

Sunith Kumar Kanakuntla

Clinical/Healthcare Data Analyst

sunithk96@gmail.com | [LinkedIn](#) | (940) 843 5929 | Denton, TX

Healthcare Data Analyst with 4 years of experience in managing clinical, operational, and administrative data within healthcare systems. Implemented in extracting, cleaning, and analyzing healthcare datasets using SQL and Python. Proficient in developing dashboards and reports using Tableau, Power BI, and Excel to support clinical outcomes, compliance monitoring, and operational efficiency. Prepared in managing EHR systems, medical coding standards, and healthcare interoperability formats including HL7 and FHIR. Strong understanding of HIPAA regulations and quality reporting frameworks. Holds a Master's in Computer Science with research focused on machine learning applications in healthcare.

PROFESSIONAL EXPERIENCE

Healthcare Data Analyst | Liquidia Med

Sep 2024 – Present

- Conducted in-depth analysis of patient-level data from internal EHR systems and external claims repositories to evaluate medication adherence, persistence, and treatment outcomes across respiratory and rare disease populations.
- Designed and maintained 5 Tableau dashboards to monitor provider performance metrics, treatment response patterns, and patient engagement trends, supporting real-time decision-making across clinical and commercial teams.
- Identified and resolved 200+ data inconsistencies during routine data audits improving the reliability of regulatory submissions, compliance reporting, and internal KPIs.
- Extracted, cleaned, and validated patient cohorts based on inclusion/exclusion criteria to assess historical treatment paths and facilitate feasibility analysis for 3 upcoming clinical studies.
- Developed monthly performance and outcomes reports for the market access and commercial strategy teams, contributing to a 10% improvement in payer coverage and formulary inclusion.
- Collaborated with cross-functional teams including medical affairs, HEOR, and regulatory to align data definitions and ensure consistency in outcome measures across studies and reports.

Healthcare Data Analyst | Omics International

Jun 2020 – Jun 2023

- Integrated clinical, billing, and operational data from 4 hospital systems, enabling standardized analytics across departments and supporting executive reporting for 12+ key performance indicators (KPIs).
- Created 7 Power BI dashboards to track metrics such as patient admission rates, lab result turnaround times, and staff utilization, reducing manual reporting efforts by over 60%.
- Performed monthly audits on patient records and coding data, identifying an average of 45+ discrepancies per cycle, which improved documentation accuracy and helped 98% compliance with internal quality benchmarks.
- Backed emergency care optimization efforts by analysing wait time trends and patient throughput data, contributing to a 15% reduction in emergency department delays across 3 facilities.
- Collaborated with cross-functional teams to standardize diagnosis and procedure codes across 3 regional hospitals, reducing claim denials by 12% and improving reimbursement timelines by 18%.
- Extracted and analysed patient data to support 5 departmental audits, contributing to successful accreditation reviews and meeting NABH compliance criteria.
- Developed and deployed automated SQL scripts for data validation and cleansing, reducing data processing time by 40% and minimizing manual intervention in monthly reporting cycles.
- Conducted trend analysis on diagnostic and treatment pathways for over 10,000 patient records, identifying service gaps that informed resource reallocation and improved patient flow efficiency by 20%.

PUBLICATIONS

Evaluation of Clinical Pharmacist's Role in Prescription Review at a Tertiary Care Teaching Hospital

13 April 2022

- Assessed over 1,000 inpatient prescriptions to identify documentation errors, drug duplications, and drug interaction risks across 4 clinical departments.
- Recommended 40+ pharmacist-led interventions, contributing to a 22% reduction in medication-related issues during the study period.

Comprehensive Review on the Diagnosis and Management of Lactose Intolerance

January 2022

- Analyzed data from 40+ peer-reviewed clinical studies exploring genetic, enzymatic, and dietary causes of lactose intolerance across multiple population groups.
- Summarized 6+ diagnostic techniques and 5 key treatment strategies, emphasizing patient-specific dietary management and enzyme therapy.

Comparative Literature Review on Misoprostol vs. Dinoprostone for Labor Induction

January 2022

- Reviewed findings from 25+ clinical trials comparing the safety, dosage, and induction success rates of Misoprostol and Dinoprostone in obstetric care.
- Guided evidence-based recommendations based on maternal response rates, adverse event frequencies, and cost comparisons across treatment groups.

EDUCATION

MS in Health Informatics, **University of North Texas**
Pharm. D, **MNR College of Pharmacy, Osmania University**

Aug 2023 – May 2025
Aug 2016 – Sep 2021

TECHNICAL SKILLS

- Programming & Data Analysis:** SQL, Python, Excel Macros, Pandas, NumPy
- Data Visualization & BI Tools:** Tableau, Power BI, Microsoft Excel – Advanced
- Healthcare Systems & Standards:** EHR Systems, HL7, FHIR, ICD-10, CPT, NABH, HIPAA
- Reporting & Automation:** Dashboard Development, Report Automation, Data Auditing, KPI Reporting
- Clinical & Claims Data:** Patient Cohort Extraction, Claims Analysis, Prescription Review, Medication Adherence Analysis
- Machine Learning & Research Tools:** ML Concepts – Applied in Healthcare, Literature Review, Data-Driven Clinical Evaluation
