

## Atia Sharmin Bonna, MBBS, MPH, MS (Epidemiology)

📍 Pleasanton, CA | 📞 +1-954-218-8561 | ✉️ atiasharmin72@gmail.com | US Permanent Resident

### SUMMARY

Healthcare data analyst and clinician-scientist with strong training in epidemiology, biostatistics, and healthcare research. Experienced in cleaning and managing large clinical and survey datasets, performing statistical analysis (SAS, R, SQL), and building interactive dashboards (Power BI). Skilled at extracting actionable insights from complex healthcare data (HIV, cognition, nutrition, child health) with a focus on improving patient outcomes and public health strategies.

### TECHNICAL SKILLS

- **Programming & Data Analysis:** SQL, R, SAS, Python (basic)
- **Visualization & Reporting:** Power BI, Tableau, Excel, REDCap, KoboToolbox
- **Healthcare Data Standards:** ICD-10 coding, HIPAA compliance, IRB/DSMB processes
- **Statistical Methods:** Logistic regression, cohort & case-control analysis, meta-analysis, effect size estimation
- **Clinical/Research Tools:** Trial protocols, decentralized data collection, wearable sensor/physiological data

### PROFESSIONAL EXPERIENCE

#### OPS Research Assistant (Remote)

UF | IFAS – Global Food Systems Institute (GFSI), Gainesville, FL | Feb 2025 – Present

- Clean and analyze large datasets on nutrition and cognition, ensuring accuracy and integrity.
- Developed **Power BI dashboards** to track research projects, funding, and outputs.
- Applied regression modeling and standardized effect size calculations across heterogeneous studies.
- Ensured strict compliance with HIPAA and IRB guidelines while handling sensitive health data.
- Collaborated with global stakeholders in academic–industry partnerships to deliver data-driven insights.

#### Graduate Researcher (MS Epidemiology)

University of Florida, Gainesville, FL | 2023 – 2024

- Conducted advanced data analysis on HIV, depression, anxiety, and sleep quality using **SAS and R**.
- Cleaned and validated survey datasets (N=300+) for logistic regression, chi-square, and stepwise models.
- Built visualizations and summary tables for thesis defense and peer-reviewed manuscript.
- Applied ICD-10 and DSM-based criteria for mental health variable classification.

#### Research Investigator

Projahnmo Research Foundation, Bangladesh | Oct 2022 – Dec 2022

- Managed **IRB and DSMB protocols** for clinical trials, including amendments and compliance reporting.
- Oversaw medical device calibration and **physiological data collection** in pediatric research.

- Coordinated donor reporting and collaborated with PI/Co-PI for trial implementation.

### **Public Health Epidemiologist**

*Save the Children, Dhaka, Bangladesh* | Jun 2021 – Sep 2022

- Designed and monitored survey-based studies on child morbidity, nutrition, and WASH.
- Cleaned and coded large field datasets; conducted statistical analysis in **R and Excel**.
- Produced dashboards and reports for donor agencies and internal leadership.
- Managed volunteers and field teams for large-scale knowledge intervention study.

### **Medical Officer**

*AZ Apparels Ltd., Dhaka, Bangladesh* | Aug 2019 – Mar 2020

- Delivered primary healthcare services to 600+ workers weekly and maintained EMR data.
- Conducted screenings, workplace hazard assessments, and monthly health reports.

### **EDUCATION**

- **MS, Epidemiology** — University of Florida (Dec 2024, GPA 3.71/4.00)
- **MPH, Epidemiology** — North South University, Bangladesh (Dec 2020, GPA 3.92/4.00)
- **MBBS** — University of Dhaka, Bangladesh (2019, GPA 3.00/4.00)

### **CERTIFICATIONS**

- HIPAA (2025)
- Good Clinical Practice (CITI, 2023)
- Human Subjects Research (CITI, 2023)
- Data Analysis with R (Coursera, 2022)
- Applied Epidemiology & Public Health Management Fellowship, CDC (2022)
- AI in Healthcare, Stanford Medicine (2025)
