📄 PROFILE

A highly motivated Data Science major with an emphasis on Economics at the University of California Berkeley. Strong communication with problem-solving skills, combined with a passion for leveraging data-driven solutions.

🎓 EDUCATION

University of California, Berkeley, Data Science

August 2021 – May 2025

- Calculus I & II
- Linear Algebra & Differential Equations
- Foundations of Data Science
- Computational Structures in Data Science
- Data Structures
- Principles and Techniques of Data Science
- Principles of Economics

🧠 SKILLS

- Data Analysis
- SQL
- Python
- Jupyter
- Numpy
- Java
- Pandas
- Exploratory Data Analysis
- Power BI
- DAX Programming
- Data Visualization
- Seaborn
- Matplotlib
- Sklearn

🏢 WORK EXPERIENCE

Student Technology Consultant, UC Berkeley

February 2023 – February 2025

- Create tickets to help 40,000 students, university residents, graduate and undergraduate students with technical support and customer service
- Manage and address a variety of issues with Servicenow, including IP addresses, software and MacOS problems, malfunctions, hardware support, software installation and optimization, and campus platforms
- Attend numerous team meetings to discuss methods of educating students on technology usage

Data and Business Analysis Manager Intern, T-Mobile Capital Planning Team

May 2024 – August 2024

- Created a Power BI report utilized by all of T-Mobile For Business and business stakeholders enhancing data-driven decisions
- Contributed insights and feedback during team meetings by actively participating in discussions
- Gained experience in data cleaning, modeling, analysis, and DAX programming
- Immersed in daily business group's operations by attending All-Employee and financial stakeholder meetings which deepened understanding of organizational processes

Data Science Intern, Daanmatch

February 2024 – May 2024

- Cleaned and merged tax records to focus on specific states to improve accuracy
- Conducted exploratory data analysis to identify institution relationships and patterns
- Standardized address formatting for uniformity across NGOs to implement consistent data

Data Science and Machine Learning Committee, Women in Computing and Data Science

August 2023 – December 2023

- Participated in the Data Science committee, learning SQL, Pandas, and Data Visualization, and using Python & SQL for real-world data analysis
- Collaborated with peers to discuss the impact and concepts of Data Science

Data Analyst and Marketing Project Management Intern, Suiteness and Traverse

June 2023 – August 2023

- Researched market trends for online travel agencies and booking engines to establish benchmark standards
- Monitored industry trends, measured ROI, and performed SWOT analyses for Traverse and Suiteness to enhance sales pitches
- Analyzed customer reviews and growth using Google Analytics and PostHog to develop strategies for improving satisfaction
- Generated reports on social media marketing and business expansion to identify new opportunities

Society of Women Engineers Officer

January 2023 – May 2023

- Designed marketing posters and emails for distribution to 500 members
- Attended workshops, promoting networking and learning opportunities in the tech field.
- Organized and assisted with social events, including picnics and collaborations with other tech clubs

📁 PROJECTS

Build Your Own World

November 2023 – November 2023

- Implemented a 2D based world exploration engine that a user can interact with
- The game creates a random number of rooms/hallways for the world depending on the input number and use the WASD to move avatar inside game
- Implemented a menu with 3 options, HUD, 3 saving slots for the game, and encountering a new world when reaching a turkey

NGordnet

October 2023 – November 2023

- Implemented button "Hyponyms" that return a string representation of a list of the hyponyms of the single word in alphabetical order
- "Hyponym" button also converts the WordNet dataset files into a graph where it takes in a word and uses graph traversal to find hyponyms
- Takes in a list of words and return only common hyponyms of list of words
- Implemented the "k" button to take in years so if k is entered, only return words within that time period
