

OBJECTIVE

Masters Computer Science student and full-stack web developer with 75K+ daily active users across ROBLOX games, focused on creating scalable, engaging user experiences.

EDUCATION

- **Bachelors of Science - Computer Science** – Case Western Reserve University – [Sept 2021 -May 2025]
- **Master of Science - Computer Science** – Case Western Reserve University – [Jan 2025 - May 2026]

EXPERIENCE

- **Xenware Studios** December 2020 – Present
Owner & Lead Game Developer Remote
 - Founded and led an independent Roblox game development group with **56M+ cumulative plays** and a peak of **500K daily active users (currently averaging 75K+ DAU)**.
 - Designed, developed, and released multiple top-performing titles, including *Escape Room Academy* and *School Time*.
 - Built scalable gameplay systems and user interfaces using Lua, Roblox Studio, and custom internal tools like **xenterface**.
 - Managed asset pipelines, game updates, and promotional campaigns, resulting in high engagement and player retention.
 - Collaborated with freelancers and creators for 3D models and marketing, while maintaining a cohesive visual and gameplay vision.
 - Roblox Developer Conference (**RDC**) 2025
- **Full Stack Web Development TA** June 2023 – Present
Teacher's Assistant, Case Western Reserve University Remote
 - Supported a course with an average of 60 students per semester across Summer, Fall, and Spring terms.
 - Tutored students in modern web development frameworks, including React and ExpressJS, and libraries such as jQuery, Bootstrap, and MUI.
 - Graded and evaluated all submitted projects, providing feedback and ensuring adherence to best practices.
- **Data Structures Supplemental Instruction Leader** September 2023 – May 2025
SI Leader, Case Western Reserve University In-person
 - Led twice-weekly, peer-assisted review sessions for 150 students in Data Structures.
 - Collaborated with faculty to identify common pain points and develop targeted support materials to reinforce lecture concepts.
- **Ride Operator** May 2023 – August 2023
The Funplex In-person
 - Operated and monitored multiple amusement rides while ensuring guest safety and satisfaction.
 - Maintained clear communication with staff and guests in a high-volume, fast-paced environment.

SKILLS

- **Programming Languages** Java, JavaScript, TypeScript, Lua/LuaU, Python (numpy, pandas, Scikit-learn, PyTorch, TensorFlow), C/C++, R, SQL
- **Technologies** Git, Linux/Bash, ReactJS, ExpressJS, Django, Postgres, MongoDB, Firebase, Cloudflare Workers & Pages, Render, Vercel, Heroku, NodeJS, MySQL
- **Soft Skills** Communication, Teamwork, Leadership, Problem Solving, Adaptability, Responsibility, Initiative, Time Management
- **CS Specific Skills** Machine Learning, Data Mining, Databases, Software Engineering, Data Structures, Algorithms, Computer Security, Web Development, Game Development, CI/CD
