

TECHNICAL SKILLS

JavaScript, Node.js, Express.js, React.js, Redux, Python, Flask, Java, Spring Boot, PHP, SQL, PostgreSQL, SQLAlchemy, MySQL, NoSQL, HTML, CSS, APIs, Docker, Jenkins, Datadog, Jira, VSCode, IntelliJ IDEA.

SUMMARY

Results-oriented Full-Stack Software Engineer with experience in developing responsive web applications and collaborating with cross-functional teams to deliver optimized code and seamless user experiences. Skilled in front-end and back-end technologies, including JavaScript, React, Node.js, Python, Java, and SQL-based databases. Adept at Agile collaboration, CI/CD workflows using Jenkins for building staging environments and monitoring with Datadog. Committed to continuous learning, with a strong portfolio of personal, freelance, and team projects that demonstrate technical growth and a passion for software craftsmanship.

PROFESSIONAL EXPERIENCE

Java Full-Stack Engineer Trainee / HTD Talent - February 2025 - Present

- Participating in an immersive Java Accelerator Program focused on building enterprise-level full-stack applications.
- Developed end-to-end projects using Java (Spring Boot, Spring MVC) and React.js.
- Experienced in applying multi-layered architecture (Controller, Service, Domain, Data Access (DAO/Repository)).
- Applied OOP, SOLID principles, and MVC architecture to create scalable systems.
- Integrated JDBC, MySQL, and practiced unit testing with JUnit.
- Built RESTful APIs, implemented secure HTTPS communication, and handled JSON data.
- Collaborated in Agile teams, using Git, Docker, code reviews, and Maven for CI/CD workflows.
- Created a reservation system and e-commerce platform clone with real-time features

Junior Web Developer / G/O Media - August 2023 - November 2024

- Assisted in developing responsive websites and web applications using HTML, CSS, JavaScript, and modern frameworks like React and Node.js, adhering to best practices and coding standards.
- Wrote, maintained, and reviewed clean, efficient code in Java and Node.js, addressing bugs and improving functionality, scalability, and code reusability.
- Executed rigorous quality assurance testing for major media websites, including Kotaku, Quartz, The Root, Jalopnik, Gizmodo, The Onion, and others, achieving a 60% reduction in reported bugs and ensuring high-quality user experiences across diverse platforms.
- Provided support in troubleshooting and resolving technical issues, enhancing website reliability, and ensuring seamless functionality.
- Used Jenkins to build staging environments, enabling smooth deployment processes, and Datadog for real-time monitoring and performance tracking, proactively identifying and resolving issues.
- Kept up-to-date with industry trends and best practices in full-stack development and quality assurance.
- Collaborated with product and design teams to implement user interface designs, contributing to an enhanced user experience.

Software Engineering Peer Mentor / Springboard - May 2023 - December 2023, Volunteering

- Provided guidance and support to a cohort of aspiring software engineers, helping them troubleshoot technical challenges during a study program.
- Answered students' questions in Slack. Posted helpful resources & encouraged students weekly by sharing learnings, & best practices.
- Organized and led code exercises, fostering collaborative problem-solving, sharing best practices, and developing optimal solutions through discussions among students.

Project Lead & Full-Stack Developer & Designer / Development Center - Formats - September 2022 - Present, Freelance

Building a full-stack Coaching Website for the multi-format development center "Formats". This website is about professional coaching for students and adults, personal coaching for kids, and corporate business training.

- Designed and developed a full-featured company website from scratch using JavaScript, React, Node.js, Express.js, PostgreSQL, and Bootstrap.
- Managed the entire development lifecycle from idea to deployment, ensuring code quality, performance, and maintainability.
- Created responsive and user-friendly UI/UX layouts.
- Ensured application stability, performance, and security through testing and monitoring.
- Provided technical guidance and mentoring.
- Incorporated industry trends and client feedback.
- Maintained code quality and best practices.

Full Stack Software Engineering Track - Fellowship / Springboard - February 2021 - November 2022

A 700-hour course covers key aspects of front-end web development, back-end web development, databases, data structures, and algorithms, with 1:1 industry expert mentor oversight, and completion of 4 in-depth portfolio projects. Modules include learning resources, practice exercises, projects, and career-related coursework.

Mastered skills in front-end web development, back-end web development, databases, and data structures and algorithms.

- Completed training in programming languages such as JavaScript, DOM manipulation, and the JavaScript object model, Node.js, Express.js, SPA framework React, Redux, HTML, CSS, designing and consuming RESTful APIs, Ajax, jQuery, Python, Flask, SQL, PostgreSQL, Git/Terminal.

