SUMMARY

Experienced and data-driven Business Analyst with over 5 years of experience delivering actionable insights, driving business growth, and optimizing operational efficiency through expert use of SQL, Power BI, and Tableau. Proven success in partnering with cross-functional stakeholders across product, health care, banking and operations to build data-centric solutions that improve performance, reduce churn, and enhance customer satisfaction. Skilled in designing business intelligence dashboards, defining KPIs, and supporting executive-level decision-making. Adept at handling large-scale datasets, conducting performance analysis, and influencing strategic initiatives in high-paced environments. Currently pursuing CBAP certification.

TECHNICAL SKILLS

- **Analytical & Data Skills:** SQL (Oracle, SQL Server), Tableau, Power BI, Python (Pandas), Advanced Excel (PivotTables, VLOOKUP, Macros), Data Visualization, Data Validation, Root Cause Analysis
- **Business Analysis & Documentation:** Requirements Gathering, BRD & FRD Creation, User Stories, UAT Testing, Process Flows (Visio), Functional Specifications, Gap Analysis, Risk & Compliance Documentation
- **Salesforce & Technical Platforms:** Salesforce (Reports, Dashboards, Flows, Objects), UiPath (RPA Concepts & Use Case Analysis), Oracle DB, Snowflake, Google BigQuery, Electronic Health Records (EHR)
- **Process Improvement & Operations:** Audit Remediation, SOX Controls, Risk Mitigation Strategies, Agile Process Optimization, Compliance Tracking, Operational KPIs
- **Project Management & Collaboration:** Jira, Confluence, TFS, Microsoft Visio, Agile (Scrum), Waterfall, Sprint Planning, Backlog Grooming, Cross-Functional Team Coordination
- **Certifications:** Google Data Analytics (Coursera), Salesforce Administrator (Trailhead), CBAP

PROFESSIONAL EXPERIENCE

Salesforce Business Analyst - Bank Of America| Dallas, TX

February 2025 – Present

- Documented and analyzed operational risks and regulatory gaps within Salesforce workflows related to risk case tracking and compliance reporting, contributing to a 30% reduction in compliance issues and enhanced SOX adherence.
- Worked closely with Risk Leads, Process Owners, and internal audit teams to define business requirements for Salesforce enhancements aimed at remediating audit findings and improving control processes.
- Configured and supported custom Salesforce dashboards and reports for risk and compliance teams, enabling real-time visibility into remediation progress and audit statuses across business units.
- Facilitated cross-functional collaboration across technology, risk, and compliance teams to design and implement risk mitigation strategies, resulting in a 25% reduction in audit resolution time.
- Partnered with internal teams to explore RPA (UiPath) use cases in Salesforce compliance workflows, identifying automation opportunities that helped reduce manual remediation by 15%.
- Led stakeholder communications across business and tech teams in global locations, ensuring alignment during sprint planning, user story grooming, and backlog refinement in Agile and Waterfall hybrid environments.
- Supported end-to-end delivery of risk and compliance projects on Salesforce by managing user stories, tracking JIRA tickets, and participating in UAT cycles, contributing to a 15% improvement in project delivery timelines.

Business Analyst -Assure Care LLC| Cincinnati, OH

July 2023 – January 2025

- Worked closely with QA, developers, and business stakeholders to improve production issue tracking, enhancing documentation and triage processes, and helping reduce resolution times by 18%.
- Analyzed data trends and performed root cause reviews on Utilization Management workflows, which led to a 10% drop in repeated errors and better decision accuracy for Aetna's process reviewers.
- Documented business and functional requirements by gathering input from users and stakeholders, producing BRDs that gave developers a clear roadmap for system updates.
- Built automated dashboards in Excel using pivot tables, conditional formatting, and macros to monitor UM KPIs, cutting reporting time by 40% and boosting team visibility.
- Wrote SQL queries in Oracle to extract and verify data used in financial and operational reporting, increasing accuracy and improving delivery times by 15%.
- Supported Tableau dashboard development by working with BI and data engineering teams, helping integrate Snowflake data and accelerate stakeholder insights by 30%.
- Participated in Agile ceremonies such as sprint planning and stand-ups, helping track bugs and blockers and contributing to a 10–20% faster turnaround on production fixes.

