PROFESSIONAL SUMMARY

- Data Engineer with over 4 years of experience in designing and implementing data solutions using technologies like Azure, Python, Apache Spark, PySpark, and SQL, delivering impactful results for businesses.
- Strong expertise in Azure cloud services, including Azure Blob Storage, Azure Functions, SQL Server, Synapse Analytics, and Databricks.
- Skilled in building scalable and efficient ETL pipelines for streamlined data processing.
- Proficient in Python, Apache Spark, and PySpark for managing large datasets and optimizing data workflows.
- Experienced in real-time data processing and integrating NoSQL databases like Cosmos DB for advanced analytics.
- Capable of writing complex SQL queries for data extraction, transformation, and analysis, ensuring data integrity.
- Experienced in creating Power BI dashboards that turn raw data into actionable insights with clear visualizations.
- Focused on optimizing CI/CD pipelines using Azure DevOps to accelerate delivery and improve processes.
- Strong foundation in AWS services and cloud technologies. Passionate about transforming raw data into actionable insights to drive business success.

Technical Skills

- Languages: Python, SQL, Spark (PySpark, Spark SQL)
- Tools: PySpark, Tableau, Power BI
- Cloud Computing: Azure (Virtual Machines, Blob Storage, Azure Databricks, Azure SQL Database, Azure Synapse, Azure DevOps)
- Operating System: Windows, Linux, Mac
- API Design and Development: Azure API Management.
- Big Data Technologies: Azure HDInsight (Hadoop, Spark, Hive)
- Methodologies: Agile, Waterfall
- Databases: MySQL (SQL Server, Oracle DB), NoSQL (MongoDB), Snowflake.
- CI/ CD: GitHub, Jenkins, Azure DevOps, Docker.

CERTIFICATIONS

- Microsoft Certified Azure Data Engineer Associate

WORK EXPERIENCE

Data Engineer - Core Specialty, Ohio, USA

Jan 2023 to till date

- Led a data engineering project in the insurance domain, focusing on optimizing ETL processes in the Azure cloud environment.
- Designed and built scalable ETL pipelines using Python and Apache Spark, enabling efficient data extraction, transformation, and loading into Azure Blob Storage.
- Improved performance by optimizing queries, reducing application calls, and enhancing overall system efficiency.
- Implemented data governance practices to ensure compliance and maintain data integrity across the organization.
- Created tailored IAM roles based on access needs, ensuring secure access to data resources.
- Deployed data models with dbt and integrated Azure ML to streamline machine learning workflows.
- Built monitoring solutions using Azure Application Insights to track and improve machine learning model performance.
- Designed distributed data structures leveraging Azure's Hadoop and Spark architecture for optimized data processing.
- Managed Azure Blob Storage Gen2 and Gen3 for efficient data storage and retrieval.
- Maintained a robust SQL Server infrastructure, integrating it with Azure Synapse Notebooks and Power BI for dynamic visualizations.
- Automated key data processing tasks using Python scripts and Azure Functions, improving operational efficiency.
- Enhanced CI/CD pipelines in Azure DevOps by identifying and resolving bottlenecks to optimize workflow.
- Utilized Cosmos DB and Azure Data Lake Storage for scalable management of large structured and unstructured datasets.
- Leveraged Apache Spark for real-time analytics, providing timely insights to support data-driven decision-making.
- Developed interactive Power BI dashboards, delivering actionable insights across the organization.

Junior Data Engineer - Cyluscreators Private Limited, Visakhapatnam, India**Jan 2020 to Dec 2021**

- Led a data engineering project for the healthcare domain, focused on optimizing data pipelines, ensuring compliance with HIPAA regulations, and streamlining data aggregation for improved patient care.
- Orchestrated efficient data pipelines on the Azure platform, resulting in a 15% improvement in data flow efficiency.
- Developed and implemented robust HIPAA-compliant data handling protocols and security measures to protect sensitive patient information.
- Integrated diverse healthcare data sources, including EHR, Medical Imaging, and LIS, to streamline data aggregation and analysis.
- Developed and optimized SQL queries to enhance data ETL processes.
- Implemented data integration solutions using Azure Data Lake Storage and Azure SQL Database to ensure data consistency and accuracy.
- Leveraged built-in optimizations in Databricks for Spark performance, such as caching, data partitioning, and query optimization, to improve ETL pipeline efficiency.
- Implemented data quality checks and validation procedures to maintain high data integrity standards, including data profiling and analysis to identify and resolve data quality issues.
- Provided technical support and troubleshooting assistance for data-related incidents, ensuring minimal disruption to business operations

EDUCATION

- M.Sc. (Computer Science), University of Central Missouri - Warrensburg, MO – 2023 (GPA: 3.92/4)
- B.Sc. (Computer Science), Adikavi Nannaya University, India – 2020 (GPA: 3.6/4)

ACADEMIC PROJECTS**Predictive Modeling for Diabetes Risk Assessment**

- Built a predictive model with Spark ML to forecast diabetes risk using health and lifestyle data.
- Created a predictive model using Spark ML to assess the risk of diabetes based on various health and lifestyle factors.
- Implemented and compared decision tree, logistic regression, and K Nearest Neighbor classifiers to identify the most effective algorithm for diabetes prediction.
- Utilized Spark ML to efficiently train models, achieving high accuracy for early diabetes detection.

Data Analysis and Visualization for Climate Change

- Used geopandas to create interactive maps of temperature anomalies and precipitation levels.
- Leveraged pandas pivot tables to identify regions with significant climate shifts.
- Implemented Kafka for real-time climate data streaming and dynamic visualizations.

AREAS OF EXPERTISE

- | | | |
|-----------------------------|-------------------------|----------------------------|
| • Project Management | • Big Data Technologies | • Programming Languages |
| • Data Integration | • Cloud Computing | • Performance Optimization |
| • Data Pipeline Development | • Data Modeling | • Collaboration |
| • Database Management | • Automation | |

SOFT SKILLS

- | | | |
|---------------------------|------------------------------|-----------------------|
| • Excellent Communication | • Analytical Thinking | • Attention to Detail |
| • Problem-Solving | • Adaptability & Flexibility | |
