PROFESSIONAL SUMMARY

Data Engineer with 2+ years of experience designing scalable data pipelines and analytics solutions across AWS, Azure, and GCP. Proven ability to transform complex datasets into actionable insights through automation, data modeling, and visualization. Passionate about optimizing pipelines and accelerating data-driven decision-making in production-scale environments.

EXPERIENCE

Fidelity Investments, Boston, MA

July 2024 - Dec 2024

Software Data Engineer Co-op

- Enabled data scientists to deliver market insights 60% faster by developing **ETL** pipelines (**Python**, **SQL**, **AWS S3**, **Snowflake**) that ingested and prepared data from 30+ sources, supporting faster trading and analytics decisions.
- Designed and productionized Snowflake data models and end-to-end pipelines with automated ingestion and rerun handling, reducing manual intervention by 85% and supporting daily processing of 5x more market feeds.
- Improved investment decision-making efficiency by 25% by building **Tableau** dashboards on Snowflake, analyzing 2M+ WARN records across 44 states and 3K+ companies for strategy teams.
- Developed automated data quality monitoring in **Python** and **Snowflake** for large-scale consumer transaction datasets, loaded multiple times per week, detecting 10+ anomalies weekly and improving compliance tracking by 40%.

Tata Consultancy Services (TCS), Mumbai, India

June 2021 - Nov 2022

Data Engineer

- Reduced workflow time by 30% through **ETL** pipelines in **Talend**, **Python**, and **SQL**, processing 1,500+ applicant records daily.
- Improved data consistency and streamlined analytics by designing relational models and warehouse schemas in **SQL Server**, reducing reporting errors by 40% and cutting report prep time by 20 hours/week.
- Cut report generation time by 70% by optimizing large datasets with **SQL** (joins, window functions, **CTEs**), accelerating exam registration and recruitment dashboards for timely decision-making.
- Identified \$20K+ in annual cost savings by developing **Power BI** dashboards (**DAX**, **Power Query**) to track submissions and payment reconciliations, eliminating duplicate entries and manual reconciliation errors.
- Enhanced data integrity through form-based compliance systems and **CI/CD** pipelines with **Jenkins**, ensuring 100% error-free submissions and reducing deployment time of compliance checks by 60%.

PROJECTS

Real-Time Patient Flow Analytics Pipeline | [GitHub](#)

(Azure, Event Hub, Data Factory, PySpark, Databricks, Synapse)

- Orchestrated a real-time streaming pipeline in Azure Data Factory with Event Hub (**Kafka**-compatible) ingestion and Databricks **Delta Lake** (Bronze–Silver–Gold) processing, accelerating patient flow analytics by 90% and cutting reporting time by 75%.

AWS ETL Automation | [GitHub](#)

(AWS, ETL, S3, Glue, SQS, Snowflake, Apache Spark)

- Architected serverless **ETL** pipeline for **CSV-to-Parquet** transformation, reducing processing time by 30%; implemented real-time ingestion using **Snowpipe** and **SQS** for low-latency Snowflake updates.

AI-Powered Text-to-SQL Chatbot | [GitHub](#)

(Airflow, React, GCP, RAG, CI/CD, LangChain, ChromaDB)

- Developed a full-stack React-based Text-to-SQL chatbot with **RAG**-based retrieval, integrated with **BigQuery** and **Airflow** pipelines, containerized using **Docker** and deployed on **Kubernetes** via GKE, reducing LLM API calls by 40% and automating data processing workflows.

Advanced NYC Taxi Analytics Pipeline | [GitHub](#) | [Tableau](#)

(dbt Core, Google BigQuery, SQL, Tableau)

- Engineered **dbt** ELT pipeline in BigQuery processing 35M+ taxi records with **dimensional modeling** and automated **CI/CD** testing, powering Tableau dashboards analyzing revenue trends and operational patterns.

TECHNICAL SKILLS

Languages & Tools: Python, PySpark, SQL, PL/SQL, HiveQL, MongoDB, Cassandra, Tableau, Power BI, Jira, Confluence

Data Engineering & Big Data: ETL/ELT, Data Pipeline Design, Data Warehousing, Data Modeling, Apache Spark, dbt, Airflow, Kafka, Snowflake, Databricks, BigQuery, Data Quality & Validation, CI/CD

Cloud Platforms: AWS (S3, Redshift, Glue, Lambda), GCP, Azure, Hadoop, Docker, Kubernetes

Certifications: [AWS Certified Data Engineer – Associate](#), [Alteryx Foundational Micro-Credential \(2025\)](#)

EDUCATION

Northeastern University

Sept 2023 - Aug 2025

Master's in Data Analytics Engineering

GPA: 4.0

Relevant Coursework: Data Mining in Engineering, Computation and Visualization for Analytics, Machine Learning Operations, Neural Networks & Deep Learning, Data Management for Analytics, Applied Generative AI

University of Mumbai, Mumbai, India

Aug 2017 - June 2021

Bachelor of Technology in Electrical Engineering

GPA: 3.9
