

DIVYASHREE BISLAHALLI

Phone: (940) 465-9813 | Email: divyashreebislahalli@gmail.com | Location: Denton, TX | [LinkedIn](#)

SUMMARY

- Software Engineer with 4 years of experience building scalable, secure microservices and enterprise-grade backend systems across healthcare and retail domains.
- Proficient in Java, Spring Boot, Spring Cloud, and modern development architectures, with strong expertise in cloud-native solutions on AWS and Azure.
- Skilled in containerization (Docker, Kubernetes), API development, and CI/CD pipelines using GitHub Actions and Jenkins.
- Deep understanding of OAuth2, JWT, RBAC, and best practices for secure access control and compliance.
- Experienced in unit testing, integration testing, and automated testing with JUnit and Selenium; passionate about delivering high-quality, maintainable code.
- Active participant in code reviews and knowledge sharing; experience mentoring junior developers and driving continuous improvement in engineering teams.
- Committed to Agile methodologies (Scrum, Kanban) and cross-functional collaboration to deliver impactful solutions.
- Experienced in supporting enterprise API integrations, writing developer facing documentation, and collaborating with cross-functional teams to improve developer experience (DX) and adoption

SKILLS

- **Programming Languages:** Java, Python, TypeScript, SQL, JavaScript, C++
- **Frontend Development:** HTML5, CSS3, React, Angular, Tailwind CSS
- **Backend Development:** Spring Boot, JSP, Spring Cloud, Node.js, Express.js, Django, Rest, SOAP
- **Database Management:** MySQL, PostgreSQL, MongoDB, Hibernate, JPA, IBATIS, JDO, Oracle
- **Messaging & Event Streaming:** Kafka, RabbitMQ
- **Version Control & CI/CD:** Git, GitLab CI, Jenkins, GitHub Actions, TeamCity
- **Containerization & Orchestration:** Docker, Kubernetes, Docker Compose, Helm
- **Authentication & Security:** JWT, OAuth2, Role-Based Access Control (RBAC)
- **Cloud Platforms:** AWS (EC2, Lambda, S3, RDS, DynamoDB), Microsoft Azure, Google Cloud Platform (GCP)
- **API Management:** RESTful APIs, GraphQL, SOAP APIs, AWS API Gateway, API Evangelism, Developer Relations, SDK Integration, API Troubleshooting
- **Testing & Automation:** JUnit, Jest, Selenium, Integration Testing, E2E Testing, Mockito
- **DevOps Tools:** Ansible, Terraform, Maven, Gradle, Prometheus, Grafana, Ant
- **Architecture & Patterns:** Modern Software Architecture, Microservices Architecture, Software Design Patterns, Domain-Driven Design
- **Agile Methodologies:** Scrum, Kanban, Jira,
- **Miscellaneous Tools:** SonarQube, Postman, Swagger, Visual Studio Code, IntelliJ IDEA, Draw.io, Slack, JBoss, Apache Tomcat, Documentum, Socket Programming, Problem Diagnosis and Resolution, Developer Documentation, Code Samples, Integration Architecture, Stakeholder Communication, Developer Advocacy, Sample Applications

WORK EXPERIENCE

Kaiser Permanente

Jan 2025 – Present

Java Developer

- Designed and implemented scalable microservices using Spring Boot, Spring Cloud Gateway, and modern development architectures.
- Utilized IBATIS and JDO to support legacy data persistence before migrating to Hibernate and JPA.
- Deployed enterprise-grade Java applications on Apache Tomcat and JBoss servers, optimizing server configuration for performance.
- Led code reviews to ensure code quality and adherence to industry standards.
- Participated in architectural design reviews, contributing to strategic backend improvements.

- Mentored junior developers in clean code practices, debugging, and Spring ecosystem usage.
- Owned end-to-end deployment and maintenance of Java applications in a microservices environment.
- Collaborated cross-functionally with QA, product managers, and DevOps in Agile sprints to meet business goals.
- Achieved a 40% reduction in API deployment time through optimized CI/CD pipelines with GitHub Actions.
- Managed builds using Ant and Maven, and set up CI pipelines using TeamCity and Jenkins.
- Wrote complex SQL queries and optimized stored procedures in Oracle for performance-critical workflows.
- Worked in a mixed development and production support environment, resolving real-time issues and ensuring service uptime.
- Exposed to SOAP and RESTful web services for integrating legacy and modern systems.
- Collaborated with cross-functional teams to deliver compliant solutions aligned with industry regulations (HIPAA, banking standards).

Trigent Software

July 2020 – Dec 2023

Java Developer

- Spearheaded the transformation of a monolithic retail application into a microservices-based platform using Spring Boot and MySQL, enhancing scalability and maintainability.
- Led the migration of a monolithic retail application to a microservices-based architecture using Spring Boot and MySQL.
- Architected and developed backend services for catalog, cart, and order workflows.
- Integrated RabbitMQ for decoupled, asynchronous service communication.
- Engineered RESTful APIs and collaborated with frontend teams using Angular.
- Containerized services using Docker; optimized local environments with Docker Compose.
- Automated build and deployment pipelines with Jenkins and Git.
- Enforced unit and integration testing with JUnit and Selenium; improved test coverage by 35%.
- Participated in daily standups, code reviews, planning, and retrospectives.
- Utilized IBATIS and JDO to support legacy data persistence before migrating to Hibernate and JPA.
- Deployed enterprise-grade Java applications on Apache Tomcat and JBoss servers, optimizing server configuration for performance.
- Improved backend performance, achieving 70% increase in peak-hour throughput and reducing checkout latency to under 2 seconds

PROJECTS

SmartMed Inventory Optimizer

- Designed a predictive inventory system using Python and Django, integrating machine learning algorithms to forecast medication demand across clinics.
- Connected to MongoDB for scalable document storage and visualized usage trends via custom dashboards built with Chart.js.

EduVerse Learning Companion

- Built a responsive, cross-platform web app using TypeScript, Next.js, and Tailwind CSS, enabling gamified learning paths for students.
- Integrated GraphQL APIs and Firebase Authentication to ensure secure, real-time interactions and dynamic content rendering.

EDUCATION

Master in Computer and Information Sciences

University of North Texas – Denton, TX, USA

Bachelor in Computer Science

Ballari Institute of Technology and Management – Bellary, India

CERTIFICATIONS

AWS Certified Developer – Associate

Microsoft Certified Azure Developer – Associate
