Drashti Shah

PROFILE

Motivated and detail-oriented professional with a Master's in Management Information Systems and strong foundational skills in SAS programming, data analysis, and visualization. Certified in Google Data Analytics and trained in SAS programming, including PROC steps, joins, merges, and macros. Experienced in data cleaning and exploratory analysis. A creative problem-solver with a background in front-end development and WordPress customization, combining technical precision with visual design. Eager to contribute analytical and programming expertise in a dynamic data-driven role.

WORK EXPERIENCE

Systems Analyst - Part Time

tecBRIDGE, LLC - United States (July 2024 - Present)

- Collaborated with departments to analyze user requirements, enhancing system solutions.
- Design, develop, and implement system solutions to meet user requirements.
- Delivered expert technical support, resolving 95% of user issues on first contact, enhancing user satisfaction.
- Research and evaluate new technologies and systems.
- Ensured seamless system integration by collaborating with IT and operational teams across departments.

Front-End Developer

Brightness Group BV - India (Sep 2020 - July 2021)

- Engineered custom WordPress themes and plugins, improving website functionality and user engagement by 30% using HTML, CSS, and Bootstrap for unique, functional websites.
- Tested front-end code for cross-browser compatibility and responsiveness, optimizing performance and user experience.
- Provided code reviews and feedback to improve team practices and internal processes.
- Designed and customized front-end layouts for Magento and Shopify eCommerce sites.
- Implemented responsive design principles and optimized keywords for better SEO.
- Monitored website performance with Google Analytics for improvements.
- Used SASS and LESS for organized CSS development and custom JavaScript for enhanced front-end features.

Front-End Developer

WebCodeGenie Pvt Ltd. - India (Jan 2019 - May 2020)

- I developed landing pages, dashboards, and web applications using HTML, CSS, Basic JavaScript, and jQuery, applying scripts for animations and user customization.
- Collaborated with cross-functional teams to align design and backend requirements, implementing front-end enhancements based on project needs.
- Conducted thorough testing of front-end components, identifying and fixing bugs to ensure a consistent user experience.
- Participated in code reviews, contributing to best practices and optimization discussions while improving coding skills.
- Assisted in documenting project specifications and technical details for knowledge sharing and team onboarding.
- I used JavaScript for interactivity, dynamic functionality, and form validation.
- Created banners, graphics, and visual elements in Photoshop to maintain branding consistency and enhance design aesthetics.
- I managed source control and versioning using Git.
