SUMMARY

A technology-driven professional with **over 4 years** of experience in **Business Analysis and Project Management** for both website and mobile projects. A dedicated Aanalyst, proficient in running successful programs and taking initiatives for process improvement. Experienced in **Business Analysis (requirement gathering)**, preparation of process map and specification of validations for converting business requirements into **functional and technical specifications**. Well versed with **Agile & waterfall methodologies** for SDLC - scrums, sprints, epics, user stories. Flair for **adapting quickly to dynamic business environments**; exposure in adopting a pragmatic approach in improvising on solutions and resolving complex business issues. Skilled in mapping clients' business requirements and **translating these requirements into functional specifications**, implementations & custom designing solutions (process/product) by following standard guidelines. An effective communicator with potential to **collate and process data**, thereby supporting vital business decision-making.

CORE COMPETENCIES

Business Analysis & Requirement Gathering | GAP | Impact Analysis | Business Requirement Documents (BRD) & Functional Requirement Specification (FRS) | EHR | Data Analysis & Visualization | Reports & Dashboard Development | Business Reporting & Analytics | Qualitative & Quantitative Research | Testing & Quality Assurance | Stakeholder & Cross-Functional Collaboration | Client Relationship Management & Liaison | Salesforce Analysis & Support | Production Support & Troubleshooting

TECHNICAL SKILLS

Programming & Scripting : Python, Java, R, Shell Scripting
Databases : Oracle SQL, MySQL, Microsoft SQL Server
Data Analytics & Visualization: Advanced Excel (VLOOKUP, Pivot Tables), Tableau, Power BI, SAP Lumira, SAS, Google Analytics
Cloud Technologies : AWS Core Services, AWS Pricing, AWS Support
Methodologies & Processes : Agile, Use Cases, Storyboarding, UML
Project & Issue Tracking Tools: Jira, HP ALM, Microsoft Visio, HP Quality Center, JAD, RTM, UAT, SQL, Confluence, Figma
UI & Diagramming Tools : Lucid chart, Draw.io
Operating Systems : Linux, Windows

WORK HISTORY

Business Data Analyst | Lumeris, USA | Feb 2024 – Present

- Involve in project team to implement **SDLC** and created Business Requirement Document using MS Visio, MS Word.
- Optimize **SQL queries** and enhance **ETL processes**, improving data accuracy, efficiency, and overall data management workflows.
- Ensured compliance with healthcare regulatory standards by managing and tracking **EDI** transactions, including Enrollment, Payment Advice, and Coordination of Benefits, while adhering to **HIPAA** guidelines.
- Built data automation pipelines using **Python** (Pandas, NumPy) to streamline ETL processes and reporting.
- Provide end-to-end support for User Acceptance Testing (**UAT**), including creating user manuals and conducting training sessions to facilitate smooth system adoption.
- Developed interactive dashboards and reports in **Power BI** to visualize healthcare data, track key performance indicators, and provide actionable insights for decision-making, improving operational efficiency and patient outcomes.
- Participate in **sprint ceremonies** such as sprint planning, backlog grooming, and retrospectives to ensure continuous improvement and alignment with business goals.
- Work closely with cross-functional teams to streamline **SAP** processes, enhancing data flow and operational efficiency across various modules.
- Conduct in-depth data analysis, including cost-benefit assessments, **GAP** analysis, and **SWOT** analysis, to deliver actionable insights for strategic decision-making.
- Utilize advanced **Excel** functionalities (Pivot Tables, VBA, HLOOKUP, VLOOKUP) for data analysis and reporting.
- Leverage **Alteryx** for data preparation and transformation, simplifying complex data analysis tasks.

Business Analyst | Versatile Softwares, India | Feb 2019 – Dec 2021

- Well-versed in expertise in Software Development Life Cycle and Testing Life Cycle to ensure business objectives align with project deliverables.
- Collaborated with development teams to estimate **user story** effort through story point allocation.
- Developed & executed complex **SQL queries**, including Common Table Expressions (**CTEs**), to facilitate in-depth data analysis and manipulation.
- Designed and delivered training programs for end-users, ensuring effective utilization of data management tools and systems.
- Created interactive dashboards using **Tableau** and **Power BI**, providing visual insights into key business metrics to support data-driven decision-making.

EDUCATION

Master's in information systems | University of North Texas, Denton, TX (CGPA – 3.7/4)
Bachelor's in business administration | Jain University, Bangalore, India (CGPA – 3.5/4)

CERTIFICATIONS

- Business Communication Skills
- Critical Thinking for Better Judgement and Decision Making
- Corporate Financial Statement Analysis
- AWS Solutions Architect Associate
