SUMMARY

Software Engineer specializing in **Python-based web scraping, AI-driven data pipelines, and scalable distributed systems**. Experienced in **Scrapy, Selenium, Kafka, Spark, and AWS** for high-performance data extraction and processing. Skilled in **vector databases (FAISS, Weaviate), Kubernetes, and Terraform**, with a passion for **real-time analytics and AI/ML deployment**.

EDUCATION

Master of Science in Software Engineering, San Jose State University 2023 - 2025

Software Systems Engineering, Data Mining, Enterprise Distributed Systems, Enterprise Application Development.

Bachelor of Engineering in Computer Science, Jawaharlal Nehru Technological University 2017 - 2021

SKILLS

Languages:	R, Python, Bash, Typescript, JavaScript, SQL, Java, PHP, C++, React.js, Angular, TailwindCSS, Node.js
Frameworks/Technologies:	Django, Flask, Spring Boot, React, Angular, REST, GraphQL, Kafka, Spark, Hadoop, TensorFlow, PyTorch
Tools/Platforms:	PostgreSQL, MySQL, MongoDB, Redis, AWS, Docker, Kubernetes, Terraform, CI/CD, Git, JIRA, Power BI, Tableau, Unix Scripting, pytest, JUnit

EXPERIENCE

Software Engineer June 2021 - July 2023
Siddhartha Institutions *Hyderabad, Telangana*

- **Built and optimized real-time data pipelines** using **Apache Kafka & AWS Glue**.
- Developed and deployed **RESTful & GraphQL APIs** for seamless data exchange.
- **Optimized PostgreSQL & MySQL queries**, improving data processing speed by **30%**.
- **Implemented CI/CD pipelines** with **GitHub Actions, Jenkins, AWS CodePipeline** for automated deployments.
- **Developed Unix shell scripts** for automated data ingestion and monitoring.
- **Implemented test automation** using **pytest & JUnit** to validate API performance.

PROJECTS

E-commerce Store

- Developed a **secure online shopping platform** using **React.js, Laravel (PHP), and MySQL**.
- Built **scalable RESTful APIs** for user authentication, product management, and order tracking.
- Deployed on **AWS with CI/CD pipelines, Docker, and Kubernetes**.
- Integrated **Redis caching**, improving page load times by **40%**.

Lung Cancer Prediction

- Developed a **ML-powered web app** achieving **93% accuracy** in cancer prediction.
- Built an **interactive Flask UI** for real-time risk assessment.
- Implemented **REST APIs** for seamless data flow between UI and ML model.
