

Name: Divya Sai Patnana
Email: divyasaipatnana3@gmail.com
Ph#: 8102918969

PROFESSIONAL SUMMARY:

- IT professional with 3+ years of experience as a **Data Analyst**, skilled in **data analysis, cleansing, transformation, and visualization** to deliver actionable business insights.
- Strong experience in **Data Warehousing, Data Marts, OLTP/OLAP systems**, and **dimensional modeling (Star & Snowflake schemas, SCDs)** using **Erwin, Oracle, Teradata, and SQL Server**.
- Proficient in **ETL development** using **SSIS, DataStage, SQL, PL/SQL, Unix Shell Scripts**, and **cloud-based ETL solutions with Azure Data Factory**, supporting data integration, migration, and batch processing.
- Hands-on experience in **Power BI, Tableau, Cognos, SAS/BI, SAS Enterprise Guide, and Excel** (pivot tables, Power Query, macros) to create **dashboards, reports, KPIs, metrics, and ad hoc analyses**.
- Skilled in **Python-based data mining and predictive modeling**, including **Bitcoin price prediction**, leveraging statistical packages and analytical techniques.
- Experienced in **data profiling, validation, reconciliation, data governance**, and **metadata management**, ensuring accuracy, consistency, and compliance with business and regulatory standards; also proficient in **Teradata utilities (BTEQ, Fast Load/Export, MultiLoad)**.
- Adept at **requirements gathering, cross-functional stakeholder collaboration**, and working in **Agile SDLC environments**, including **UAT, Regression Testing, and PPV**.
- Strong ability in **performance tuning, report automation, data lineage correction**, and delivering **scalable, reliable, and efficient data solutions** to support business decision-making.

TECHNICAL SKILLS

Tools	Informatica, SSIS, DataStage
Data Modeling	Erwin, Power BI, Tableau, Cognos
Databases	Teradata, Oracle, MS SQL Server, MS Access, DB2
Languages & Scripting	Python, SQL, PL/SQL, Unix Shell Scripts
Methodologies	OLAP, Waterfall and Agile
Scheduling Tools	Control M, Autosys
Operating Systems	Windows, Unix, Linux

EDUCATION

Syracuse University
Master's in Computer Science

August 2022 – May 2024
Syracuse, NY

PROFESSIONAL EXPERIENCE:

Syracuse University

Role: Research & Data Analyst Intern

July 2024 – June 2025

Syracuse, NY

Responsibilities:

- Interacted with clients to gather business and system requirements which involved documentation of processes based on the user requirements.
- Gathered **data migration requirements** and conducted **logical and physical data modeling using Erwin** (forward and reverse engineering, conformed dimensions, naming standards).
- Performed extensive **data profiling, mapping, and cleansing** to ensure high-quality inputs for analytics and predictive modeling.
- Identified and corrected problematic data areas; monitored **data dictionaries** and implemented **data quality checks**.
- Developed **SAS datasets, flat files**, and archived historical data; maintained and analyzed **SAS programs and macros** for generating reports and insights.
- Worked on **Bitcoin price prediction project**, performing **data preprocessing, cleaning, normalization, and feature engineering**; applied **statistical techniques** including **Cluster Analysis, Random Forest, Correlation Analysis, Goodness of Fit**, as well as **time-series analysis** to model and forecast cryptocurrency prices.
- Conducted **model validation** and interpreted results to extract actionable insights from the Bitcoin dataset.
- Designed **reconciliation reports** to validate migrated and processed data; ensured accuracy of datasets for downstream analytics.

- Developed **PL/SQL packages** to perform **batch job scheduling** and automation of data extraction processes.
- Created **technical design documents, unit test cases, test data**, and verification results; actively supported **UAT** and **regression testing**.
- Prepared project activities using **Work Breakdown Structures**; collaborated with cross-functional teams to integrate and manage project-specific and organizational data effectively.
- Created **user guidance documents** and consolidated analysis reports to support decision-making and operational efficiency.

Environment: UNIX, Shell Scripting, XML, XSD, XML Spy 2010, SAS PROC SQL, Cognos, Oracle 10g, Teradata, Sybase, Mercury Quality Center, Toad, Autosys.

Confimind Technologies Pvt Ltd

June 2020 – July 2022

Role: Business Analyst

Hyderabad, India

Responsibilities:

- Interacted with **stakeholders** to gather **business and system requirements**; documented **processes** and supported **workflow analysis, requirement gathering**, and **data governance**.
- Analyzed **datasets**, inspected, **cleansed, transformed**, and **modeled data**, providing **insights** and actionable **feedback** to **business users**.
- Designed and implemented **ETL (Extraction, Transformation, Loading)** processes using **SQL Server Integration Services (SSIS), Oracle, Teradata**, and **DataStage**; developed **mappings** and performed **data conversion** and **migration**.
- Conducted extensive **data profiling, validation**, and **reconciliation** across multiple sources including **Oracle, Teradata, DB2, Sybase**, and **Mainframes**; answered complex **business questions** with reliable **datasets**.
- Developed and optimized complex **SQL queries** with **subqueries, joins, inline views**, and **PL/SQL packages**; assisted in **data mining** for **presentations** and **reporting**.
- Performed **root cause analysis** of **data discrepancies**, conducted **downstream analysis**, and led the **data correction/validation** process.
- Implemented **multidimensional/tabular cubes** and performed **Dimensional/ER Data Modeling (Star & Snowflake schemas)**, **Fact/Dimension tables**, and **Datamarts** using **Erwin** and **Ralph Kimball methodologies**.
- Created visually impactful **dashboards** and **reports** using **Power BI, Tableau, Spotfire, SAS/BI, Cognos**, and **Excel (pivot tables, VLOOKUP, conditional formatting)**; automated **reporting infrastructure** for **KPIs** and **business operations**.
- Built **datasets** with **SAS PROC SQL, SAS Enterprise Guide**, and **Alteryx**; developed, tested, and maintained **SAS programs/macros** to generate **datasets, spreadsheets, tables**, and **ad hoc reports**.
- Configured **Azure services** including **Azure Data Factory** and **Power BI** for **BI reporting** and **analytics**; maintained **metadata** and **data dictionaries**.
- Conducted **UAT (User Acceptance Testing)**, **Regression Testing**, **PPV (Post Production Validation)** and supported **end users**; documented **test cases, system modifications**, and **technical design documents**.
- Collaborated with **offshore teams**, performed **deployments** in **test environments**, and supported **cross-team efforts** to resolve **data issues**.

Environment: Agile, Teradata, BTEQ, Power BI, Tableau, Spotfire, Oracle, DB2, Sybase, SQL Server, DataStage, Alteryx, SAS PROC SQL, SAS/BI, Cognos, Erwin, TOAD, Mainframes, Unix Shell Scripts, XML, XSLT, MS Access, MS Office Tools, MS Project.