- Implemented integration of REST APIs and third-party services (Amadeus, Weather, Spoonacular).

Associate Banker Teller / JPMorgan Chase & Co - September 2017 - September 2019

The initial contact for many customers as they complete their banking needs to work toward their financial goals. Build meaningful relationships with clients and educate customers on Chase banking technologies. Calls to the back office for clients for their problem solving, and help them with everyday transactions. Being an interpreter Rus-Eng-Rus for my colleagues with clients. Received recognition from colleagues for creating great customer experiences by always being courteous, professional, and customer-obsessed.

SOFTWARE DEVELOPMENT PROJECTS

All projects developed the mobile layout and created a media query for tablet and desktop versions.

- **Development Center - Formats** / Link <https://formats72.vercel.app/> and <https://github.com/ElenkaSan/frontend-Formats>

Building a full-stack Coaching Website for students & adults, personal coaching for kids, and corporate business training. Developed wireframes based on client requirements, ensuring a seamless user experience using JavaScript, React, Node.js, Express.js, PostgreSQL, & Bootstrap. Implemented a data fetching and parsing system to extract & format analytic data, then integrated it into React components.

- **Recipe-Tips** / Link <https://recipe-tips.onrender.com/>

Designed and developed a website that promotes a healthy lifestyle with food recipe search, where users can sign up, save recipes, add notes, food jokes, and create customized workouts. Implemented design and interaction using JavaScript, Bootstrap, Font Awesome, and raw CSS. Utilized HTML templates with Jinja and implemented forms using WTForms. Developed APIs following RESTful standards and implemented Flask WtForm for CSRF security, secure back-end APIs using SQL server-side and Python Flask with session authentication. **Technology:** Python, Flask, SQLAlchemy, RESTful APIs.

- **React-Jobly** / Link <https://tearful-cactus.surge.sh/>

An application that allows users to register, log in, search, explore, view companies, apply for listed jobs, & edit their profiles.

Technology: A single-page React, Node.js, Express.js. The app implements-based authorization using JWTs, & manages data validation with JSON schema.

- **Vacation-Time** / Link <https://changeable-laugh.surge.sh/>

This is a full-stack, responsive application allowing users to search for flights and hotels, check the weather, users can sign up, then add notes, and activate countdown trip dates. Designed, built, and implemented React.js components for the web application's front-end, scalable Express.js APIs, following DRY principles and RESTful standards. Implemented secure authentication and authorization using JWT authentication and Bcrypt for password hashing. Utilized PostgreSQL as the backend database for efficient data storage and retrieval. **Technology:** React, Node.js, Express.js, RESTful APIs.

- **Don't wreck my house** / Link <https://github.com/ElenkaSan/Don-t-wreck-my-house>

Don't Wreck My House is a reservation management system inspired by Airbnb, enabling administrators to manage guest stays with full CRUD functionality and robust double-booking prevention. Built a layered backend using Spring Context for dependency injection, JdbcTemplate repositories for data access, domain services for business rules (validation, booking status), and RESTful controllers for API endpoints. Incorporated global exception handling and custom error responses to ensure reliability.

Technology: Java, Spring Context, JDBC Template, MySQL, Maven, JUnit 5.

- **Catch A Ride** / Link <https://github.com/ElenkaSan/Catch-a-ride>

Designed and developed a full-stack car rental and leasing web application that allows users to browse available vehicles, create and manage bookings, and view their profile with active reservations. Implemented responsive UI using React, Bootstrap, and custom styling. Built secure RESTful APIs with Spring Boot and Java, managing business logic with services and data persistence through JDBC and MySQL. Enabled file uploads and storage of vehicle images in AWS S3, with user/admin role-based access and dynamic rendering of forms and booking history. **Technology:** Java, Spring Boot, JDBC, MySQL, React, Bootstrap, RESTful APIs.

EDUCATION

Springboard, Software Engineering Program / Certificate. Intensive course in Software Engineering methodologies and technologies.

AWS Fundamentals: Building Serverless Applications / Certificate

IBM Skills Network, Introduction to DevOps / Certificate

Forge, Software Engineering Lite Virtual Experience Program, JPMorgan Chase & Co. / Certificate

Google, Foundations of User Experience (UX) Design, and Start the UX Design Process / Certificates

Tyumen State University, Institute of State and Law /Bachelor's Degree. Major field of study: Economics. Expert in Taxation.

ADDITIONAL SKILLS

Languages: English, Russian. **Hobbies & activities:** Painting & creative handmade products from my artworks, tourism & travel.
