PROFESSIONAL SUMMARY

- Dedicated public health graduate and aspiring clinical research professional with a strong foundation in epidemiology, research methodologies, health promotion strategies, regulatory compliance, and digital health interventions.
- Experienced with performing literature reviews, generating grant proposals, and assisting with data collecting, coding, cleaning, and descriptive analysis.
- Expertise in regulatory compliance, Institutional Review Board (IRB) procedures, and research protocol and documentation management.
- Proficiency in survey methodology, qualitative and quantitative research techniques, and participant recruitment.
- Strong analytical and communication abilities and experience in interdisciplinary teamwork, data management, and regulatory documentation.
- I am flexible and ready to relocate anywhere in the US for new career opportunities.

EDUCATION

University of New Haven, West Haven, Connecticut, USA

Overall GPA: 4.0/4

- Master of Science in Public Health December 2024
Coursework: Epidemiology, Biostatistics, Health Analytics, Public Health Ethics and Law, R, SPSS, Public Health Planning, Practice and Evaluation.

University of New Haven, West Haven, Connecticut, USA

Overall GPA: 4.0/4

- Graduate Certificate in HealthCare Informatics December 2024
Coursework: US Health care System, Revenue Cycle Management, Management Information Systems in Healthcare.

Jawaharlal Nehru Technological University, India

Overall GPA: 3.0/4

- Bachelor of Science in Doctor of Pharmacy June 2021
Coursework: Pharmacology, Pharmacotherapeutics, Clinical Research, Clinical Data Management, Adverse Drug reactions, Drug Interactions, Medicinal Chemistry, Research Protocol, Pathology, Toxicology, Physiology ICH-GCP, Regulatory Affairs, and Informed Consent.

PROFESSIONAL EXPERIENCE

Student Intern, New Haven Health Department

June 2024-August 2024

- Conducted a systematic literature review on gas-powered leaf blowers' environmental and health impacts, analyzing their effects on noise pollution, air quality, and public health outcomes.
- Developed evidence-based policy recommendations for interventions and policy changes, including potential regulatory measures and community education initiatives, to mitigate negative health and environmental impacts.
- Collaborated with health department professionals to present findings and recommendations, contributing to the formulation of future public health initiatives and policies aimed at reducing

health disparities, maintaining detailed records of research outcomes, and assist in report preparation.

Clinical Data Coder, IQVIA

January 2022-December 2022

- Performed medical coding of medical terms, diagnoses, medications, procedures, and adverse drug reactions by using standardized coding dictionaries like MEDRA and WHODD.
- Maintained data integrity and addressed discrepancies to ensure data quality and consistency.
- Adhered to Good Clinical Practice (GCP), Standard Operating Procedures (SOPs), and regulatory guidelines.
- Assisted with dictionary upgrades, client-specific report validation, and electronic Case Report Form (eCRF) alignment.
- Achieved and maintained an accurate rate of 99% or higher in coding, consistently meeting high productivity and quality standards, as verified through internal and external audits

Clinical Pharmacist Intern

April 2020- April 2021

- Provided comprehensive patient counseling on medication use, side effects, and adherence strategies, enhancing patient outcomes and satisfaction.
- Performed clinical drug monitoring, therapeutic drug management, and routine prescription audits to ensure patient safety and the most effective accessible medication therapy.
- Actively engaged in interdisciplinary clinical ward rounds, working with medical professionals to improve therapeutic results and optimize patient care plans.

CERTIFICATIONS

- BLS, HIPAA Compliance, Good Clinical Practice Certification from the National Drug Abuse Treatment Clinical Trial network.
- R essential training, SPSS statistics Essential training, Data management for Clinical Research, Getting Started with SAS Programming

TECHNICAL SKILLS

- Software and tools: R, SPSS, SAS, Microsoft Suite (Excel, Word, PowerPoint), Redcap, MEDRA, and WHODD.
- Data management expertise: query resolution, data validation, discrepancy management, study closure procedures, and adherence to ICH-GCP standards.
- Interpersonal skills: Excellent attention to accuracy, problem-solving abilities, and good communication with internal and external stakeholders.

RESEARCH PUBLICATIONS

- Descriptive Review of Patient Medication History Interview—published in the **World Journal of Current Medical and Pharmaceutical Research**.
- Physicians' Knowledge, Attitude, and Practice on HPV Vaccine Recommendations—published in the **Archives of Pharmacy Practice Journal**.
