over 250,000 records quarterly to identify trends, leakage risks, and opportunities for operational efficiency improvements. - Partnered with product owners, actuaries, and IT teams during Agile delivery, contributing to 30+ sprint cycles, validating acceptance criteria, and supporting timely rollout of customer-facing and internal system enhancements. - Developed analytical reports and dashboards using Power BI, tracking KPIs such as claim turnaround time, loss ratios, and policy renewals, helping leadership reduce processing delays by approximately 14 %. - Supported compliance and audit initiatives by documenting workflows, validating business controls, and assisting in regulatory impact assessments across 5 states, ensuring adherence to NAIC and internal governance standards. - Coordinated user acceptance activities by reviewing scenarios, supporting execution of 180+ test cases, and validating outcomes with business users, minimizing post-release issues across 6 production deployments. - Acted as a bridge between business stakeholders and technical teams, leading 50+ requirement discussions and change assessments, improving clarity, traceability, and stakeholder satisfaction across claims and policy servicing functions.	
Unislink - Hyderabad, India	Apr 2022 – Oct 2023
Junior Business Analyst	
- Worked as a Junior Business Analyst supporting Unislink IT services projects, coordinating requirement clarification for client-facing applications, translating 90+ business needs into functional specifications across 4 concurrent delivery streams. - Performed detailed data analysis using SQL and advanced Excel to track operational metrics, analyzing over 120,000 records monthly and improving reporting accuracy for customer onboarding and service delivery processes. - Collaborated with product managers and developers in Agile sprints, participating in 25+ sprint ceremonies, refining backlogs, and ensuring timely delivery of enhancements aligned with evolving client and regulatory requirements. - Prepared dashboards and management reports using Power BI, monitoring SLA compliance, turnaround times, and defect trends, enabling leadership to reduce service delays by approximately 15 % across key accounts. - Supported system change initiatives by validating functional changes, reviewing acceptance criteria, and coordinating regression testing for 6 major releases, ensuring minimal disruption to business operations and external client users. - Acted as a liaison between technical teams and non-technical stakeholders, conducting 40+ requirement walkthroughs and impact assessments, ensuring clarity, traceability, and alignment with contractual and operational objectives. - Contributed to process improvement initiatives by documenting workflows, updating knowledge repositories, and supporting audits, helping standardize procedures across 3 departments and improving cross-team efficiency by nearly 20 %.	

Business Analyst Intern

- Assisted in requirements elicitation for ERP finance and inventory modules, documenting 120+ functional requirements using BRDs and user stories, collaborating with 6 stakeholders to streamline monthly reporting and procurement workflows.
- Conducted business process analysis on order-to-cash and procure-to-pay cycles, mapping 15+ AS-IS and TO-BE processes using MS Visio, reducing manual data entry efforts by approximately 18 %.
- Supported ERP implementation testing by creating and executing 200+ UAT test cases in Excel and JIRA, identifying 45 defects, and coordinating fixes with development teams to meet quarterly release timelines.
- Analyzed transactional ERP data using SQL and Excel, generating weekly KPI reports for sales, inventory turnover, and billing accuracy, supporting management decisions across 3 business units and 10+ end users.
- Facilitated stakeholder meetings and requirement review sessions, preparing MoM documents and presentations in PowerPoint, ensuring alignment between business users, functional consultants, and technical teams across 8 project milestones.
- Assisted in data migration activities by validating 50,000+ legacy records, performing data cleansing checks, and supporting reconciliation efforts that improved master data accuracy by nearly 20 % post-migration.
- Provided production support for ERP users by resolving 30+ functional queries monthly, updating SOP documentation, and training 25 end users on new ERP features, enhancing system adoption and user satisfaction levels.

PROJECTS

Insurance Claims Leakage & Turnaround Optimization

- Examined multi-year, multi-state insurance claim datasets using SQL to uncover payment inconsistencies and bottlenecks, delivering interactive Power BI views that reduced average claim settlement duration by 18 %.
- Partnered with operations teams to evaluate adjuster workloads and exception rates, translating analytical findings into process recommendations that improved throughput, minimized rework, and enhanced overall claims handling efficiency.

Policy Renewal & Customer Retention Analytics

- Assessed policy lifecycle, premium history, and lapse patterns to isolate renewal risks, producing analytical summaries that supported targeted retention actions and increased renewal success rates by approximately 12 %.
- Designed performance tracking visuals highlighting customer behavior trends and revenue impact, enabling leadership to prioritize highvalue segments and align marketing outreach with data-backed retention indicators.

ERP Process Automation & Data Quality Improvement

- Reviewed transactional flows within Order-to-Cash and Procure-to-Pay cycles during ERP rollout, identifying control gaps and redundancies that, once addressed, lowered manual intervention effort by nearly 20 %.
- Validated master and transactional records across modules, implementing reconciliation logic and exception reporting that strengthened data reliability, improved audit readiness, and supported smoother downstream financial reporting.

EDUCATION

Master of Science in Information Technology	Aug 2025
Campbellsville University, Louisville, KY	
Bachelor of Technology in Electronics and Communication Engineering	Aug 2023
Aurora University	

CERTIFICATIONS

Salesforce Platform App Builder	2023
Data Analysis Using Python	2023
SQL and Relational databases	2022
Salesforce Certified Advanced Administrator	2019
