SUMMARY

Results-driven software engineer with a strong foundation in scalable cloud architecture and healthcare compliance. Proven track record of delivering secure, high-impact solutions using Python, .NET, Azure, and HL7 FHIR standards. Adept at integrating Generative AI into development workflows to accelerate delivery, enhance software quality, and drive operational efficiency. Skilled in CI/CD automation, API development, and data engineering, with a sharp focus on regulatory alignment and agile execution.

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER

Vicerion Corp, Sheridan, Wyoming

May, 2025 - Present

- Building scalable, secure healthcare applications using **Python, .NET, Docker, and HL7 FHIR** standards involves using technologies and practices that ensure compliance with **healthcare HIPAA and USCDI** standards. This work enhanced professional visibility and expertise in a highly regulated industry.
- Automated recurring data collation and analysis using **Python scripting**, reducing the time spent on manual reporting by **over 60%**. This streamlined the generation of critical reports, improving efficiency and accuracy.
- Configured and optimized **Azure Pipelines** to automate **CI/CD workflows**, significantly boosting deployment reliability and reducing process time by **80%**. This accelerated the software development lifecycle.
- Developed and implemented **REST APIs and SQL queries** (PostgreSQL and SQL Server) to integrate **six external systems**, which improved microservices integration and data accuracy. This initiative resulted in a **95% boost in operational efficiency** and an **80% reduction in process execution time**.
- Integrated **Generative AI into cloud workflows** to accelerate project delivery timelines and enhance overall team productivity and efficiency, supporting an **agile project delivery model**.
- Utilized **Generative AI** for the automated creation of test cases and scripts, directly from code and requirements. This strategy led to a significant reduction in errors and improved software quality and performance by streamlining the testing and debugging phases.

SOFTWARE ENGINEER - INTERN

Illinois State Treasurer's Office, Springfield, Illinois

Apr 2024 - Apr 2025

- Managed website operations in Blazor to improve issue resolution and user experience (**UX**) by using Lifecycle and Rendering Optimization.
- Deployed **Azure OpenAI** Service resources to create and configure the service in the Azure portal, and then deployed AI models such as **GPT** for AI-driven productivity features.
- Built secure **.NET** financial applications on Azure while optimizing SQL Server with caching to reduce retrieval time.
- Used **Microsoft Copilot Studio**, Text Analytics, and Computer Vision for the .NET applications to leverage advanced AI and ML capabilities.
- Enhanced **SQL Server** database performance and optimized front-end efficiency through caching strategies.
- Developed and optimized **C# and C++** applications integrating with **Azure AI APIs** to build scalable, reliable, distributed systems as per object-oriented design.

SOFTWARE ENGINEER - MENDIX & AZURE

Capgemini, Hyderabad, India

Aug 2021 - Jul 2023

- Developed and customized applications using the **Mendix** software to integrate with external systems via APIs & web services.
- Customized and extended Mendix functionality using widgets, microflows, and JavaScript actions to increase productivity by 50%.
- Enhanced **.NET** applications and **SQL** database performance by reducing server load by 30%.
- Migrated on-prem applications and solutions to **Azure** for better scalability, availability, and reliability.
- Implemented and developed required **DevOps CI/CD** pipelines with Azure DevOps & Jenkins to reduce deployment schedule by 60%.
- Collaborated with all the stakeholders (clients, developers, testers) to gather requirements and deliver functional working solutions.
- Conducted 50+ one-on-one **mentoring** sessions, offering tailored guidance to enhance trainees' technical problem-solving skills and database implementation abilities, resulting in a 90%.

TECHNICAL SKILLS

- Programming Languages:** Python, C#, C++, Java, TypeScript,
- Development Tools:** Blazor, Mendix, Visual Studio, IntelliJ, Eclipse, ASP.NET, MVC, VS 2025, Git, Jira, Generative AI
- Web & UI Development:** Angular, HTML5, CSS3, RESTful API design
- Databases:** MySQL, PostgreSQL, SQL Server, MongoDB, Oracle, ETL pipelines
- Cloud & DevOps:** Azure (App Services, Functions, DevOps, Pipelines), Docker, IIS, CI/CD workflows, Kubernetes, Jenkins, CI/CD
- Standards:** SDLC, ITSM, CMDB, HL7 FHIR, USCDI, ITIL, Agile & Scrum
- Others:** Agile Project Delivery, Data Structures, Algorithms, Testing & Debugging, Automation, Analytical Problem-Solving, Design Patterns, Multithreading, Collaboration

EDUCATION

University of Illinois, Springfield, IL, **MS Computer Science** (GPA: 4.00/4.00)

Aug 2023 – Apr 2025

Jawaharlal Nehru Technological University Hyderabad, **BS Computer Science** (GPA: 8.33/10.00)

Jun 2017 – May 2021

CERTIFICATIONS

- Microsoft Certified: Azure DevOps Engineer Expert | Azure Administrator Associate | Azure Data Fundamentals
- Certified Mendix Intermediate & Rapid Developer
- ISC² Candidate | ITIL4 Foundation | IBM AI Fundamentals
- Other: Agile Expert Certificate of Proficiency, Software Development Lifecycle Fundamentals

LEADERSHIP & ACTIVITIES

- Coordinator, National Techno-Cultural Fest (VJIT)
- Volunteer in charity runs & social initiatives
- Participant, Analytics House Cup Competition (UIS)
- Active in technical quiz competitions across multiple institutions
