

ESHWAR DAS KUNDEN

(779) 703-9161 | eshwarked.98@gmail.com | [linkedin.com/in/eshwar-ked05](https://www.linkedin.com/in/eshwar-ked05)

Summary

Data Analyst with 5+ years of experience delivering actionable insights through BI dashboards, data modeling, and automation. Proficient in SQL, Power BI, Tableau, Python, and Excel with strong domain knowledge in healthcare and services. Experienced in designing ETL pipelines, data visualization, and statistical analysis to support strategic business decisions. Well-versed in HIPAA, GDPR, and Basel III compliance with a proven ability to translate complex datasets into measurable outcomes.

Key skills

Tools:

Excel (VLOOKUP, Macros, VBA), SQL, Python (Pandas, NumPy, Scikit-learn, TensorFlow), Tableau, Power BI, SAS, SPSS, Informatica, SSIS, Snowflake, Oracle, MySQL, Hadoop, Spark, AWS Glue, Azure Data Lake, Redshift, REST APIs, Postman, JIRA, Confluence

Core Competencies:

Data Analysis, ETL Automation, Data Visualization, Statistical Modeling, Machine Learning, Forecasting, KPI Reporting, Stakeholder Communication, Regulatory Compliance (HIPAA, GDPR, Basel III, AML/KYC), Data Governance, Big Data Processing, Dashboard Development, Risk & Performance Analysis

Professional Experience

Data Analyst | Data Sense IT – NC |

Feb 2024 – Present

- Improved data pipeline efficiency by 30% using Informatica and SSIS; integrated Snowflake, Oracle, and Azure Data Lake for enterprise-wide reporting.
- Boosted data quality by 20% by implementing validation rules and HIPAA-compliant governance checks.
- Designed Tableau dashboards with drill-down features for population health KPIs, enabling proactive stakeholder decisions.
- Executed EDA on health datasets using Pandas, SAS, and SPSS to uncover trends supporting clinical strategy.
- Built and deployed ML models (TensorFlow, Keras) to forecast patient outcomes; supported data-driven care planning.
- Integrated claims, EMR, and EHR data sources for unified patient profiles, enhancing analytics across departments.
- Utilized Hadoop and Apache Spark to accelerate queries on high-volume datasets by over 50%.
- Applied Excel (macros, pivot tables) to automate recurring reports; reduced manual reporting workload by 25%.

System Analyst | Hucon Tech – India |

Jun 2018 – Jan 2022

- Enhanced credit risk analysis accuracy by 30% via predictive models using Scikit-learn and TensorFlow.
- Extracted business-critical financial data from MySQL and Oracle with advanced SQL queries.
- Built centralized ETL pipelines with SSIS to support decision-making and ensure data consistency.
- Developed Power BI dashboards for executive KPI reporting with real-time financial metrics.
- Ensured Basel III and RBI compliance by aligning all reporting workflows with audit requirements.
- Reduced manual reporting errors through automated Python and VBA scripts.
- Architected AWS-based data lake with Glue and Redshift, cutting data retrieval latency by 40%.
- Conducted A/B testing to assess credit policy strategies; delivered actionable insights to risk teams.
- Collaborated with compliance teams to ensure AML and KYC policies were enforced in data operations.
- Assisted in regulatory reporting for RBI and SEBI with validated financial data outputs.

Education

Masters in Business Analytics, Lewis University, IL – Dec 2023 | **CGPA: 3.44/4.00**

Bachelors in Electronics & Communication JNTU, Hyderabad – Jun 2019 | **CGPA: 8.75/10**

Projects

Sales Forecasting (Python): Time series models with TensorFlow

Executive Dashboards: Power BI reports with RLS & SSAS

ETL Automation: Airflow + Talend pipelines

Agent Segmentation: K-Means clustering for targeting

Certifications

Microsoft Certified: Power BI Data Analyst | Google Data Analytics | SQL for Data Science – Coursera
