

Divya Gayathri Kolloju

Data Analyst

divyakolloju9@gmail.com | (786)-849-0661 | Miami, Florida

PROFESSIONAL SUMMARY:

Data Analyst with hands-on experience in data visualization, predictive analytics, and business intelligence. Proficient in Python, SQL, Power BI, and Tableau with expertise in analyzing complex datasets and deriving actionable insights. Strong knowledge of machine learning, data preprocessing, and statistical analysis for improving operational efficiency. Experienced in working with cloud platforms such as AWS, Google Cloud, and Azure for data processing and analytics. Excellent communication and problem-solving skills, with a track record of supporting decision-making through data-driven strategies. Adept at data cleansing, feature engineering, and implementing automation scripts to streamline workflows. Experienced in building interactive dashboards and reports to support executive-level decision-making. Knowledgeable in A/B testing, cohort analysis, and customer segmentation for improving business performance. Passionate about leveraging big data and machine learning techniques to solve real-world problems efficiently.

TECHNICAL SKILLS:

Programming Languages: Python, SQL, R, Java, C, HTML/CSS

Data Analytics & Visualization: Tableau, Power BI, Microsoft Excel, Google Data Studio

Databases: MySQL, PostgreSQL, Oracle Database, Spark

Cloud Platforms: AWS, Google Cloud, Azure

Tools & Technologies: Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn, Microsoft Fabric

Other Skills: A/B Testing, Data Wrangling, Data Mining, Data Modeling, Statistical Analysis, Predictive Analytics

PROFESSIONAL EXPERIENCE:

Graduate Teaching Assistant

Florida International University, Miami, Florida

2025 - Present

- Improved student performance through personalized tutoring and data analysis techniques, specializing in Excel functions such as Pivot Tables, VLOOKUPS, and data analysis strategies.
- Supported professors by grading assignments, engaging in data mining discussions, and proctoring exams, enhancing the learning experience.
- Assisted in conducting data-driven research projects, analyzing datasets to derive academic insights.
- Developed automated grading scripts in Python, reducing evaluation time by 40%.

Student Assistant

Florida International University, Miami, Florida

Oct. 2023 - Jul. 2024

- Assisted in managing data-driven projects, analyzing student performance data to enhance curriculum efficiency.
- Fostered collaboration among students through structured learning sessions and technical workshops.
- Developed reports on student engagement and learning trends, helping faculty improve teaching strategies.
- Automated data extraction from student feedback forms, reducing manual processing efforts.

Data Analyst Intern

Confidential Company, India

Jan. 2025 - Apr. 2025

- Conducted in-depth data analysis to uncover insights that improved business decision-making processes.

- Developed Tableau dashboards and Power BI reports to visualize key performance indicators and trends.
- Implemented data cleaning and preprocessing techniques using Python and SQL, enhancing dataset accuracy and usability.
- Applied machine learning models for predictive analytics, resulting in improved operational efficiency.
- Conducted sentiment analysis on customer feedback, leading to a 15% improvement in user satisfaction strategies.
- Developed SQL queries for data extraction, reducing query execution time by 30% through optimization techniques.

Python Machine Learning Technologies Intern
Grepthor Technologies, Hyderabad, India

Jan. 2023 - May 2023

- Conducted exploratory data analysis (EDA) using Pandas, NumPy, and visualization libraries such as Matplotlib and Seaborn.
- Enhanced website UI based on user engagement analysis, leading to an 8% increase in conversion rates.
- Applied A/B testing methodologies to optimize product features and improve user retention.
- Built Tableau dashboards for enhanced data interpretation, driving informed decision-making.
- Used feature engineering techniques, boosting model performance by 12% through Logistic Regression and K-means clustering.
- Automated data collection processes, reducing manual effort by 25%.

EDUCATION:

Master of Science in Computer Science and Engineering

Florida International University, Miami, USA

Aug. 2023 - Apr. 2025

Bachelor of Technology in Computer Science and Engineering

Veltech University, Chennai, India

June 2019 - May 2023

CERTIFICATIONS & HONORS:

- IBM Professional Certificate in Python
- Certified in CCNAv7: Introduction to Networks
- Introduction to Cybersecurity Intern
- Graduate Teaching Assistantship @ Florida International University

Data Analytics and Visualization Certification (Google Data Analytics)

PROJECTS:

Customer Churn Prediction Using Machine Learning

- Developed a predictive model using Python and Scikit-Learn to identify customers likely to churn based on historical data.
- Utilized data preprocessing, feature selection, and classification algorithms (Random Forest, SVM) to improve model accuracy.
- Visualized churn patterns and insights using Tableau dashboards, helping businesses take proactive measures.
- Conducted hypothesis testing to determine key factors influencing customer retention.

Sales Performance Dashboard using Power BI

- Designed a Power BI dashboard for tracking sales trends, revenue forecasts, and customer demographics.
- Integrated data from multiple sources, ensuring real-time analytics and reporting accuracy.
- Provided business intelligence recommendations based on historical data trends and performance metrics.
- Implemented DAX queries to enhance dashboard interactivity and filtering capabilities.

WiFi-Based Gesture Recognition System for Cross-Domain Application

- Implemented a WiFi-based gesture recognition system using Channel State Information (CSI) for diverse applications.
- Applied noise reduction and feature extraction techniques to improve signal clarity and gesture classification.
- Trained machine learning models (SVM, Neural Networks) to achieve high classification accuracy.
- Optimized model performance through hyperparameter tuning, increasing accuracy by 10%.

IoT-Based Health Monitoring System

- Designed a real-time health monitoring system integrating wearable IoT devices with cloud platforms.
- Developed predictive analytics models to identify early health risks, improving patient care.
- Implemented real-time alerts and notifications for caregivers, enhancing emergency response times.
- Created an API for secure data transmission, ensuring HIPAA-compliant storage solutions.
