PERSONAL SUMMARY

Graduate student in Health Data Analytics with hands-on experience in EHR systems (Epic, Cerner exposure), healthcare IT workflows, and clinical data management. Skilled in system documentation, workflow analysis, and healthcare analytics using tools such as Tableau, Power BI, and Google Cloud SQL. Adept at bridging clinical operations and technology to improve patient outcomes and operational efficiency.

EDUCATION

Master of Science in Health Data Analytics

Jan 2024 – May 2025

University of North Texas – Denton, TX

GPA: 3.75/4.00

Relevant Coursework: Data Analytics, Data Visualization, Big Data in Healthcare, Health Service Administration, Managed care, Marketing of health service, Google Cloud.

Bachelor of Dental Surgery (BDS)

Sep 2017 – April 2023

Mamata Dental College – Khammam, India

GPA: 3.25/4.00

TECHNICAL & HEALTHCARE CLINICAL SKILLS

Tools & Technologies: Tableau, Power BI, Google Cloud SQL, Microsoft Excel, Python.

Data Skills: Clinical data management, Healthcare analytics, EHR documentation, Predictive modeling, Data visualization.

Clinical Skills: Patient care, Community outreach, HIPAA compliance, public health program participation, Clinical trial support.

Soft Skills: Team collaboration, Leadership, Clinical research, Workflow analysis, Communication, Critical thinking, Attention to detail, Problem-solving.

PROFESSIONAL EXPERIENCE

Clinical Data Intern

April 2022 – April 2023

Mamata Dental College – Khammam, India

- Provided clinical care for 500+ patients across pediatric, adolescent, and adult age groups, including individuals with dental anxiety, managing procedures such as restorations, extractions, periodontal therapy, and trauma surgeries.
- Led 10+ rural health outreach programs, delivering essential dental care to underserved populations and screening 200+ individuals for oral diseases.
- Managed and updated 1,000+ patient records in EHR systems (Epic/Cerner exposure), ensuring HIPAA compliance and data accuracy, improved interoperability between departments.
- Educated 150+ community members through oral hygiene workshops, tobacco awareness campaigns, and preventive health talks.
- Managed appointment scheduling conducted structured follow-ups for 100+ recovery patients, and improved patient compliance tracking through Excel-based logs.
- Contributed to public health awareness programs and performed oral screenings during outreach camps in partnership with local health departments.
- Collaborated with healthcare IT developers to design data models, transformation pipelines, and system enhancements, improving clinical software data capture efficiency by 30%.
- Conducted clinical workflow analysis with 3+ cross-functional teams, helping align software requirements with real-world clinical operations.

- Authored 12+ clinical case reports for review panels, helping identify gaps in care coordination and opportunities for workflow optimization.
- Performed data cleaning and entry for 5+ research and operational datasets using Excel and hospital clinical systems; ensured data integrity and usability for analysis.
- Documented key metrics (patient volume, follow-up compliance, outreach impact) used in evaluating rural health program effectiveness.
- Maintained strict confidentiality and enforced HIPAA compliance across all data handling and documentation procedures.

RESEARCH & PUBLICATION

April 2022-April 2023

Researcher – IJARESM Journal

- Conducted an academic research study on the awareness of the ketogenic diet among 150+ dental students, examining behavior, knowledge levels, and influencing factors.
- Collected and analyzed both quantitative and qualitative data using Excel-based statistical tools (mean, chi-square, trend analysis).
- Published findings in the International Journal for Advance Research in Engineering, Science & Management (IJARESM), highlighting gaps in nutritional awareness and recommending integration into dental education.

HEALTH DATA ANALYTICS EXPERIENCE PROJECTS

- **FDA Analytics Dashboard** – Used SQL & Google Cloud Platform to analyze product recall trends. Built Tableau dashboards to visualize accurate patterns.
- **Food Surplus Prediction** – Used ML models (Random Forest, Linear Regression) on ReFED data; achieved 83% accuracy.
- **Medicaid Expansion Study** – Assessed impact on healthcare access; identified gaps & recommended policy changes.
- **Arizona Housing Market** – Applied regression & KNN on Zillow data to forecast price trends based on housing features.
- **WHO Outbreak Alert Analysis** – Assessed outbreak data using the WHO DON database; identified key determinants of spread. Proposed data-driven recommendations for faster crisis response.
