SUMMARY

Seasoned Data Analytics & Business Intelligence professional with 5 years of experience transforming complex data into actionable insights. Expert in SQL, Tableau, Power BI, ETL processes, and cloud data environments. Proven track record of implementing data-driven solutions that enhance decision-making capabilities and drive business growth across banking and retail sectors.

SKILLS

- Data Visualization: Tableau Desktop/Server, Power BI, Excel Advanced Visualizations
 - Database Technologies: SQL, Snowflake, AWS Redshift, Azure SQL Database
 - ETL/Data Integration: Alteryx, SSIS, Azure Data Factory
 - Data Modeling: Erwin Data Modeler, Dimensional Modeling
 - Project Management: Jira, Agile Methodologies, Waterfall
 - Programming: Python, DAX, SQL, SAS
 - Cloud Platforms: AWS, Azure
-

PROFESSIONAL EXPERIENCE

PNC Bank

Dec 2023 – Present

Pittsburgh, PA

Data Analyst/Tableau Developer

- Engineered a comprehensive Tableau dashboard suite that consolidated data from 7 disparate systems, reducing executive reporting time from 40 hours to 4 hours weekly while improving data accuracy by 98%.
- Developed SQL-optimized data extraction procedures which decreased ETL processing time by 76%, enabling real-time fraud detection capabilities that prevented an estimated \$4.2M in potential losses annually.
- Optimized data storage and retrieval processes in Snowflake, achieving a 40% increase in data processing efficiency.
- Automated data cleansing and transformation workflows using Alteryx, reducing manual data preparation time by 35%.
- Designed Excel-based financial models with dynamic SQL connections that streamlined monthly budget forecasting, reducing process time from 5 days to 7 hours.
- Developed Jira-integrated Tableau dashboards that improved project delivery rates by 28% through real-time resource allocation and milestone tracking visualizations.
- Created custom Alteryx workflows that automatically reconciled daily transaction data, identifying discrepancies exceeding \$500K within 30 minutes versus the previous 24-hour detection window.

The Home Depot
Atlanta, GA

Jul 2021 – Nov 2023

Data Analyst/Power BI Developer

- Designed Excel-based inventory forecasting models with SQL database connections that reduced excess inventory by 31% while maintaining 99.7% product availability.
- Implemented SQL-based data quality monitoring system that improved data accuracy from 82% to 97.5%, directly enhancing forecast reliability.
- Developed automated ETL workflows using Alteryx reduced manual data processing by 93%, enabling analytics team to focus on insight generation rather than data preparation.
- Created comprehensive Power BI sales territory dashboards that identified \$3.8M in untapped market potential through geospatial analysis of customer distribution.
- Collaborated with cross-functional teams via Jira, ensuring timely delivery of data projects and improving team collaboration by 15%.
- Collaborated with stakeholders to define data requirements, ensuring alignment with business objectives and enhancing reporting relevance.
- Developed and executed test plans for data validation, ensuring accuracy and reliability of analytical outputs.
- Utilized SQL and Power BI to analyze customer feedback data, identifying key areas for improvement and increasing customer satisfaction scores by 18%.
- Implemented an Erwin data model for a new product information management system, improving data consistency across channels by 40%.

Morgan Stanley
New York, NY

Aug 2020 – Jun 2021

Data Analyst/Business Intelligence Developer

- Designed custom SQL functions that automated complex financial calculations, reducing errors in regulatory capital adequacy reporting from 12% to 0.3%.
- Established data quality monitoring procedures using SQL validation checks that improved data accuracy from 78% to 96%, directly enhancing decision reliability.
- Created early Tableau prototype implementations for executive dashboards that reduced monthly reporting preparation time from 160 hours to 40 hours.
- Designed Tableau dashboards tracking teller efficiency metrics, identifying productivity improvement opportunities that reduced transaction processing times by 32%.
- Utilized SQL and Tableau to analyze customer transaction patterns, uncovering insights that led to the development of new financial products and a 12% increase in revenue.
- Implemented a Power BI report for ATM network optimization, leading to a 25% reduction in maintenance costs and a 15% improvement in ATM availability.
- Developed a SQL-based customer profitability analysis model, identifying opportunities to optimize product offerings and increasing customer lifetime value by 18%.
- Created an automated ETL pipeline using SSIS for daily balance sheet reconciliation, reducing processing time from 4 hours to 30 minutes and ensuring 99.9% accuracy.

EDUCATION

Doctor of Philosophy (Ph.D.) Science of Business Administration - Financial Engineering
University of Electronic Science and Technology of China, China (2019-2023).

Master of Science (MSc.) Management Science and Engineering - Corporate Finance
University of Electronic Science and Technology of China, China (2016-2018).

Bachelor of Science (BSc.) Business Administration - Banking and Finance
Kwame Nkrumah University of Science and Technology, Ghana (2012-2014).
