Business Analytics graduate with 2+ years of consulting and analytics experience, specializing in data visualization, predictive modeling, process improvement, and stakeholder collaboration. Adept at translating complex data into actionable insights to optimize operations, drive revenue, and support strategic decision-making.

SKILLS:

Python | R | SQL | Tableau | Power BI | Alteryx | Advanced Excel | Snowflake | Data Mining | Predictive Analytics | Statistical Analysis | Data Visualization | Pandas | NumPy | SciPy | Scikit-learn | KNIME | Market Analysis | Growth Strategy | Customer Insights | Business Process Improvement | Requirements Gathering | Stakeholder Management | Data Modeling | KPI Tracking | Workflow Optimization | Reporting & Documentation | Agile Methodologies | UAT (User Acceptance Testing)

EDUCATION

Cox School of Business, Southern Methodist University – Dallas, TX

May 2025

Master of Science, Business Analytics (GPA: 3.65/4.00)

Center for Management Studies, Jain University – Karnataka, IND

June 2021

Bachelor of Business Administration (GPA: 3.78/4)

EXPERIENCE

Scaler Academy, InterviewBit Software Services – Karnataka, India

Senior Associate Analyst, Business Operations & Development

Mar 2023 - Jul 2024

- Analyzed large datasets from multiple sources using SQL, Excel, and Python to identify high-value business opportunities, resulting in \$5M revenue growth within six months.
- Designed and maintained KPI dashboards in Tableau to track operational performance, sales metrics, and customer engagement.
- Partnered with cross-functional teams to define requirements, translate business needs into actionable insights, and optimize decision-making processes.
- Developed and deployed predictive models to forecast lead conversion rates and monitor model accuracy for continuous improvement.

Analyst, Business Development

Aug 2022 - Feb 2023

- Built interactive Tableau dashboards integrated with SQL queries to provide real-time revenue and performance reporting to leadership.
- Conducted workflow analysis to identify process gaps, resulting in a 40% increase in team productivity.
- Developed solutions to improve order retention and streamline customer interaction processes, enhancing operational efficiency.
- Facilitated data-driven decision-making by preparing business requirement documents (BRDs) and performance reports for management.

Intern, Business Development

Jun 2021 - July 2022

- Conducted market and customer data analysis to support business strategy and product positioning.
- Collaborated with sales and operations teams to gather requirements and provide insights that improved client acquisition strategies.
- Recognized as "Best Associate 2020" for consistently exceeding performance metrics.

NativeCreativ – Karnataka, India

May 2019 - May 2021

Brand Strategy Consultant

- Partnered with clients to define business goals, translate them into actionable marketing plans, and measure outcomes against KPIs.
- Created reports and visual dashboards to present findings and strategic recommendations to stakeholders.
- Collected and analyzed campaign performance data to assess ROI and optimize digital marketing strategies.

PROJECTS

Electricity Consumption Analytics (Oncor Electric Delivery – Dallas, TX)

Jan 2025 - April 2025

- Developed interactive dashboards using Tableau to analyze electricity consumption patterns for commercial and residential users.
- Leveraged advanced data visualization techniques to identify usage trends, peak demand periods, and consumption anomalies, helping stakeholders in optimizing energy allocation.
- Delivered data-driven insights to address billing discrepancies and improve energy efficiency, resulting in cost reduction for medium to large enterprises.
- Integrated real-time data pipelines with commercial datasets for energy demand forecasting, improving grid reliability and resource planning.
- Presented actionable recommendations to stakeholders, facilitating informed decision-making and energy conservation strategies.

OrionDrive

Oct 2024 - Dec 2024

- Developed a centralized MySQL database with R Shiny for logistics optimization, automated scheduling, database management, and performance analytics.
- Streamlined logistics processes by integrating AI-powered SQL generation in Python, improving operational efficiency and decision-making.
