

Creative web developer with over 10 years of combined experience in software development and cybersecurity, delivering secure, scalable, and user-centric applications. Skilled at building responsive interfaces, deploying to cloud environments, and applying security best practices.

Professional Experience

Web Developer – Freelance | 2022 – Present

- Designed and implemented web applications using React, Node, Express, and Next.js ensuring secure and maintainable architecture.
- Developed robust OAuth authentication flows and user management systems for multi-user applications.
- Built responsive, mobile-first interfaces with Tailwind CSS and enhanced interactivity through Framer Motion animations.
- Created modular, reusable component libraries and scalable frontend/back-end structures to accelerate development.
- Implemented RESTful APIs and managed data persistence with MySQL, and MongoDB, focusing on performance and reliability.
- Configured AWS EC2 deployments, Ubuntu servers, Nginx, and automated CI/CD pipelines.
- Enforced version control and collaborative workflows with Git and GitHub, including code reviews, branching strategies, and merge management.
- Optimized application performance through lazy loading, code-splitting, and query optimization, improving page load times and responsiveness.
- Integrated modern development tooling and ensured type safety using TypeScript.

Cyber Operations Consultant – CIWT Corry Station - Contractor | 2015 – 2025

- Developed and maintained web-based training tools in Python and Powershell, supporting 200+ cybersecurity professionals annually.
- Built interactive lab applications to simulate real-world cyber threats, improving engagement and skill retention.
- Led classroom instruction on programming fundamentals and introductory courses in Python, PowerShell, and Bash scripting, breaking down complex concepts into clear, understandable lessons.
- Managed virtualized environments for secure testing and training, ensuring system stability and uptime.

Education & Certifications

Full-Stack Web Developer Bootcamp

University of Central Florida

TS/SCI Clearance
CompTIA Security+

Bachelor of Science in Information Technology with a focus in Software Development

Strayer University | Mobile, AL

Current Projects

AI-Driven MUD Platform (Next.js, OAuth, FastAPI, PostgreSQL, LLM Integration) - In development - [GitHub](#)

Text-based platform with AI-driven dynamic storytelling and adaptive behavior. Frontend built with Next.js and OAuth-based authentication. Backend implemented in FastAPI, interfacing with locally hosted LLMs for user input parsing and procedural narrative generation. PostgreSQL stores persistent world state and player data.

Nutritional Barcode Scanner (React Native, OpenFoodFacts API) - In development – [GitHub](#)

Mobile app that scans food barcodes and returns nutritional and allergen information, including gluten-free status. Queries the OpenFoodFacts API in real-time for accurate product data.

Additional Experience

Cyber Security Analyst – ManTech | 2013 – 2015

Software Test Engineer – Computer Sciences Corporation | 2011 – 2013

Vulnerability Analyst – Raytheon | 2009 – 2011

Global Network Exploitation Analyst – Northrop Grumman / U.S. Marine Corps | 1998 – 2009

Key contributions: Led vulnerability analysis, penetration testing, and network defense initiatives; designed secure software updates; implemented automated testing tools; built and maintained virtual environments for validation and training.
