

# Dr. Dhruvi Parmar

Boston, MA | 857-398-5189 | [Parmar.dhr@northeastern.edu](mailto:Parmar.dhr@northeastern.edu) | [Linkedin](#)

## EDUCATION

**Northeastern University**, Boston, MA

*Dec 2025*

*Master of science in Health Informatics*

*GPA: 4/4*

Relevant Coursework- Intro to Health Data Analytics, Biostatistics, Collection, storing & retrieval of data, Database Design and security, Patient Engagement Analytics, Project Management, Introduction to Health Informatics

**Tianjin Medical University**, Tianjin, China

*Mar 2017*

*Bachelor of Medicine and surgery*

Relevant Coursework- Medicine, Pharmacology, Radiology, Oncology, Clinical Trials, Community & Public Health medicine, Surgery

## SKILLS

**Programming skills :** SQL, R Programming

**Database Skills :** MS-SQL, MySQL, PostgreSQL

**Analytical Tools:** Power BI, Tableau, MS-Excel, MS-office (word, PowerPoint)

**Core skills:** Data Extraction, Data Manipulation, ETL, Data visualization, Electronic health records, HL7, EDI Claim, FHIR, HIPPA, RED-CAP, Clinical documentation, Denial Documentation, Medicare- Medicaid, Population Health and Intersectionality, Community health Assessment, ICD-10, Market research, Problem solving

## EXPERIENCE

**Business Intelligence Analyst** | eClinicalWorks, Westborough

*June 2025-Aug 2025*

- Automated 340B Pharmacy Program reports using SQL and ETL for 3+ clients, performing data analysis to ensure 100% compliance with federal regulations
- Created reports and visual dashboards in Tableau and EDC to monitor clinical workflows, patient progress, and safety documentation, supporting clinical quality tracking.
- Collaborated with clinical informatics, product, and QA teams to identify process improvements, streamline workflows, and reduce planning time by 15%.
- Gathered business and client requirements to support risk adjustment analysis for 5,000+ patient records, performing HCC mapping and coding validation to generate client-ready reports and ensure CMS compliance.

**HEDIS Medical Reviewer** | Mass General Brigham Health Plan, Boston

*Jan 2025 – May 2025*

- Abstracted data from EHR (EPIC) and QNXT(Cognizant) claims system for various HEDIS quality measures.
- Documented medical data in the COTIVITI, resulting in 100% accurate data for analysis, reporting, and auditing.
- Reviewed medical records with HIPPA regulation to ensure compliance with HEDIS measures by NCQA and CMS audit guidelines.
- Identified Errors in Physician data by constructing complex SQL queries and Advanced Excel techniques like VLOOKUP, pivot tables, nested functions etc.

**TA – PHTH2210-Foundations of Biostatistics** | Northeastern University, Boston

*Jan 2025 – Apr 2025*

- Conducted office hours and assisted 30+ students in using R for data wrangling, statistical modelling, and visualization to analyze public health datasets.
- Assisted with grading assignments and guided students in applying epidemiological methods in R, including survival analysis.

**Healthcare Consultant** | Aditya Health NGO, India

*Jan 2020 - Apr 2023*

- Analysed community-level data to determine social risks and needs of Plan members. Developed analytical reports and data visualizations to communicate findings to stakeholders effectively
- Created and delivered comprehensive end-user training materials, contributing to a 40% increase in hospital staff proficiency with new software systems, which improved overall workflow efficiency
- Leveraged Tableau to design and implement interactive dashboards visualizing key healthcare metric KPIs, facilitating data-driven decision-making for clinical teams during COVID-19

**Clinical Data Manager** | Jivan Path Hospital, India

*Oct 2018 - Dec 2019*

- Performed quality assurance checks on data collection methods using REDCap and CRFs, ensuring 100% data accuracy and improving overall trial reporting by 10%.
- Ensured data integrity and compliance with GCP by managing data exports and analyses from an EDC system. Collaborate with diverse clinicians to implement clinical workflow optimization, improving data use accuracy

## PROJECTS

**Healthcare Bed Capacity Analysis** | Collection and Retrieval of data

*Jan 2024 - Apr 2024*

- Analysed large dataset using R (readr, dplyr, ggplot2, sqldf) for exploration, visualization, querying & statistical analysis
- Created detailed data visualizations (boxplots, scatter plots) to identify trends, outliers, and effectively handled large datasets with missing values and duplicates
- Delivered data-driven recommendations (R) that improved ICU/SICU nurse-to-patient ratios by 17%, boosting patient care efficiency & clinical decision-making

**SQL Database Project** | Healthcare Data Management | Database Designing

*Sep 2023 - Dec 2023*

- Designed efficient relational database schema (ER diagram to SQL tables) for streamlined data management and improved retrieval
- Leveraged advanced SQL techniques (joins, subqueries, logic, aggregations) for analysis, boosting report speed and accuracy by 25%
- Analysed patient sleep disorders, billing to generate insights, improving treatment efficiency by 30% and data processing by 20%
