SUMMARY

Detail-oriented **Data Analyst with 3+ years of experience** driving data-informed decision-making across financial operations, capital planning, and compliance. Proven ability to design predictive models, automate financial reporting, and lead end-to-end data workflows using **Python, SQL, Tableau, Power BI, and Excel**. Skilled in **cloud platforms** including **AWS (S3, Redshift, Glue), Azure (ADF), and GCP (BigQuery)**, and experienced with **ETL tools** like **Apache Spark, Informatica, dbt, and Talend**. Strong background in **financial modeling (DCF, ROI, IRR), variance analysis, and GAAP/SOX compliance**, with a successful track record of optimizing reporting cycles by up to 60%, improving forecast accuracy, and supporting multi-million-dollar investment decisions.

SKILLS

- **Programming:** Python, SQL, Java, Scala, Shell scripting
- **Data Engineering:** Apache Spark, Hadoop, Kafka, dbt, Apache Airflow, Informatica, Talend
- **Cloud Platforms:** AWS (S3, Lambda, Glue, EMR, Redshift), Azure (Data Factory), GCP (BigQuery)
- **Databases:** Snowflake, PostgreSQL, MySQL, MongoDB, Redshift, BigQuery, Oracle Financials, SAP FICO, NetSuite, MS Access, QuickBooks
- **Visualization Tools:** Power BI, Tableau, Looker, Google Data Studio
- **Financial Modeling:** DCF, NPV, IRR, ROI analysis, capital budgeting, scenario modeling, profitability analysis
- **Accounting & Compliance:** GAAP, IFRS, SOX compliance, journal entries, tax provisioning, reconciliations, internal audit
- **ETL & Automation:** SQL-based ETL, Excel Power Query, Power Pivot, VBA macros, report automation, Excel dashboards
- **DevOps & CI/CD:** Docker, Kubernetes, Jenkins, Terraform, CI/CD pipelines

EXPERIENCE

Oracle Corporation

May 2021 – Jul 2023

Data Analyst

- Designed and implemented a **liquidity forecasting model** integrated with **Oracle ERP**, improving short-term cash visibility and increasing **liquidity coverage ratio** by 20% across business units.
- Built **interactive Tableau dashboards** visualizing **capital usage** and **variance trends**, reducing monthly reporting time by 60% and enhancing accessibility for executive stakeholders.
- Developed a **Python-based investment risk model** using **Pandas** and **Matplotlib**, helping protect \$1.2M in capital by accurately modeling **market volatility, ROI, and liquidity risk**.
- Led full **data migration** from legacy systems into **Oracle Financials**, resolving data inconsistencies and reducing **monthly close errors** by 30% across three cycles.
- Performed a **departmental cost audit** using **Excel Power Query**, identifying \$800K in non-essential spend and designing a cost optimization plan adopted company-wide.
- Standardized **CapEx workflows** in collaboration with finance and procurement teams, reducing **budget exceptions** by 35% using **Power BI tracking tools**.
- Automated quarterly **compliance reporting** across multiple entities using **SQL-based ETL** and Excel macros, reducing manual effort by 45% and ensuring alignment with **GAAP** and **SOX** requirements.
- Created predictive **cash flow models** using historical ERP data and **Python forecasting libraries**, increasing planning precision and supporting treasury decisions impacting over \$10M in fund allocation.

Intel Corporation

May 2020 – Apr 2021

Data Analyst

- Designed and automated financial dashboards using **Tableau** and **Power BI** to monitor **R&D spend** across global business units, reducing manual reporting effort by 50% and improving stakeholder visibility.
- Collaborated with **FP&A** and business operations teams to develop dynamic **Excel-based forecasting models**, improving forecast accuracy by 23% and aligning resource allocation with revenue targets.
- Extracted and transformed large-scale financial and operational datasets using **SQL** and **Python (Pandas)**, enabling data-driven decisions across **budget planning, cost control, and operational efficiency**.
- Developed and deployed an internal **KPI tracking framework** using **Excel VBA** and **Power Query** to monitor variance analysis across **capital projects**, shortening reconciliation cycles by 35%.
- Partnered with data engineering teams to ingest and structure financial data from **SAP FICO** and **NetSuite** into a **Snowflake** warehouse, streamlining **ETL pipelines** and improving data accuracy.
- Conducted **profitability analysis** and **scenario modeling** for new product initiatives, delivering actionable insights that influenced **investment decisions** worth over \$10M in capital allocation.
- Built an automated **variance analysis report** pipeline using **SQL** and **Excel macros**, cutting monthly close cycle time by 40% and enhancing audit readiness across finance teams.
- Supported internal **audit and compliance** functions by creating traceable reporting logs and reconciliation templates that met **SOX controls**, improving accuracy in regulatory reporting cycles.

EDUCATION

- **Master of Computer Information Systems**
St. Francis College – Brooklyn, NY
- **Bachelor of Science**
Osmania University – Hyderabad, Telangana

May 2025

USA

Jul 2022

India
