San Antonio, TX | 716.790.0602 | elizabethmaycecelia@gmail.com | [Linkedin](#) | Portfolio Available Upon Request

SUMMARY

Mission-driven professional transitioning into data science and analytics, with a strong foundation in education leadership, coaching, and program management. Experienced in designing data-informed professional development, analyzing behavioral trends, and using data to drive student and teacher success. Certified in data science and honed skills in Python, SQL, and data visualization. Adept at combining analytical thinking with clear communication and a human-centered approach.

SKILLS & CORE COMPETENCIES

- Python, Pandas, Numpy, Seaborn, Matplotlib
- Excel, SQL, BI reporting/Tableau
- Microsoft Azure
- Jupyter
- Data visualization and presentation
- Compiling and cleaning data
- ETL (Extract, Transform, Load) Process
- Data wrangling
- Decision trees (eg linear regression, classification, clustering (K-means))
- Feature engineering
- Ensemble Methods (Bagging, Boosting, Stacking)
- Excel (Pivot Tables, VLOOKUP, Index-Match, Macros)
- Google Cloud Platform (BigQuery, Cloud Storage)
- AWS (S3, RDS, Athena)
- GitHub
- Jupyter Notebooks
- Google Colab
- Slack / Teams
- Project management
- Critical thinking
- Communication and collaboration
- Translating complex ideas into clear, accessible language
- Leading professional development sessions and workshops
- Facilitating constructive feedback and coaching conversations
- Public speaking and presentation skill

EDUCATION

University of Texas; San Antonio - Institute of Data

July 2025

Certified Data Science and Artificial Intelligence Professional (CDSAIP)

- Mathematics, statistics and programming for data science
- Databases & API
- Machine learning – regression, classification, clustering
- NLP
- AI & deep learning
- Cloud computing

DataCamp

2025

- Introduction to Python
- Introduction to SQL
- Intermediate Python
- Statistical Thinking in Python (Part 1)

EXPERIENCE

GREAT HEARTS TEXAS

Professional Development Leader / Consultant — Great Hearts TX

08/2024–Present

- Designed and delivered data-informed professional development sessions for K–8 educators
- Analyzed classroom and school culture data to support teacher coaching and strategy development
- Collaborated with school leaders to align metrics with academic goals

GREAT HEARTS FOREST HEIGHTS

Dean of Students — Great Hearts Forest Heights, San Antonio, TX

07/2022–Present

- Managed student discipline systems and tracked behavioral trends using school data
- Led school-wide initiatives (House system, intramurals) and monitored participation metrics
- Used attendance and referral data to inform student support strategies

3rd Grade Lead Teacher & Team Lead — Great Hearts Forest Heights

07/2019–06/2022

- Coordinated curriculum planning and performance evaluation across grade level
- Developed and refined student performance tracking tools for progress monitoring
- Supported virtual learning using Google Suite and performance dashboards

PROJECTS

Project 1: Predicting Disease Outbreaks Based on Weather | Institute of Data

- Exploratory Data Analysis (EDA)
- Cleaning and Preparing Data
- Using Visualization Methods (Histograms, Heatmaps)

Project 2: Predicting Movie Ratings Before Release | Institute of Data

- Exploratory Data Analysis (EDA)
- EDACleaning and Preparing Data (Hot-encoding, imputing null values, reducing outliers)
- Visualization (Heatmaps, histograms)
- Modeling (Linear Regression, Ridge Regression, Lasso Regression, Random Forest)
- Evaluating Models and Making Predictions

Project 3: Predicting Student Math Scores | Institute of Data

- EDA
- Cleaning and Preparing Data (Imputing null values, reducing outliers)
- Visualization (Heatmaps, histograms)
- Modeling (Linear Regression, Random Forest, Gradient Boosting, Hyperparameter tuning, Bagging, Stacking)
- Evaluating Models and Making Predictions
