

DULCIE MOSES KANCHERLA

(317)-649-2793

kdulciemoses@gmail.com

www.linkedin.com/in/dulciemoseskancherla

Clinical Data Analyst intern with Doctor of Pharmacy and Master's in Health Informatics. Skilled in EMR systems (Epic, Cerner), statistical analysis, and predictive modeling for clinical outcomes. Experienced in data cleaning, standardization, and visualization using Python, R, and Tableau. Proficient in clinical research operations, GCP, HIPAA compliance, and interdisciplinary collaboration to improve trial efficiency and patient outcomes.

EDUCATION

Indiana University

Jan 2023- Dec 2024

Master of Science in Health Informatics

CGPA- 3.5/4.0

Kakatiya University

Sep 2016-Aug 2021

Doctor of Pharmacy

CGPA- 3.0/4.0

PROFESSIONAL EXPERIENCE

Clinical Data Analyst Intern (Remote)

Aug 2025-Present

Helix Tech-IT Solutions Inc. Austin, US

- Support the collection, cleaning, validation, and standardization of clinical datasets to ensure high data quality and reliability for analysis.
- Apply statistical methods, EMR standardization, and predictive modeling to ensure data validity and support clinical outcome analysis
- Deliver project tasks on time, including data summaries, documentation, and project reports for client use.
- Apply confidentiality HIPAA standards while handling sensitive clinical information.

Clinical Documentation Specialist

Feb 2025- Jul 2025

Sydney and Lois Eskenazi Hospital, Indianapolis, US

- Document real-time clinical encounters within EPIC EHR, including HPI, physical exams, diagnostic orders, and treatment plans.
- Partner with providers to optimize documentation workflows and improve data quality and accuracy.
- Developed and implemented custom templates in EPIC, enhancing EHR interoperability and efficiency.
- Provided support for minor procedures and collaborated on clinical decision documentation.

Data Scientist Intern (Remote)

Aug 2024-Dec 2024

Technologies Pvt Ltd, New South Wales, Australia

- Collaborated cross-functionally with clinicians and developers to improve the EMR user interface and functionality.
- Designed a scalable EMR database schema and front-end modules to enhance healthcare data integration.
- Gained experience in system optimization, backend integration, and real-time data flow in healthcare applications.

Research Assistant

Aug 2023-Dec 2024

Luddy School of Informatics and Computing, Indiana University Indianapolis, US

- Collected, analysed, and visualized healthcare-related data from open-source systems to support research on chronic illness trends and risk prediction.
- Partnered with data scientists to clean datasets, apply statistical models, and report findings in accessible formats for academic and clinical stakeholders.

TECHNICAL SKILLS

- Programming & Analytics: Python, R, SQL (data cleaning, regression, survival analysis, predictive modelling)
- Data Visualization: Excel (Pivot, Power Query), Tableau, Power BI, Matplotlib, Seaborn
- Database Management: MySQL, EMR/clinical databases
- Clinical Research Tools: REDCap, SEER

- Medical Coding & Standards: ICD-10, SNOMED, LOINC, HL7, FHIR
 - EHR Systems: Epic, Cerner — clinical documentation and data extraction
 - Compliance & Governance: ICH-GCP, HIPAA, IRB protocols, data security
 - Collaboration Tools: Jupiter Notebook, Git/GitHub, MS Office, Slack
-

PUBLICATIONS & CERTIFICATIONS

- Assessment of functional outcome with relation to implants used in reductions of lower limb fractures in menopausal women. PARIPEX - INDIAN JOURNAL OF RESEARCH | Volume - 10 | Issue - 08 | August - 2021 | PRINT ISSN No. 2250 - 1991 | DOI: 10.36106/paripex | Principal author
 - NIDA Clinical Trials Network | NDAT CTN Clinical Coordinating Center | Good Clinical Practice version 5 | Valid till 28 March 2028
 - HIPAA Compliance Training- completion certificate | ScribeAmerica | March 2025
 - Ethics and Governance of Artificial Intelligence for Health | World Health Org (openweb) | Sept 2025
 - Certificate of Completion- Introduction to Tableau | Code: 8818898 | Aug 2025
-

PROJECTS

1. **Title:** Study of correlation between a patient's risk factors for bone fractures and employing machine learning models to identify best prediction model to identify individuals at high risk of bone fractures.
 - **Outcome:** Employing Recall, F-1 and Support matrix and identified Decision Tree Classification as best model.
 - **Role:** Data collection, statistical analysis, visualization, model validation and project report
 2. **Title:** Enhance the accuracy and efficiency of diagnosing Ehlers-Danlos Syndrome (EDS) by incorporating a comprehensive analysis of patient-specific data
 - **Outcome:** Differentiated EDS from other connective tissue disorders through the application of standardized diagnostic criteria and offered personalized treatment recommendations that are tailored to the individual needs of patients, addressing the diverse manifestations of the syndrome.
 - **Role:** Conducted scooping review through PubMed, UpToDate, Google Scholar, Ovid, and Wiley to find the clinical manifestations of the disorder.
 3. **Title:** Design and develop an AI- powered EMR with patient-centric capabilities to address challenges and improve clinical decision making
 - **Outcome:** This project successfully addressed critical challenges in data management, interoperability, and user accessibility by creating a scalable, secure, and multi-functional system with database architecture comprising of 70+ unique tables with efficient interoperability and user-friendly interface.
 - **Role:** Created unique MYSQL tables to efficiently manage patient records.
 4. **Title:** Healthcare Data Transformation - A DBMS Approach to Stroke Analysis
 - Outcome:** Predicted stroke risk by analyzing the impact various Social, medical and lifestyle factors in by conducting structured analysis of patient-related data in a SQL database.
 - Role:** Created Entity-Relationship Diagram (ERD) using modular structure and following normalization guidelines.
 5. **Title:** Identify functional outcome of various surgical implants used in reduction of lower limb fractures in menopausal women by implying statistical analysis.
 - Outcome:** K-nails and plates provided the best range of motion with highest OMSS scoring system.
 - Role:** Developed a scoring system and applied ANOVA, chi-square to analyze the results.
-

VOLUNTERING & LEADERSHIP

- Executive committee member for Global Indy, The Navigators, IN, 46202
 - Project leader, Youth Fellowship, Baptist Church, Downtown
 - Volunteer at ISM connect program, The Navigators, Indianapolis-Chicago
-

HOBBIES AND INTERESTS

Writing open-verse poetry
Reading books
