EDUCATION

Ph.D. Biology , <i>University of Dayton</i> - GPA: 3.939 / 4.00	<i>Aug 2019 – Dec 2024</i>
M.Sc. Human Genetics , <i>Sri Ramachandra University</i> - GPA: 9.02 / 10.00	<i>Jul 2015 – Jun 2017</i>
B.Sc. Plant Biology and Plant Biotechnology , <i>Stella Maris College</i> - GPA: 7.158 / 10.00	<i>Jun 2011 – Dec 2014</i>

SKILLS

- **Technical Skills:** Scientific Writing, Reference Manager (EndNote, Mendeley), Life Sciences, Neurodegenerative Diseases, Human Genetics, Molecular Biology, Cancer Research, Image Analysis/Quantification (ImageJ), Data Analysis (GraphPad Prism).
- **Soft Skills:** Adaptability, Resourcefulness, Motivated, Critical-thinking, Logical Reasoning, Analytical ability, Problem-solving, Communication, Presentation, MS Office: PowerPoint, Word, Excel, Leadership, Mentoring, Project Management, Teamwork, Time Management, Work ethics, Collaboration.

LEADERSHIP AND TEAMWORK

Postdoctoral Research Fellow, *Life Sciences Institute, University of Michigan* *Feb 2025 – Present*

- Peer Reviewer for STAR Protocols (Cell Press), Neural Regeneration Research (Wolters Kluwer), Applied Biochemistry and Biotechnology (Springer Nature).
- Contributed to a brain tumor project to aid publication with a summer student whom I mentored/trained.

Graduate Research/Teaching Assistant, *University of Dayton* *Aug 2019 – Dec 2024*

- **Achievements:** Konopka Fellowship for Research (2024), **Sigma Xi Grants in Aid of Research**, Vision-related research (2023), **Best Poster Award** (2023, 2022), Graduate Showcase Award (**Best Ph.D. Research, 2023**), John J. Comer Graduate **Research Award-Biomedical Science** (2022), Graduate Student Summer Fellowship (**Ph.D. Research Grant**, 2020, 2021, 2022, 2023)
- Organised and hosted Career Starter Grant and K99/R00 grant workshop, University of Dayton Biology Seminar Series Lecture.
- Improved international graduate student resources (made laptops accessible for short-term or emergency needs) during my role in the Graduate Student Council as a **Graduate Student Representative**.
- Led **4 projects** to study the genetic regulation during craniofacial development and diseases like Alzheimer's and SARS-CoV2, resulting in **>5 publications** (PNAS, Scientific Reports, Autophagy Reports, Neural Regeneration & Research, StarProtocol, BioTechniques). Collaborated with the University of Pittsburgh scientists on novel projects, resulting in **2 publications**.
- Mentored **>10 undergraduate students and 3 high school students**, resulting in **3 publications** with undergraduate co-authors.
- Established a training protocol for incoming researchers and digitized all training material, lab protocols, and resources.
- Improved and established new research projects by training and mentoring incoming researchers – 3 graduate and 2 postdocs.

PROFESSIONAL/RESEARCH EXPERIENCE

Postdoctoral Research Fellow, *Life Sciences Institute, University of Michigan* *Feb 2025 – Present*

- Designing studies to assess the effect of neurodegenerative disease on behaviour and pathophysiology in sensory neurons.
- Conceptual design, experimental implementation, and documentation of research objectives by establishing novel protocols.

Graduate Research/Teaching Assistant, *University of Dayton* *Aug 2019 – Dec 2024*

- Identified novel gene regulatory mechanism that suppresses important cell death pathways during development and is implicated in cancers and other diseases.
- Discovered a SARS-CoV2 protein, a therapeutic target to be crucial for causing significant cell death through several mechanisms.
- Identified a minimal protein domain sufficient to cause craniofacial developmental defects during development.
- Oversaw day-to-day lab activities, tasks, and management for >5 years, resulting in cost-effective and efficient purchasing.
- Implemented and conducted curriculum for lab courses and delivered guest lectures to undergraduates and graduate students. Taught labs and gave guest lectures to undergraduates and graduates for 5 years.

Analyst, *Excelra Knowledge Solutions Pvt. Ltd., India* *Nov 2017 – Sep 2018*

- Performed custom variant and non-variant curations to identify biomarker, drug, and disease relationships in Lung Cancer.
- Implemented **quality control and quality assurance** measures to ensure data accuracy, resulting in a successful project delivery
- Promoted internally to perform **multiple job roles** like curator, reviewer, quality control, and quality assurance, and was recognized with an **award for exceptional performance**. Involved in several pilot projects for prospective/new clients.

Research Assistant, *Hyderabad Central University, India* *Sep 2018 – May 2019*

- Maintained cell lines and **established cancer mouse models** to study drug effects on signaling pathways.
- Collaborated on research projects and literature review efforts, resulting in **3 publications**.
- Conducted internal training on using reference manager software (Mendeley).

Analyst Trainee, *Zifo Technologies Pvt. Ltd., India* *Jan 2015 – Jun 2015*

- Created and designed clinical study electronic case report forms (eCRFs) and clinical study workflows on Electronic Data Capture platforms (Viedoc3 and Viedoc4), ensuring FDA-approved study design compliance and client requirements.
- Designed edit checks for each eCRF to reduce critical data-entry or front-end errors.
