

KALYAN RAJ CHINIGI

(317) 492-7614 | kalyanrajchinigi@gmail.com | [LinkedIn](#) | Indianapolis, IN

Open to Relocate | Authorized To Work in U.S.

PROFESSIONAL SUMMARY

Analytical **Data Analyst** with 3+ years of experience in **Power BI, ETL pipelines, SQL, and healthcare data systems**, specializing in building dashboards, validating data accuracy, and optimizing reporting workflows. Adept at **DAX, Power Query, and data modeling**, with a track record of improving reporting efficiency by 20–35% and delivering actionable insights for cross-functional teams. Skilled at working with **large datasets, statistical tools, and healthcare informatics platforms (Epic, REDCap)** to uncover trends and drive data-driven decision-making.

TECHNICAL SKILLS

- **Visualization & Reporting:** Power BI (DAX, Power Query, report publishing), Tableau, Excel (Advanced)
- **Databases & ETL:** SQL Server, MySQL, ETL Pipelines, Data Warehousing
- **Programming & Analytics:** Python, R, Statistical Modeling
- **Healthcare Systems:** Epic, REDCap, eClinicalWorks
- **Standards & Compliance:** HIPAA, ICD-10, CPT, IRB, GCP

PROFESSIONAL EXPERIENCE

SM Interface Systems LLC

June 2025 – Present

Data Analyst

- Designed and optimized **SQL queries and ETL pipelines**, ensuring high data accuracy and integrity across governance reporting frameworks.
- Built and maintained **Power BI dashboards** leveraging **DAX and Power Query**, reducing manual reporting by 30% and enabling faster decision-making for leadership.
- Conducted thorough **data validation and quality checks**, cutting reporting errors by 20% and improving stakeholder confidence.
- Partnered with cross-functional teams to document and streamline **analytical workflows**, improving efficiency and reporting turnaround time.
- Developed and presented **executive-ready reports**, translating complex findings into clear insights for business leaders.

Gtechnologies Pty Ltd

Aug 2024 – May 2025

Healthcare Data Analyst Intern

- Analyzed **large EHR and clinical datasets** to support trial feasibility, applying **SQL and Python** for data extraction, cleaning, and modeling.
- Created interactive **Power BI dashboards** that reduced reporting turnaround time by 35% and improved enrollment modeling accuracy.
- Automated data transformation processes with **ETL routines**, ensuring consistency and compliance across global feasibility teams.
- Authored **data dictionaries, workflow documentation, and validation processes**, standardizing analytics practices across the organization.
- Collaborated with engineers and research teams to identify data needs and deliver scalable reporting solutions.

BioHealth Informatics Research Center – IU

Aug 2023 – May 2025

Graduate research Assistant

- Built Compiled and integrated multi-country datasets using **SQL, Python, and MySQL**, improving dataset usability and accuracy by 35%.
- Designed **Power BI dashboards** to visualize health demographics, policies, and infrastructure indicators, reducing reporting turnaround by 40%.
- Standardized **data collection and quality control workflows**, ensuring reproducibility and compliance with **IRB and GCP guidelines**.

Omega Healthcare | India

Dec 2022 – Jul 2023

Medical Coding Analyst

- Audited and validated **500+ medical records weekly**, ensuring compliance with ICD-10/CPT standards and reporting accuracy.
- Enhanced **data entry workflows** in EHR systems, contributing to quality data for billing and regulatory submissions.
- Collaborated with providers to address documentation gaps, improving governance reporting compliance by **12%**.

- Screened and recruited patients for a **lung cancer clinical study**, obtained informed consent, and coordinated follow-up visits in compliance with **IRB and GCP guidelines**.
- Collected and processed **biospecimens (blood/tissue samples)**, maintained accurate **case report forms (CRFs)**, and ensured high-quality source documentation.
- Monitored patient safety through **adverse event reporting** and protocol-driven assessments, ensuring timely escalation to investigators.
- Partnered with investigators, sponsors, and regulatory bodies on **regulatory submissions, data entry, and query resolution**, supporting trial integrity and audit readiness.

KEY PROJECTS

cfDNA Model for Liver Cancer Detection (Spring 2025):

- Collaborated on a cfDNA-based algorithm using **biomarker thresholds and machine learning** to support early hepatocellular carcinoma diagnosis.
- Integrated structured EMR and **LOINC-coded** biomarker data to develop ML-driven detection algorithms; enhanced PPV by 25% in pilot testing.
- Developed clinical decision rules using SNOMED CT in REDCap, boosting protocol adherence by 30%.

CDSS for Depression Management (Spring 2025):

- Designed a **rule-based CDSS** recommending first-line antidepressants using **SNOMED CT-mapped symptomatology and patient medication history**.
- Implemented in **REDCap with conditional logic**, which **increased clinician adherence to treatment protocols by 30%** in simulated testing.
- Optimized EMR data integration for algorithm alignment, improving diagnostic predictive value **by 25%**.

Lifestyle Interventions and Independence for Elders (LIFE) Phase III Trial: Multilevel Analysis of Cardiovascular Health and Health Equity Outcomes (Fall 2025):

- Conducted secondary analysis of a **multicenter RCT (n=1,600, ages 70–89)** using **STATA 18** to evaluate structured physical activity's impact on cardiovascular health and mobility.
- Applied **multilevel modeling** to assess changes in AHA's Life's Essential 8 (LE8) metrics (BMI, blood pressure, LDL, glucose, sleep), identifying disparities by race and gender.
- Prepared an AHA manuscript with advanced data visualizations, highlighting **equity-focused improvements across older adult populations**.

Insurance Cost Prediction (Spring 2024):

- Built **R-based linear regression models** to forecast out-of-pocket surgical expenses across multiple hospitals.
- Integrated claims data using **ICD-10 and CPT codes**, which increased model robustness and improved prediction accuracy **by 18%**.

Breast Cancer Survival Prediction (Fall 2023):

- Developed a **logistic regression model in Python** to predict 5-year survival rates using tumor stage, hormone status, and treatment history.
- Validated with **ROC/AUC evaluation**, achieving **92% model accuracy** and providing insights for clinical trial stratification.

EDUCATION

Indiana University, Luddy School of Informatics, Computing, and Engineering

MS in Medical / Health Informatics, CGPA: 3.72/4.00

Indianapolis, IN

Aug 2023 – May 2025

Jawaharlal Nehru Technological University Anantapur

Doctor of Pharmacy (Pharm.D.), CGPA: 8.1/10.0

Nellore, AP, India

Aug 2016 – Jul 2022

CERTIFICATIONS & AWARDS

- Certified Pharmacy Technician (CPhT) – Indiana Board of Pharmacy (valid through 2026)
- Advanced SQL for Data Analysts – LinkedIn Learning
- Excel for Business Analytics – IU Micro-Credential
- Microsoft Certified: Power BI Data Analyst Associate (In Progress)
- Epic Certification – ED Scribe
- HIPAA, IRB, and GCP Training – CITI Program