Business Analyst - Lewis University| Chicago, IL**February 2022- October 2022**

- Collaborated with 3+ stakeholder groups including IT, faculty, and administrators to gather and document business requirements for finance system enhancements, contributing to 10+ functional specifications.
- Queried and validated financial records across 1,000+ grant, salary, and sponsorship entries using SQL in Oracle databases, helping ensure 100% data accuracy for reporting and decision-making.
- Assisted in planning and executing user acceptance testing (UAT) for 2 major finance system releases by coordinating with developers and QA, contributing to a 95% test case pass rate pre-launch.
- Supported Agile ceremonies including 15+ sprint planning and stand-up sessions using Jira and Confluence, helping track 40+ tasks and improve team communication across the development lifecycle.

Business Analyst - HDFC Bank| Hyderabad, India**January 2019 - July 2021**

- Collaborated with cross-functional teams across 5+ business units to elicit and document business requirements for customer data systems, contributing to 12+ well-structured artifacts including RDs, FSDs, and UDs aligned with audit and compliance standards.
- Transformed high-level concept notes into actionable requirement documents under the guidance of senior analysts, reducing clarification loops by 30% during the development lifecycle.
- Analyzed 20+ change requests and third-party documents (e.g., Posidex) to assess system impact, flagging discrepancies early and supporting accurate requirement traceability during Agile sprints.
- Facilitated communication between business stakeholders, developers, and QA teams by addressing over 100 functional and technical queries, ensuring consistent understanding across all phases of the SDLC.
- Prepared and executed 30+ UAT test cases based on documented requirements, enabling early detection of critical defects and contributing to a 98% test case pass rate before production deployment.
- Maintained and updated project trackers, issue logs, and documentation in Excel and TFS across 3 simultaneous initiatives, helping project managers meet deadlines and improve stakeholder reporting accuracy.
- Created process flow diagrams using Microsoft Visio to support business requirement sessions and improve cross-functional understanding, especially among non-technical stakeholders.

Data Analyst - HDFC LTD | Guntur, India**May 2018 - August 2018**

- Supported the development of dashboards using Power BI and Qlik Sense to visualize customer behavior and financial performance, helping teams gain real-time insights for reporting and decision-making.
- Assisted in building predictive models using Python to analyze churn patterns and customer value, contributing to improved segmentation strategies and retention efforts.
- Automated recurring monthly reporting tasks using Excel macros and formulas, reducing manual reporting workload by 30% and improving overall report accuracy.
- Conducted profitability analysis under the guidance of senior analysts, helping uncover insights that contributed to a 10% increase in net revenue across select product lines.
- Collaborated with cross-functional teams to identify process bottlenecks and suggest optimizations, supporting data-driven improvements that enhanced operational efficiency by 20%.

EDUCATION**Lewis University** - Masters in Business Analytics August 2021- May 2023

Romeoville, Illinois

Courses: Visualizing Information, Quantitative Methods of Business, DBMS, Business Intelligence and Data Analysis

Acharya Nagarjuna University - B.Com Computers May 2019

Guntur, India

PROJECTS**Airfare Prediction & Analytics System – Book My Flight| Lewis University -Capstone Project**

- Analyzed 30,000+ flight records (48% Economy, 31% Business class) using Excel and Weka to uncover booking trends, fare patterns, and customer preferences by route, time, and airline (e.g., Vistara with highest fare share).
- Designed a relational database and star schema in SQL Server, generated insights through custom queries, business reports, and Tableau dashboards to support strategic pricing, demand forecasting, and customer segmentation.

Analyst Practicum (Automated Cash Benchmarking) | Lewis University – Capstone Project

- Developed an automated system to streamline quarterly SEC data extraction for companies using Google Big Query, ensuring flexibility to add new companies easily. Architected a cloud-based compliance database and seamless extract-transform-load pipeline for robust data modeling.
- Integrated data into Tableau for KPI visualization. The system reduced manual entry by 60% and improved forecasting capabilities enhancing team collaboration resulting in a 25% increase in financial precision.
