(484) 550-1015

Professional Summary

My name is Duane Newson, I graduated from ITWorks in June of 2023 where I kick-started my career in IT. Along the way, I had a couple contract opportunities for me to apply my skills from school and work hands-on and obtained new skills with each task I completed. I am a quick learner, I strive to give 100% in the work I do, and I always push myself out of my comfort zone to reach a higher level in my career. My ultimate goal is to grow my career in the field of Information Technology where my excellent analytical problem-solving skills and a strong work ethic can add value to an organization.

Work Experience

Certifications and Licenses

Google Cybersecurity by Google on Coursera

February 2025 to Present

Those who earn the Google Cybersecurity Certificate have completed eight courses, developed by Google, that include hands-on, practice based assessments and are designed to prepare them for entry-level roles in cybersecurity. They are competent in beginner-level Python, Linux, SQL, Security Information and Event Management (SIEM) tools, and Intrusion Detection Systems (IDS). They know how to identify common cybersecurity risks, threats, and vulnerabilities, as well as the techniques to mitigate.

Cisco Certified DevNet Professional

June 2023 to Present
