Career Profile

Data Analytics professional with 2 years of experience working on analytics projects with finance, strategy, and IT services teams within project based and discreet manufacturing organizations; expertise in predictive modeling.

Qualifications

R | Python | SAS | MATLAB | SQL | Advanced Excel | Tableau

Machine Learning Skills: Linear Regression, Logistic

Regression, Clustering, Naïve Bayes, Random Forest,

Decision tree, Text mining, Time Series modeling, NLP

Experience

Contract Data Scientist

November 2016 to Present

GE Power and Water

- Mined complex project data to provide systems-related advice
- Worked with IT services team to manage statistical data and create predictive models for project duration, effort hours, lead times, and cost analysis
- Executed, analyzed, and prepared reports to respond to the needs of requisition managers as well as on-site engineers
- Worked closely with both engineers and IT services team(s) to determine the most appropriate and effective analytics approaches
- Utilized a variety of systems and software tools to compile and prepare reports, graphs and charts of data analyzed; primarily R, Python, SQL, Excel, Tableau, ServiceNow, as well as older legacy systems

Business/ERP Analyst

DesleeClama North America, Inc.

May 2015 – October 2016

- Worked as Schaeffer Productique ERP and SAP Analyst
- Worked with Finance, Operations, Sales, IT, and other BSA's to ensure successful data integration, rollout, go-live, training and support of SAP R/3 7.4
- Worked on teams comprised of members from Finance, IT and Sales to merge and normalize master data from two different ERP systems into SAP
- Worked on a customer complaints taskforce to map the workflow of current CRM: Customer Complaints process, setup BPM configurations in Schaeffer ERP accordingly to ultimately maintain a customer focused approach to continuous improvement
- Lead the initiative to improve QA processes and procedures through extensive QA software training
- Solved several internal logistics issues created from years of poor warehousing procedures combined with inexperienced mapping of warehouse locations and handling units to the Schaeffer ERP system
- Managed a training program for previous ERP system, Schaeffer Productique. Created documentation and administered both classroom and hands on training for employees from all organizational levels
- Supervised and supported a major production management software change

Information Resource Management Intern

City of Greer

March 2015 – May 2015

- Collected city administration requirements, determine technical issues, and design reports to meet data analysis needs
- Identified new sources of data and methods to improve data collection, analysis, and reporting
- Collected, analyzed, and reported data through SAS to meet city needs

Education and Training

Bachelor of Arts: Informatics, May 2015 University of South Carolina Upstate

Informatics with Business Minor core 3.04/4.0

Skills

Big data, Business Analyst, Business Strategy, Clustering, Costing, Forecasting, Machine Learning, Excel, Modeling, NLP, Project Management, Python, SAS, Simulation, SQL, Strategy, Tableau, VBA
