

Eekshana Thirunagari

DATA ANALYST

+1 (682) 377-2499 • eekshana78@gmail.com • TX

SUMMARY

- 3+ years of Experience as a **Data Analysis** with functional and industrial experience with accomplished process and project responsibility such as **design, development, quality assurance, user acceptance, performance management** and **problem solving skills**.
- Involved in the entire data science project life cycle and actively involved in all the phases including **data extraction, data cleaning, statistical modeling** and **data visualization** with large data sets of structured and unstructured data. • Good experience in **Data Analysis, Data Migration, Data Validation, Data Cleansing, Data Verification**, identifying **Data Mismatch, Data Import**, and **Data Export**.
- Experienced in using **Django framework** and **python** libraries like **NumPy, Pandas, Matplotlib, SciPy, Scikit-Learn** and **NLTK**.
- Adapt and deep understanding of **Web Analysis, Statistical Modeling, Multivariate Analysis, Model Testing, Problem Analysis** and **Model Comparison**.
- Proficient in **Machine Learning Algorithms** and **Predictive Modeling** including Linear Regression, Logistic Regression, Naive Bayes, Decision Tree, Random Forest, Gradient Boosting, SVM, KNN, K-mean clustering. • Extensive experienced on business intelligence (and **BI** technologies) tools such as **OLAP, Data warehousing, reporting and querying tools, Data mining** and **Spreadsheets**.
- Familiarity with **Crystal Reports** and **SSRS** - Query, Reporting, Analysis and Enterprise Information Management. • Familiar with data and content migration using **SAS** migration utility for products that rely on metadata. • Hands on experience on **AWS** infrastructure services Amazon Simple Storage Service (**Amazon S3**) and Amazon Elastic Compute Cloud (**Amazon EC2**).
- Experience in implementing data analysis with various analytic tools, such as **Anaconda, Jupiter Notebook, R** and **Excel**.
- Strong Experience in database design using **PL/SQL** to write Stored Procedures, Functions, Triggers and strong experience in writing complex queries, using **Oracle, SQL Server, PostgreSQL** and **MySQL**.
- Good Working experience with **NoSQL** Database like **MongoDB**.
- Proficient in developing different types of **Tableau Reports** and **Tableau Dashboards**, working at the data model to fit **Tableau** needs and discovering data by **Tableau** to best answer the business questions. • Good experience with Source and version control system like **JIRA** and **Git**.
- Strong analytical, problem solving and diagnostic skills, with the experience to drive the business initiatives from conception to realization.

SKILLS

SDLC, Agile, Scrum, Waterfall, R, Machine Learning, Deep Learning, Python, NumPy, Pandas, Sci-kit Learn, Matplotlib, Seaborn, NLTK, Power BI, Tableau, Django, Anaconda, Jupiter Notebook, SQL, PL/SQL, Google Analytics, Amazon Web Services (AWS), Azure, PostgreSQL, MySQL, SQL Server, Oracle, MS Access, SAS Visual Analytics, Teradata, SSAS, SSIS, SSRS, Informatica, JIRA, Git, MS Visio, Advanced Microsoft Excel, MS PowerPoint, MS Office, Windows, Linux, Unix

EDUCATION

Bachelors in Electronics & Communication Engineering 08-2017 to 07-2021

JNTU

EXPERIENCE

- Used **agile scrum** methodology and strategies for software development and to provide quick and feasible solutions.
- Implemented data analysis with **Django** framework.
- Participated in all phases of **data mining, data collection, data cleaning**, developing models, **validation, visualization**, and performed **Gap analysis**.
- Worked on **data transformation** and accessed raw marketing data in varied formats with different methods for analyzing and processing.
- Used **Pandas, NumPy, Seaborn, SciPy, Matplotlib, Scikit-learn** and **NLTK** in **Python** for developing various machine learning algorithms.
- Applied logistic regression in **Python** and **SAS** to understand the relationship between different attributes of dataset and causal relationship between them.
- Created customized **SQL** Queries using **MySQL** Management Studio to pull specified data for analysis and report building in conjunction with **Crystal Reports**.
- Used **Power BI, Power Pivot** to develop data analysis prototype, and used Power View and Power Map to visualize reports.
- Imported data from multiple data sources into Excel workbook, created relationships between heterogeneous data, created calculated columns and measures using VLookup and formulas, built **PivotTables** and **Pivot Charts** using **PowerPivot** skill.
- Worked in **Amazon Web Services** cloud computing environment.
- Performed data analysis using **google API's** and created visualizations such as pie charts, waterfall charts and displayed in the web application.

Blue ware Technologies and services pvt Ltd
Role: Associate Data Analyst

12-2020 to 09-2022

- Involved in complete Software Development Life Cycle (**SDLC**) process by analyzing business requirements and understanding the functional work flow of information from source systems to destination systems. • Used **DjangoREST** framework and integrated new and existing API's endpoints.
- A highly immersive Data Science program involving **Data Manipulation & Visualization, Web Scraping, Machine Learning, Deep Learning, Python programming, SQL**, Unix Commands and **NoSQL**. Databases. • Enforced referential integrity in the **OLTP** data model for consistent relationship between tables and efficient database design. • Used **Python, R, SQL** to create Statistical algorithms involving Multivariate Regression, Linear Regression, Logistic Regression, PCA, Random forest models, Decision trees, Support Vector Machine for estimating the risks of welfare dependency.
- Developed complex **SSIS** packages as to automate table usage for dimension processing, so as to create multiple **OLAP** databases to maintain version history of security.
- Performed data queries to generate reports and used advanced excel functions to generate spreadsheets and **pivot tables**. Created dashboards in **power pivot**.
- Create data Stories, Reports and visualizations using **Tableau** and **Power BI**.
- Used **JIRA** for bug tracking and fixing in project management.
- Created **SQL** queries for extracting data as required by the PM and other business stakeholders. • Performed Ensemble methods to increase the accuracy of the training model with different Bagging and Boosting methods.
- Created numerous dashboards in tableau desktop based on the data collected from zonal and compass, while blending data from MS-excel and CSV files, with MS SQL server databases.
